From:

Kevin Reinertson
Code Development and Analysis Division

Subject/Agenda Action Item:

Supplement to Title 24, 2010 California Building Standards Codes.

Recommended Actions:

Update only. In accordance with Health and Safety Code 13143, the SFM is proposing certain amendments and building standards for the interim supplement to CCR, Title 24 the 2010 California Building Standards Codes.

Background Information:

The rationale for these actions is to establish minimum requirements for the prevention of fire and for the protection of life and property against fire and panic in occupancies addressed in the 2009 International Building Code and published as the 2010 California Building Code.

The general purpose of this proposed action is principally intended to update the 2010 California Building Code (California Code of Regulations, Title 24, Part 2) based upon updated information or recent actions of the SFM. This proposed action:

- Repeal certain amendments to the 2009 International Building Code and/or California Building Standards not addressed by the model code that are no longer necessary nor justified pursuant with Health and Safety Code 18930(a)(7).
- Adopt and implement additional necessary amendments to the 2010 California Building Code that address inadequacies of the 2009 International Building Code as they pertain to California laws.
- Codify non-substantive editorial and formatting amendments to the 2010 California Building Code.

Specifically these proposed amendments and building standards address the following:

- New California regulation or amendment necessary to address limitations and/or inadequacies of the adopted reference model code and SFM regulations relating to exit access travel distance and fire fighter operations in Group F-1 and S-1 occupancies.
- Antifreeze solutions in residential fire sprinkler systems – make permanent emergency rulemaking.
- Amendments for further clarification, correction and consistency with other SFM regulations.
- Modifications that have no change in regulatory effect or repeal of amendments that are no longer necessary.
- Statutory modification and/or correction of existing regulation.
- Modifications for elevator standards and correlation with CCR, Title 8, Division 1, DOSH Elevator Safety Orders.
- Editorial modification correcting code references to the appropriate California Code.
- Reprint and/or modification of various provisions of California Code of Regulations, Title 19, Division 1 provisions following the CFC Sections noted below.

Analysis/Summary of Issue:
