INSTRUCTIONS

Important: Please read the separate instructions for completing this form before you begin. They clarify the information requested and provide specific examples. If you do not have a copy of the instructions, you can obtain one from the PHMSA Pipeline Safety Community Web Page at http://www.phmsa.dot.gov/pipeline/library/forms.

PART A - KEY REPORT INFORMATION

Report Type: (select all that apply)  
Original: Yes  
Supplemental: Yes  
Final: Yes

Last Revision Date: 18484

1. Operator's OPS-issued Operator Identification Number (OPID): 18484

2. Name of Operator: SOUTHERN CALIFORNIA GAS CO

3. Address of Operator:  
   3a. Street Address: 555 WEST FIFTH STREET  
   3b. City: LOS ANGELES  
   3c. State: California  
   3d. Zip Code: 90013

4. Local time (24-hr clock) and date of the Incident: 11/19/2014 21:02

5. Location of Incident:  
   - Latitude: 35.1694  
   - Longitude: -119.17974

6. National Response Center Report Number (if applicable): 1101516

7. Local time (24-hr clock) and date of initial telephonic report to the National Response Center (if applicable): 11/19/2014 23:50

8. Incident resulted from: Unintentional release of gas

9. Gas released: (select only one, based on predominant volume released)  
   - Natural Gas

10. Estimated volume of commodity released unintentionally - Thousand Cubic Feet (MCF): 36,589.00

11. Estimated volume of intentional and controlled release/blowdown - Thousand Cubic Feet (MCF): 140.00

12. Estimated volume of accompanying liquid release (Barrels): No

13. Were there fatalities? No
   - If Yes, specify the number in each category:  
     - 13a. Operator employees  
     - 13b. Contractor employees working for the Operator  
     - 13c. Non-Operator emergency responders  
     - 13d. Workers working on the right-of-way, but NOT associated with this Operator  
     - 13e. General public  
     - 13f. Total fatalities (sum of above)

14. Were there injuries requiring inpatient hospitalization? No
   - If Yes, specify the number in each category:  
     - 14a. Operator employees  
     - 14b. Contractor employees working for the Operator  
     - 14c. Non-Operator emergency responders  
     - 14d. Workers working on the right-of-way, but NOT associated with this Operator  
     - 14e. General public  
     - 14f. Total injuries (sum of above)

15. Was the pipeline/facility shut down due to the incident? Yes
   - If No, Explain:
15a. Local time and date of shutdown: 11/19/2014 22:41
15b. Local time pipeline/facility restarted: 11/21/2014 00:15
- Still shut down? (* Supplemental Report Required)

16. Did the gas ignite? No
17. Did the gas explode? No
18. Number of general public evacuated: 0

19. Time sequence (use local time, 24-hour clock):
   - 19a. Local time operator identified Incident– effective 10-2014, changed from “Incident” to “failure” 11/19/2014 21:02
   - 19b. Local time operator resources arrived on site 11/19/2014 21:29

PART B - ADDITIONAL LOCATION INFORMATION

1. Was the origin of the Incident onshore? Yes
   - Yes (Complete Questions 2-12)
   - No (Complete Questions 13-15)

If Onshore:

2. State: California
3. Zip Code: 93311
4. City: Bakersfield
5. County or Parish: Kern
6. Operator designated location: Milepost/Valve Station Specify: 0.78
7. Pipeline/Facility name: 203
8. Segment name/ID: NA
9. Was Incident on Federal land, other than the Outer Continental Shelf (OCS)? No
10. Location of Incident: Pipeline Right-of-way
12. Did Incident occur in a crossing? No
   - If Yes, specify type below:
     - If Bridge crossing –
       - Cased/ Uncased:
     - If Railroad crossing –
       - Cased/ Uncased/ Bored/drilled
     - If Road crossing –
       - Cased/ Uncased/ Bored/drilled
     - If Water crossing –
       - Cased/ Uncased
       Name of body of water (If commonly known): 
       Approx. water depth (ft) at the point of the Incident: Select:
   - If Offshore:
13. Approx. water depth (ft) at the point of the Incident:
14. Origin of Incident:
   - If "In State waters":
     - State:
     - Area:
     - Block/Tract #:
     - Nearest County/Parish:
   - If "On the Outer Continental Shelf (OCS)"
     - Area:
     - Block #:
15. Area of Incident:

PART C - ADDITIONAL FACILITY INFORMATION

1. Is the pipeline or facility: - Interstate - Intrastate
   Intrastate
2. Part of system involved in Incident: Onshore Pipeline, Including Valve Sites
3. Item involved in Incident: Pipe
   - If Pipe – Specify: Pipe Body
   3a. Nominal diameter of pipe (in): 10.75
   3b. Wall thickness (in): .250
   3c. SMYS (Specified Minimum Yield Strength) of pipe (psi): 35,000
<p>| | | |</p>

### PART E - ADDITIONAL OPERATING INFORMATION

1. Estimated pressure at the point and time of the Incident (psig): 640.00

2. Maximum Allowable Operating Pressure (MAOP) at the point and time of the Incident (psig): 771.00

---

#### 3. Describe the pressure on the system or facility relating to the Incident:

- Pressure did not exceed MAOP

---

#### 4. Not including pressure reductions required by PHMSA regulations (such as for repairs and pipe movement), was the system or facility relating to the Incident operating under an established pressure restriction with pressure limits below those normally allowed by the MAOP?

- No

---

#### 4a. Did the pressure exceed this established pressure restriction?

- No

---

#### 4b. Was this pressure restriction mandated by PHMSA or the State?

- No

---

#### 5. Was "Onshore Pipeline, Including Valve Sites" OR "Offshore Pipeline, Including Riser and Riser Bend" selected in PART C, Question 2?

- Yes

---

5a. Type of upstream valve used to initially isolate release source: Manual

5b. Type of downstream valve used to initially isolate release source: Manual

5c. Length of segment isolated between valves (ft): 47,853

5d. Is the pipeline configured to accommodate internal inspection tools? No

---

#### 5e. For this pipeline, are there operational factors which significantly complicate the execution of an internal inspection tool run?

- No

---

#### 6. Was a Supervisory Control and Data Acquisition (SCADA)-based system in place on the pipeline or facility involved in the Incident?

- Yes

---

6a. Was it operating at the time of the Incident?

- Yes

---

6b. Was it fully functional at the time of the Incident?

- Yes

---

6c. Did SCADA-based information (such as alarm(s), alert(s), event(s), and/or volume or pack calculations) assist with the detection of the Incident?

- Yes

---

6d. Did SCADA-based information (such as alarm(s), alert(s), event(s), and/or volume calculations) assist with the confirmation of the Incident?

- Yes

---

#### 7. How was the Incident initially identified for the Operator?

- Controller

---

7a. If "Controller", "Local Operating Personnel, including contractors", "Air Patrol", or "Ground Patrol by Operator or its contractor" is selected in Question 7, specify:

- Operator employee

---

8. Was an investigation initiated into whether or not the controller(s) or control room issues were the cause of or a contributing factor to the Incident?

- No, the Operator did not find that an investigation of the controller(s) actions or control room issues was necessary due to: (provide an explanation for why the Operator did not investigate)
- If No, the operator did not find that an investigation of the controller(s) actions or control room issues was necessary due to: (provide an explanation for why the operator did not investigate)

The pressure drop was identified by the controller and was confirmed by the field crew as third party damage.

- If Yes, Describe investigation result(s) (select all that apply):

- Investigation reviewed work schedule rotations, continuous hours of service (while working for the operator), and other factors associated with fatigue
- Investigation did NOT review work schedule rotations, continuous hours of service (while working for the Operator) and other factors associated with fatigue
- Provide an explanation for why not:
- Investigation identified no control room issues
- Investigation identified no controller issues
- Investigation identified incorrect controller action or controller error
- Investigation identified that fatigue may have affected the controller(s) involved or impacted the involved controller(s) response
- Investigation identified incorrect procedures
- Investigation identified incorrect control room equipment operation
- Investigation identified maintenance activities that affected control room operations, procedures, and/or controller response
- Investigation identified areas other than those above – Describe:

PART F - DRUG & ALCOHOL TESTING INFORMATION

1. As a result of this Incident, were any Operator employees tested under the post-accident drug and alcohol testing requirements of DOT’s Drug & Alcohol Testing regulations? No

- If Yes:
  1a. How many were tested:
  1b. How many failed:

2. As a result of this Incident, were any Operator contractor employees tested under the post-accident drug and alcohol testing requirements of DOT’s Drug & Alcohol Testing regulations? No

- If Yes:
  2a. How many were tested:
  2b. How many failed:

PART G - APPARENT CAUSE

Select only one box from PART G in the shaded column on the left representing the APPARENT Cause of the Incident, and answer the questions on the right. Describe secondary, contributing, or root causes of the Incident in the narrative (PART H).

Apparent Cause: G3 - Excavation Damage

G1 - Corrosion Failure - only one sub-cause can be picked from shaded left-hand column

Corrosion Failure – Sub-cause:

- If External Corrosion:
  1. Results of visual examination:
  - If Other, Describe:
  2. Type of corrosion (select all that apply)
    - Galvanic
    - Atmospheric
    - Stray Current
    - Microbiological
    - Selective Seam
    - Other
  - If Other – Describe:
  3. The type(s) of corrosion selected in Question 2 is based on the following: (select all that apply)
    - Field examination
    - Determined by metallurgical analysis
    - Other
  - If Other – Describe:
  4. Was the failed item buried under the ground?
- If Yes:
  4a. Was failed item considered to be under cathodic protection at the time of the incident?
  - If Yes, Year protection started:
  4b. Was shielding, tenting, or disbonding of coating evident at the point of the incident?
  4c. Has one or more Cathodic Protection Survey been conducted at the point of the incident?
    - If "Yes, CP Annual Survey" – Most recent year conducted:
    - If "Yes, Close Interval Survey" – Most recent year conducted:
    - If "Yes, Other CP Survey" – Most recent year conducted:
  - If No:
  4d. Was the failed item externally coated or painted?
  5. Was there observable damage to the coating or paint in the vicinity of the corrosion?
    - If Internal Corrosion:
  6. Results of visual examination:
    - If Other, Describe:
  7. Cause of corrosion (select all that apply):
    - Corrosive Commodity
    - Water drop-out/ Acid
    - Microbiological
    - Erosion
    - Other
    - If Other, Describe:
  8. The cause(s) of corrosion selected in Question 7 is based on the following (select all that apply):
    - Field examination
    - Determined by metallurgical analysis
    - Other
    - If Other, Describe:
  9. Location of corrosion (select all that apply):
    - Low point in pipe
    - Elbow
    - Drop-out
    - Other
    - If Other, Describe:
  10. Was the gas/fluid treated with corrosion inhibitors or biocides?
  11. Was the interior coated or lined with protective coating?
  12. Were cleaning/dewatering pigs (or other operations) routinely utilized?
  13. Were corrosion coupons routinely utilized?

Complete the following if any Corrosion Failure sub-cause is selected AND the "Item Involved in Incident" (from PART C, Question 3) is Pipe or Weld.

14. Has one or more internal inspection tool collected data at the point of the Incident?
  14a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:
    - Magnetic Flux Leakage Tool
      Most recent year run:
    - Ultrasonic
      Most recent year run:
    - Geometry
      Most recent year run:
    - Caliper
      Most recent year run:
    - Crack
      Most recent year run:
    - Hard Spot
      Most recent year run:
    - Combination Tool
      Most recent year run:
    - Transverse Field/Triaxial
      Most recent year run:
    - Other
      Most recent year run:
      If Other, Describe:
  15. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?
    - If Yes,
### Reproduction of this form is permitted

<table>
<thead>
<tr>
<th>Most recent year tested:</th>
<th>Test pressure (psig):</th>
</tr>
</thead>
</table>

16. Has one or more Direct Assessment been conducted on this segment?
- If Yes, and an investigative dig was conducted at the point of the Incident:
  - Most recent year conducted:
- If Yes, but the point of the Incident was not identified as a dig site:
  - Most recent year conducted:

17. Has one or more non-destructive examination been conducted at the point of the Incident since January 1, 2002?
17a. If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:
- Radiography
  - Most recent year examined:
- Guided Wave Ultrasonic
  - Most recent year examined:
- Handheld Ultrasonic Tool
  - Most recent year examined:
- Wet Magnetic Particle Test
  - Most recent year examined:
- Dry Magnetic Particle Test
  - Most recent year examined:
- Other
  - Most recent year examined:
  - If Other, Describe:

### G2 - Natural Force Damage - only one sub-cause can be picked from shaded left-handed column

Natural Force Damage – Sub-Cause:

- If Earth Movement, NOT due to Heavy Rains/Floods:
  1. Specify:
  - If Other, Describe:
- If Heavy Rains/Floods:
  2. Specify:
  - If Other, Describe:
- If Lightning:
  3. Specify:
- If Temperature:
  4. Specify:
  - If Other, Describe:
- If Other Natural Force Damage:
  5. Specify:
  Complete the following if any Natural Force Damage sub-cause is selected.
  6. Were the natural forces causing the Incident generated in conjunction with an extreme weather event?
  6a. If yes, specify: (select all that apply):
  - Hurricane
  - Tropical Storm
  - Tornado
  - Other
  - If Other, Describe:

### G3 - Excavation Damage only one sub-cause can be picked from shaded left-hand column

Excavation Damage – Sub-Cause: Excavation Damage by Third Party

- If Previous Damage Due to Excavation Activity: Complete Questions 1-5 ONLY IF the "Item Involved in Incident" (From Part C, Question 3) is Pipe or Weld.
  1. Has one or more internal inspection tool collected data at the point of the Incident?
    1a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:
    - Magnetic Flux Leakage
      Year:
    - Ultrasonic
      Year:
    - Geometry
      Year:
    - Caliper
      Year:
2. Do you have reason to believe that the internal inspection was completed BEFORE the damage was sustained?

3. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?
   - If Yes:
     Most recent year tested:
     Test pressure (psig):

4. Has one or more Direct Assessment been conducted on the pipeline segment?
   - If Yes, and an investigative dig was conducted at the point of the Incident:
     Most recent year conducted:
   - If Yes, but the point of the Incident was not identified as a dig site:
     Most recent year conducted:

5. Has one or more non-destructive examination been conducted at the point of the Incident since January 1, 2002?
   5a. If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:
     - Radiography
       Year:
     - Guided Wave Ultrasonic
       Year:
     - Handheld Ultrasonic Tool
       Year:
     - Wet Magnetic Particle Test
       Year:
     - Dry Magnetic Particle Test
       Year:
     - Other
       Year:
     Describe:

Complete the following if Excavation Damage by Third Party is selected as the sub-cause.

6. Did the operator get prior notification of the excavation activity? Yes
   6a. If Yes, Notification received from (select all that apply):
     - One-Call System Yes
     - Excavator
     - Contractor
     - Landowner

Complete the following mandatory CGA-DIRT Program questions if any Excavation Damage sub-cause is selected.

7. Do you want PHMSA to upload the following information to CGA-DIRT (www.cga-dirt.com)? No

8. Right-of-Way where event occurred (select all that apply):
   - Public
   - Private
     - If Public, Specify: Yes
     - If Private, Specify: Private Landowner
   - Pipeline Property/Easement Yes
   - Power/Transmission Line
   - Railroad
   - Dedicated Public Utility Easement
   - Federal Land
   - Data not collected
   - Unknown/Other

9. Type of excavator: Farmer

10. Type of excavation equipment: Farm Equipment

11. Type of work performed: Agriculture

12. Was the One-Call Center notified? - Yes - No Yes
12a. If Yes, specify ticket number: 478602
12b. If this is a State where more than a single One-Call Center exists, list the name of the One-Call Center notified: There are two tickets associated with this incident. 478040
13. Type of Locator: Utility Owner
14. Were facility locate marks visible in the area of excavation? Yes
15. Were facilities marked correctly? Yes
16. Did the damage cause an interruption in service? Yes
16a. If Yes, specify duration of the interruption: (hours) 25
17. Description of the CGA-DIRT Root Cause (select only the one predominant first level CGA-DIRT Root Cause and then, where available as a choice, then one predominant second level CGA-DIRT Root Cause as well):

<table>
<thead>
<tr>
<th>Predominant first level CGA-DIRT Root Cause</th>
<th>Excavation Practices Not Sufficient</th>
</tr>
</thead>
<tbody>
<tr>
<td>- If One-Call Notification Practices Not Sufficient, Specify:</td>
<td></td>

<td></td>
</tr>
<tr>
<td>- If Other/None of the Above, Explain:</td>
<td></td>
</tr>
</tbody>
</table>

**G4 - Other Outside Force Damage** - only one sub-cause can be selected from the shaded left-hand column

**Other Outside Force Damage – Sub-Cause:**

- If Damage by Car, Truck, or Other Motorized Vehicle/Equipment NOT Engaged in Excavation:

1. Vehicle/Equipment operated by:

- If Damage by Boats, Barges, Drilling Rigs, or Other Maritime Equipment or Vessels Set Adrift or Which Have Otherwise Lost Their Mooring:

2. Select one or more of the following IF an extreme weather event was a factor:

   - Hurricane
   - Tropical Storm
   - Tornado
   - Heavy Rains/Flood
   - Other

   - If Other, Describe:

- If Previous Mechanical Damage NOT Related to Excavation: Complete Questions 3-7 ONLY IF the "Item Involved in Incident" (from PART C, Question 3) is Pipe or Weld.

3. Has one or more internal inspection tool collected data at the point of the Incident?

3a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:

   - Magnetic Flux Leakage
     Most recent year run:
   - Ultrasonic
     Most recent year run:
   - Geometry
     Most recent year run:
   - Caliper
     Most recent year run:
   - Crack
     Most recent year run:
   - Hard Spot
     Most recent year run:
   - Combination Tool
     Most recent year run:
   - Transverse Field/Triaxial
     Most recent year run:
   - Other:
     Most recent year run:

   Describe:

4. Do you have reason to believe that the internal inspection was completed BEFORE the damage was sustained?

5. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?

   - If Yes:
     Most recent year tested:
     Test pressure (psig):

6. Has one or more Direct Assessment been conducted on the pipeline segment?

   - If Yes, and an investigative dig was conducted at the point of the Incident:
7. Has one or more non-destructive examination been conducted at the point of the Incident since January 1, 2002?

7a. If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:

- Radiography
- Guided Wave Ultrasonic
- Handheld Ultrasonic Tool
- Wet Magnetic Particle Test
- Dry Magnetic Particle Test
- Other

Describe:

- If Intentional Damage:
- If Other, Describe:

- If Other Outside Force Damage:

9. Describe:

G5 - Pipe, Weld, or Joint Failure

Use this section to report material failures ONLY IF the "Item Involved in Incident" (from PART C, Question 3) is "Pipe" or "Weld."

Only one sub-cause can be selected from the shaded left-hand column

Pipe, Weld or Joint Failure – Sub-Cause:

1. The sub-cause shown above is based on the following (select all that apply):

   - Field Examination
   - Determined by Metallurgical Analysis
   - Other Analysis

   - If "Other Analysis", Describe

   - Sub-cause is Tentative or Suspected; Still Under Investigation (Supplemental Report required)

   - If Construction-, Installation- or Fabrication

2. List contributing factors: (select all that apply)

   - Fatigue or Vibration related:

   Specify:

   - If Other, Describe:

   - Mechanical Stress

   - Other

   - If Other, Describe:

   - If Environmental Cracking-related:

3. Specify:

   - If Other, Describe:

Complete the following if any Material Failure of Pipe or Weld sub-cause is selected.

4. Additional Factors (select all that apply):

   - Dent
   - Gouge
   - Pipe Bend
   - Arc Burn
   - Crack
   - Lack of Fusion
   - Lamination
   - Buckle
   - Wrinkle
   - Misalignment
   - Burnt Steel
   - Other

   - If Other, Describe:

5. Has one or more internal inspection tool collected data at the point of
5a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:

<table>
<thead>
<tr>
<th>Tool Type</th>
<th>Most Recent Year Run</th>
</tr>
</thead>
<tbody>
<tr>
<td>Magnetic Flux Leakage</td>
<td></td>
</tr>
<tr>
<td>Ultrasonic</td>
<td></td>
</tr>

<td></td>
</tr>
<tr>
<td>Other</td>
<td></td>
</tr>
</tbody>
</table>

Most recent year run:

Describe:

6. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?

- If Yes:

<table>
<thead>
<tr>
<th>Test Pressure (psig)</th>
<th>Most Recent Year Tested</th>
</tr>
</thead>
</table>

7. Has one or more Direct Assessment been conducted on the pipeline segment?

- If Yes, and an investigative dig was conducted at the point of the Incident:

<table>
<thead>
<tr>
<th>Most Recent Year Conducted</th>
</tr>
</thead>
</table>

- If Yes, but the point of the Incident was not identified as a dig site:

<table>
<thead>
<tr>
<th>Most Recent Year Conducted</th>
</tr>
</thead>
</table>

8. Has one or more non-destructive examination(s) been conducted at the point of the Incident since January 1, 2002?

8a. If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:

<table>
<thead>
<tr>
<th>Examination Type</th>
<th>Most Recent Year Conducted</th>
</tr>
</thead>
<tbody>
<tr>
<td>Radiography</td>

<tr>
<td>Check Valve</td>
</tr>
<tr>
<td>Relief Valve</td>
</tr>
<tr>
<td>Power Failure</td>
</tr>
</tbody>
</table>
- Stopple/Control Fitting
- Pressure Regulator
- ESD System Failure
- Other
- If Other, Describe:

- If Compressor or Compressor-related Equipment:
  2. Specify:
- If Other, Describe:

- If Threaded Connection/Coupling Failure:
  3. Specify:
- If Other, Describe:

- If Non-threaded Connection Failure:
  4. Specify:
- If Other, Describe:

- If Other Equipment Failure:
  5. Specify:

Complete the following if any Equipment Failure sub-cause is selected.

6. Additional factors that contributed to the equipment failure (select all that apply)
   - Excessive vibration
   - Overpressurization
   - No support or loss of support
   - Manufacturing defect
   - Loss of electricity
   - Improper installation
   - Mismatched items (different manufacturer for tubing and tubing fittings)
   - Dissimilar metals
   - Breakdown of soft goods due to compatibility issues with transported gas/liquid
   - Valve vault or valve can contributed to the release
   - Alarm/status failure
   - Misalignment
   - Thermal stress
   - Other
   - If Other, Describe:

G7 – Incorrect Operation - only one sub-cause can be selected from the shaded left-hand column

Incorrect Operation – Sub-Cause:

- If Underground Gas Storage, Pressure Vessel, or Cavern Allowed or Caused to Overpressure:
  1. Specify:
  - If Other, Describe:

- If Other Incorrect Operation:
  2. Specify:

Complete the following if any Incorrect Operation sub-cause is selected.

3. Was this incident related to: (select all that apply)
   - Inadequate procedure
   - No procedure established
   - Failure to follow procedure
   - Other:
   - If Other, Describe:

4. What category type was the activity that caused the incident?

5. Was the task(s) that led to the incident identified as a covered task in your Operator Qualification Program?
   5a. If Yes, were the individuals performing the task(s) qualified for the task(s)?

G8 - Other Incident Cause - only one sub-cause can be selected from the shaded left-hand column

Other Incident Cause – Sub-Cause:

- If Miscellaneous:
  1. Specify:
- If Unknown:
PART - H NARRATIVE DESCRIPTION OF THE INCIDENT

On November 19, 2014, a third party contractor was operating a ripper at night and struck a 10 inch steel transmission line, resulting in a gas leak. No injuries or further damage resulted from this incident.

The incident location is 3,000 feet South of Millux Rd, Bakersfield. The initial incident location reported to DOT was Lake Road, Taft.

All repairs to the damaged line were completed and the pipeline was returned to service in approximately 26 hours. Service to affected customers was restored over a period of 2 days.

Investigation of the incident showed that the contractor had notified the One-Call Center and the line had been marked correctly, but the Contractor failed to maintain proper clearance by not digging within 25 feet of either side of the line markings as required by agreement.
