

Alhambra Fire Department, Raymond Mosack and Jesse Salazar

“The insight, knowledge, tools and connections obtained during the symposium are invaluable. I fully intend on applying and implementing some of the CCR programs I learned about at this year’s symposium.”

“CRR programs apply an integrated view services that encompasses, emergency medical services, fire prevention, public education, and home safety surveys, in order to better serve our community in all aspects of fire and life safety.”

Fire North County Fire District, Patty Koch

“It was truly an amazing experience! The Vision 20/20 symposium brings fire service leaders from across the nation together for the purpose of sharing programs they have developed to reduce risk and save lives in their communities. The model programs presented demonstrated the value of CRR activities and how anyone from any department or organization can do the same.”

Central County Fire Department, Kimberly Giuliacci

“I think everyone in the fire service, city governments and anyone who has a responsibility to the community should attend this symposium. The results that have come from these programs are incredible. The passion that drives everyone to work so hard to accomplish a reduction in risks is what is so inspiring. If everyone had a better understanding and could see the results, perhaps they would then give more support to the cause.”
