Elimination of Shipping SFT Manuals and Student Supplements

Effective July 1, 2014 State Fire Training (SFT) will no longer ship SFT student manuals or supplements with class materials for all SFT approved courses. This allows SFT to discontinue printing and shipping paper manuals. Instead, SFT will make all applicable SFT student manuals or supplements available electronically on the SFT website where they will be available at <http://osfm.fire.ca.gov/training/downloadablesftmanuals.php> for free public download. These electronic versions are currently posted now and may be downloaded and printed, transmitted electronically to students or made available to students in a format that meets the needs of the course delivery.

Even though SFT will not be shipping manuals or supplements after July 1, 2014, students are still expected to have a copy of the appropriate manual or supplement (when applicable) either physically or electronically along with all other required materials prior to beginning any SFT course. As always, Instructors are expected to ensure that all students are properly equipped for class and meet all of the course prerequisites before beginning any SFT course.

If you have any questions, please contact Kris Rose, Manager of Certification and Instructor Registration at Kris.Rose@fire.ca.gov or (916)327-2129.
