### INCIDENT MANAGEMENT OF MAJOR FIRES COURSE OUTLINE

**Unit 1: Introduction**
- Topic 1-1: Orientation and Administration

**Unit 2: The Eight Standards of Command**
- Topic 2-1: Identifying the Components of the Process of Assuming Command
- Topic 2-2: Improving Situational Awareness and Identifying the Risk Assessment Process
- Topic 2-3: Establishing a Communications Plan
• Topic 2-4: Developing and Implementing an IAP
• Topic 2-5: Developing an Effective Incident Organization
• Topic 2-6: Initiating Accountability and Command Worksheets
• Topic 2-7: Reviewing, Evaluating, and Revising the IAP
• Topic 2-8: Continuing, Transferring, and Terminating Command

*This is an abbreviated Course Plan. Terminal & Enabling Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: http://osfm.fire.ca.gov/divisions/state-fire-training/fstep-curriculum/
### Course Information and Required Materials

**Course:** Incident Management of the Fire Fighter Emergency (2016)

**Hours:** 24

**Designed For:** Incident Commanders

**Description:** This command level awareness course provides the student with the incident management terminology and methodology that is employed during a fire fighter emergency. Classroom simulations based upon case studies allow students to participate in simulated incident command positions during a fire fighter emergency.

**Prerequisites:**
- Basic Incident Command System I-200
- Company Officer 2D: All-Risk Command Operations, or Command 1A, or Fire Command 1A

**Standard:** Attend all classes, complete all activities & the summative test with a min. score of 80%.

**Max. Class Size:** 25

**Student/Instructor Ratio:** 25:1 (Lecture/Activities); 10:1 (Skills)

**Restrictions:** None

### Unit 1: Introduction

- Topic 1-1: Orientation and Administration

### Unit 2: Managing the Fire Fighter Emergency

- Topic 2-1: Identifying the Eight Functions/Standards of Command
- Topic 2-2: Identifying Critical Incident Factors
- Topic 2-3: Identifying the Warning Signs of a Pending RIC Deployment
- Topic 2-4: Ensuring the Duties of the RIC Are Performed
- Topic 2-5: Implementing the Incident Command Procedures to Address the Fire Fighter Emergency
- Topic 2-6: Implementing the RIC Division/Group/Branch’s Procedures to Address the Fire Fighter Emergency
- Topic 2-7: Describing Post Deployment Considerations

**COMMUNITY RISK OFFICER COURSES**

**Course Information and Required Materials**

January 2019

**Course:** Community Risk Educator (2014)

**Hours:** 24

**Designed For:** Community Risk Educator Candidate

**Description:** This course provides the skills and knowledge needed for the Community Risk Educator to perform his/her duties safely, effectively, and competently by coordinating and delivering existing educational programs and information.

**Prerequisites:**
- Introduction to Incident Command System I-100
- National Incident Management System (NIMS): An Introduction 700
- Instructor I: Instructor Methodology OR Training Instructor 1A Cognitive Lesson Delivery
- Fire Prevention I: Fire & Safety Inspections OR Fire Prevention 1A: Introduction to the California Fire Code Bridge OR Company Officer 2C: Fire Inspections and Investigation OR Three college-level units in Introduction to Fire Technology

**Certification:** Community Risk Educator

**Standard:** Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.

**Max. Class Size:** 30

**Restrictions:** None

Course Information and Required Materials
January 2019

Course: Community Risk Officer (2014)
Hours: 46:30
Designed For: Community Risk Officer Candidate
Description: This course provides the skills and knowledge needed for the Community Risk Specialist to perform his/her duties safely, effectively, and competently by creating, administering, and evaluating educational programs and information; and managing a Junior Firesetting Intervention Program and the activities of the JFIS I.

Prerequisites:
• Community Risk Specialist
• Youth Firesetting Prevention and Intervention Level II NFA-FO634; OR Youth Firesetting Prevention and Intervention NFA-RO629
• PIO Awareness EMI G-289 State OES Delivery
• JIS/JIC Planning EMI G-291 State OES Delivery
• Intermediate Wildland Fire Behavior NWCG S-290
• Intermediate Incident Command System I-300

Certification: Community Risk Officer
Standard: Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.

Max. Class Size: 30
Restrictions: None

- Topic 1-1: Orientation and Administration
- Topic 1-2: Community Risk Educator Certification Process

Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: Community Risk Officer Certification Process

Unit 2: FLSE Administration
- Topic 2-1: Developing a Fire and Life Safety Education Budget
- Topic 2-2: Formulating Alternate Fire and Life Safety Program Development and Delivery Systems
COMMUNITY RISK OFFICER COURSE CONTENT*

Unit 3: FLSE Planning and Development
- Topic 3-1: Developing a Comprehensive Fire and Life Safety Education Strategy
- Topic 3-2: Creating a Fire and Life Safety Education Coalition
- Topic 3-3: Projecting Future Fire and Life Safety Needs
- Topic 3-4: Proposing Fire and Life Safety Public Policy
- Topic 3-5: Developing a Fire and Life Safety Marketing Plan

Unit 4: FLSE Education and Implementation
- Topic 4-1: Creating Fire and Life Safety Educational Messages
- Topic 4-2: Establishing Administration Policies for Fire and Life Safety Education
- Topic 4-3: Creating a Training Program for Fire and Life Safety Educators
- Topic 4-4: Creating a Fire and Life Safety Internal Awareness Campaign
- Topic 4-5: Creating Fire and Life Safety Education Reports

Unit 5: FLSE Evaluation
- Topic 5-1: Implementing Public Health Surveillance Systems
- Topic 5-2: Evaluating Fire and Life Safety Educational Programs

Unit 6: JFIS Administration
- Topic 6-1: Formulating JFIS Program Policies and Procedures
- Topic 6-2: Developing a JFIS Program Budget
- Topic 6-3: Identifying and Assigning a JFIS I
- Topic 6-4: Supervising a JFIS I
- Topic 6-5: Maintaining Records and Case Files of Juvenile Firesetters

Unit 7: JFIS Planning and Development
- Topic 7-1: Developing JFIS Interagency Networks
- Topic 7-2: Developing and Selecting Approved JFIS Forms and Materials
- Topic 7-3: Designing a JFIS Training Program
- Topic 7-4: Developing a JFIS Community Awareness Program
- Topic 7-5: Creating and Maintaining JFIS Data Collection Systems

Unit 8: JFIS Education and Implementation
- Topic 8-1: Delivering an Internal JFIS Training Program
- Topic 8-2: Maintaining JFIS Interagency Networks
- Topic 8-3: Delivering JFIS Community Awareness Training

Unit 9: JFIS Evaluation
- Topic 9-1: Evaluating JFIS Programs
- Topic 9-2: Analyzing JFIS Program Effectiveness
  Topic 9-3: Preparing JFIS Program Reports
Course: Community Risk Specialist (2014)
Hours: 57
Designed For: Community Risk Specialist Candidate
Description: This course provides the skills and knowledge needed for the Community Risk Specialist to perform his/her duties safely, effectively, and competently by preparing educational programs and information to meet identified needs; conducting JFS intakes/interviews to determine needs for referral and/or implementing educational intervention strategies; and managing interactions with the media and articulating organizational messages as a PIO.

Prerequisites:
- Community Risk Educator
- Introduction to Incident Information, NWCG S-203
- Introduction to Wildland Fire Behavior NWCG S-190
- ICS for Single Resources and Initial Action Incidents I-200.B
- Youth Firesetting Prevention and Intervention Level I NFA-F0633; OR Youth Firesetting Prevention and Intervention NFA-R0629
- Public Information Officer Awareness, EMI Independent Study IS-289

Certification: Community Risk Specialist
Standard: Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.
Max. Class Size: 30
Restrictions: None

COMMUNITY RISK SPECIALIST COURSE CONTENT*

Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: Community Risk Specialist Certification Process

Unit 2: FLSE Administration
- Topic 2-1: Preparing a Fire and Life Safety Budget Proposal
- Topic 2-2: Project Fire and Life Safety Program Budget Income/Expenditures
- Topic 2-3: Developing Fire and Life Safety Public Policy Recommendations
- Topic 2-4: Evaluating Fire and Life Safety Subordinate Performance
COMMUNITY RISK SPECIALIST COURSE CONTENT*

Unit 3: FLSE Planning and Development
- Topic 3-1: Establishing Fire and Life Safety Education Priorities
- Topic 3-2: Facilitating Fire and Life Safety Collaborative Partnerships
- Topic 3-3: Preparing Fire and Life Safety Resource Requests to External Agencies

Unit 4: FLSE Education and Implementation
- Topic 4-1: Developing Fire and Life Safety Informational Materials
- Topic 4-2: Developing Fire and Life Safety Lesson Plans
- Topic 4-3: Developing Fire and Life Safety Educational Materials
- Topic 4-4: Designing Fire and Life Safety Education Program
- Topic 4-5: Revising Fire and Life Safety Educational Programs

Unit 5: FLSE Evaluation
- Topic 5-1: Developing Fire and Life Safety Evaluation Strategies
- Topic 5-2: Designing Fire and Life Safety Evaluation Instruments
- Topic 5-3: Implementing Fire and Life Safety Evaluation Strategies

Unit 6: JFIS Administration
- Topic 6-1: Assembling JFIS Intake Forms and Materials
- Topic 6-2: Assembling JFIS Interview Tools and Materials
- Topic 6-3: Utilizing Personal Work Schedules to Conduct JFIS Interviews
- Topic 6-4: Reporting JFIS Case Information to a Supervisor
- Topic 6-5: Recording and Securing JFIS Data

Unit 7: JFIS Planning and Development
- Topic 7-1: Reviewing JFIS Case Files
- Topic 7-2: Initiating JFIS Contact with Families
- Topic 7-3: Conducting JFIS Intakes and Interviews
- Topic 7-4: Determining JFIS Intervention Options
- Topic 7-5: Implementing JFIS Interventions
- Topic 7-6: Implementing JFIS Referral Processes

Unit 8: JFIS Evaluation
- Topic 8-1: Collecting and Recording JFIS Feedback
- Topic 9-1: Conducting Media Interviews and Preparing News/Press Releases
- Topic 9-2: Establishing Media Areas
- Topic 9-3: Disseminating Information to the Media
- Topic 9-4: Disseminating Information to Community Groups
- Topic 9-5: Preparing Media Advisories
- Topic 9-6: Disseminating Information Internally
- Topic 9-7: Coordinating a News Conference

### BASIC EMERGENCY VEHICLE OPERATIONS COURSE OUTLINE

Course Objectives: To provide the student with...
- Information on driver responsibilities, vehicle laws, and defensive driving techniques.
- Information and techniques on basic inspections and maintenance of emergency vehicles
- Information and techniques for operating an emergency vehicle prior to the run, during the run, while at the emergency and when returning to the unit's quarters.
- An opportunity to increase his or her driving skills using simulated driving conditions.

Course Content:

- Introduction to Emergency Vehicle Operation ................................................................. 0:30
- State and Local Laws Relating to Emergency Vehicle Operations ............................... 0:20
- Department Driving Rules and Regulations ................................................................. 0:30
- Principles of Driving Techniques .............................................................................. 1:00
- Principles of Safe Driving of Emergency Vehicles During "Code 3" Response .......... 1:00
- Driving Safety Considerations for Off Road Operations ......................................... 0:30
- Driver Safety While Working on Freeway Emergencies ........................................... 0:30
- Placement of Emergency Vehicles at an Emergency Scene ..................................... 0:10
- Mobile Pumping Safety Considerations ................................................................. 0:20
- How to Perform Routine Emergency Inspection ....................................................... 0:10
- How to Read and Interpret Vehicle Gauges .............................................................. 0:30
- How to Perform Routine Emergency Vehicle Maintenance ..................................... 0:45
- How to Complete Routine Maintenance Records and Reports ............................... 0:15
- Development of an Equipment Inventory Checks .................................................... 0:30
- How to Make Daily Equipment Inventory Checks .................................................. 0:30
- Development of a Route Map Book ....................................................................... 0:30
- How to Drive Apparatus......................................................................................... 1:00
- How to Maneuver Apparatus Through Serpentine Exercise .................................... 1:00
- How to Maneuver Apparatus Through Offset Alley Exercise .................................. 1:00
- How to Maneuver Apparatus Through Straight Line Exercise .................................. 1:00
- How to Maneuver Apparatus Through Turn Around Exercise ................................ 1:00
- How to Maneuver Apparatus Through Diminishing Clearance Exercise .................. 1:00
- How to Maneuver Apparatus While Mobile Pumping ............................................. 1:00
- How to Maneuver Apparatus on Up and Down Hill Exercise .................................... 1:00
**Course Information and Required Materials**

January 2019

**Course:** Basic Pump Operations (1993)
**Hours:** 16
**Designed For:** All fire service personnel
**Description:** This course provides the student with the information and skills training for operating fire service pumps. Topics include types of pumps, engine and pump gauges, maintenance, unsafe pumping conditions, pressure relief devices, cooling systems, water supplies, drafting, and field hydraulics. Each student also has the opportunity to increase his or her pumping skills during simulated pumping conditions.

**Prerequisites:** None
**Certification:** None
**Max. Class Size:** 25
**Restrictions:** This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

**Required Student Materials**

| None |

**Required Instructor Materials**

| Instructor Guide  | 1993 | SFT |

| Vendors |

| SFT | State Fire Training | FSTEP Curriculum Link |

**Course Objectives:**
- Information and theory on pump operation.
- Methods of performing basic field hydraulics
- Methods and techniques for routine maintenance on pumping apparatus.
- Methods and procedures for pump operations from the tank, a hydrant and at draft.

**Course Content:**

- Introduction to Pump Operations ................................................................. 0:30
- Types of Pumps ............................................................................................... 0:30
- Types of Priming Devices ............................................................................... 0:15
- Single and Multi-Stage Centrifugal Pumps .................................................. 0:30
- Engine and Pump Gages ................................................................................ 0:15
- Maintenance Records and Reports ............................................................... 0:15
- Rated Performance of Fire Service Pumps .................................................... 0:15
- Unsafe Pumping Conditions .......................................................................... 0:30
- Pressure Relief Valves .................................................................................. 0:15
- Auxiliary Cooling Systems ............................................................................ 0:15
- Check Valves .................................................................................................. 0:10
- Water Supplies for Pump Operations ............................................................ 0:20
- Tank Supply Operations ................................................................................ 0:15
- Water Tender Relay Operations ..................................................................... 0:15
- Fire Hydrant Operations ................................................................................ 0:30
- Tandem Pumping Operations ........................................................................ 0:30
- Forward Hose Lay Supply Operations ......................................................... 0:30
- Drafting Theory .............................................................................................. 0:30
- Static Water Supply Operations .................................................................... 0:30
- Ejector Pump Operations ................................................................................ 0:30
COURSE INFORMATION AND REQUIRED MATERIALS
January 2019

Relay Pumping Operations ........................................................................................................................ 0:30
Field Hydraulics ......................................................................................................................................... 2:00
How to Provide Power to the Pump .......................................................................................................... 1:00
How to Use Tank Water ............................................................................................................................. 1:00
How to Use a Hydrant ............................................................................................................................... 1:00
How to Relay Pump ................................................................................................................................. 1:00
How to Draft Water ................................................................................................................................... 1:00
How to Use an Ejector Pump ..................................................................................................................... 1:00
Course Information and Required Materials
January 2019

Hours: 40

Designed For: Career and volunteer fire service personnel who drive and operate fire apparatus

Description: This course provides information on fire apparatus preventive maintenance and driving/operating. Topics include routine tests, inspections, and servicing functions, operate, back, maneuver, and turn a fire apparatus in a variety of conditions; and operate all fixed systems and equipment on a fire apparatus. This course is based on the 2014 edition of NFPA 1002 Standard for Fire Apparatus Driver/Operator Professional Qualifications. This course fulfills the requirements for a Class C Firefighter Endorsement.

Prerequisites: Hold a valid Class C driver’s license (minimum)

Certification: Fire Apparatus Driver/Operator – Pumping Apparatus

Max. Class Size: 30

Stud./Instructor Ratio: 30:1 (Lecture); 10:1 (Skills)

Instructor Level: This course requires one (1) primary instructor and sufficient assistant instructors to meet the skills ratio

Restrictions: Sufficient fire apparatus and adequate space to accommodate the students in the class and the required skills

### Course Information and Required Materials

**Course:** Fire Apparatus Driver/Operator 1B: Pumping Apparatus Operations (2015)

**Hours:** 40

**Designed For:** Career and volunteer fire service personnel who drive and operate fire apparatus

**Description:** This course provides information on pumping apparatus preventive maintenance and operations. Topics include routine tests, inspections, and servicing functions; producing hand, master, and foam fire streams, relay pump operations; and supplying water to fire sprinkler and standpipe systems. This course is based on the 2014 edition of NFPA 1002 Standard for Fire Apparatus Driver/Operator Professional Qualifications.

**Prerequisites:** Fire Apparatus Driver/Operator 1A (2008 or 2015 version)
Successfully completed OSFM Fire Fighter I
Hold a valid Class C Firefighter Endorsed driver’s license (minimum)

**Certification:** Fire Apparatus Driver/Operator – Pumping Apparatus

**Standard:** Complete all summative tests with a minimum score of 80%.
Complete all activities and formative tests.

**Max. Class Size:** 30

**Stud./Instructor Ratio:** 30:1 (Lecture); 5:1 (Skills)

**Instructor Level:** This course requires one (1) primary instructor and sufficient assistant instructors to meet the skills ratio

**Restrictions:** Sufficient fire apparatus and adequate space to accommodate the students in the class and the required skills

#### Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: Fire Apparatus Driver/Operator - Pumping Apparatus Certification Process
Unit 2: Preventive Maintenance
   • Topic 2-1: Perform and Document Routine Tests, Inspections, and Servicing Functions Unique to Pumping Apparatus

Unit 3: Operations
   • Topic 3-1: Produce an Effective Hand or Master Stream
   • Topic 3-2: Relay Pumping Operation
   • Topic 3-3: Produce a Foam Fire Stream
   • Topic 3-4: Supply Water to Fire Sprinkler and Standpipe Systems

*This is an abbreviated Course Plan. Terminal & Enabling Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: http://osfm.fire.ca.gov/divisions/state-fire-training/cfstes-professional-certification/
**Tilled Apparatus Operations (2015)**

**Course:** Career and volunteer fire service personnel who drive and operate a tilled apparatus

**Description:** This course provides information on operating a fire department aerial apparatus equipped with a tiller. Topics include practical driving exercises; and operating, positioning, and stabilizing the apparatus from both the tractor and tiller positions. This course is based on the 2014 edition of NFPA 1002 Standard for Fire Apparatus Driver/Operator Professional Qualifications.

**Prerequisites:** Successfully completed OSFM Fire Fighter I training
Fire Apparatus Driver/Operator 1A (2015 or 2008 curriculum)
Hold a valid Class C Firefighter Endorsed driver’s license (minimum)

**Certification:** Fire Apparatus Driver/Operator – Tilled Apparatus

**Standard:** Complete all summative tests with a minimum score of 80%.
Complete all activities and formative tests.

**Max. Class Size:** 30

**Student/Instructor Ratio:**
- Lecture: 30:1
- Skills: 10:1

**Instructor Level:** This course requires one (1) primary instructor and sufficient assistant instructors to meet the skills ratio

**Restrictions:** Sufficient fire apparatus and adequate space to accommodate the students in the class and the required skills

**REQUIRED STUDENT MATERIALS**

- Personal protective clothing -- --

**REQUIRED INSTRUCTOR MATERIALS**

- Manufacture’s specifications and requirements -- --
- Instructor Activities -- SFT

Course: **Water Tender Operations (2015)**  
Hours: 32  
Designed For: Career and volunteer fire service personnel who drive and operate a water tender  
Description: This course provides information on water tender preventive maintenance and operations. Topics include routine tests, inspections, and servicing functions unique to a water tender; maneuvering and positioning a water tender at a water shuttle fill site; and establishing, maneuvering, and positioning at a water shuttle dumpsite. This course is based on the 2014 edition of *NFPA 1002 Standard for Fire Apparatus Driver/Operator Professional Qualifications*.

Prerequisites:  
- Hold a valid Class C Firefighter Endorsed driver’s license (minimum)  
- Successfully completed OSFM Fire Fighter I training  
- Fire Apparatus Driver/Operator 1A (2008 or 2015 version)  
- Fire Apparatus Driver/Operator 1B (2008 or 2015 version)  
- Completed a minimum of four (4) hours driving a water tender  
- Completed the activities from Driver/Operator 1A while driving a water tender

Certification: Fire Apparatus Driver/Operator – Water Tender Apparatus  
Standard: Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.

Max. Class Size: 30  
Study/Instructor Ratio: 30:1 (Lecture); 10:1 (Skills)  
Instructor Level: This course requires one (1) primary instructor and sufficient assistant instructors to meet the skills ratio  
Restrictions: Sufficient fire apparatus and adequate space to accommodate the students in the class and the required skills

CONFINED SPACE RESCUE AWARENESS COURSE OUTLINE

Course Objectives: To provide the student with...
- Information on the codes that affect operations within confined spaces.
- Information to identify confined spaces and permit confined spaces.
- Information on the hazards of confined spaces.
- Information on the equipment and procedures required to deal with a confined space rescue safely and legally.
- Information on the basic operational positions, and their responsibilities as set forth by Cal/OSHA.

Course Objectives: To provide the student with...
- An overview of the social, economic and ecological issues of alternative fuel vehicles
- Information on the hazards associated with each fuel/energy source
- Techniques to identify alternative fuel/energy vehicles
- Information on the safety features and components of the refueling facilities
- An application of standard operating guidelines to new fuel/energy vehicle technologies

Course Content:  
- Introduction and Course Procedures 0:30
- Introduction to Internal Combustion Vehicles 0:15
- Ethanol Fuel 1:00
- Biodiesel 0:45
- Compressed Natural Gas (CNG) 1:00
- Liquefied Natural Gas Propane (LNG) 1:00
- Propane 0:30
- Hydrogen 1:00
- Introduction to Electric Vehicles 0:15
- Electric Vehicles 1:00
- Hybrid Electric Vehicles 0:30
- Hybrid Electric Buses 0:30
- Fuel Cell Vehicles 1:00
- Introduction to Emergency Response 0:15
- Alternative Fuel Vehicle Emergencies & Fires 1:00
- Extrication Safety & Organization 2:00
- Vehicle & Refueling Activities 4:00
### Fire Control 1: Basic Fire Chemistry (1996)

**Course:** Fire Control 1: Basic Fire Chemistry (1996)

**Hours:** 16

**Designed For:** All entry-level fire service personnel

**Description:** This course is a basic overview of fire chemistry and fire behavior designed for the beginning or a volunteer fire fighter. Includes: Classes of fire, fundamentals of heat transfer, fire characteristics of materials, products of combustion, hazardous and explosive materials, extinguishing agents, size-up, and exposure protection.

**Prerequisites:** None

**Certification:** None

**Max. Class Size:** 40

**Restrictions:** None

### FIRE CONTROL 1 COURSE OUTLINE

**Course Objectives:** To provide the student with:
- Information on how and why fires start.
- Information on how and why fires spread.
- Information on how and why fires are controlled.

**Course Content**

1. Course Introduction .............................................................. 0:30
2. Classes of Fire. ................................................................. 0:30
3. Fundamentals of Combustion .................................................. 1:00
4. Fundamentals of Heat Transfer ............................................. 0:30
5. Fundamentals of Extinguishment .......................................... 0:30
6. Fire Characteristics of Ordinary Combustible Solids .............. 0:30
7. Fire Characteristics of Flammable and Combustible Solids ........ 0:30
8. Products of Combustion....................................................... 1:00
9. Hazardous and Explosive Materials.................................... 1:00
10. Effects of Extinguishing Agent Application.......................... 1:00
11. Procedures for Size-Up ..................................................... 1:00
12. Rescue Techniques ............................................................ 1:00
13. Exposure Protection Tactics .............................................. 1:00
14. Ventilation Methods and Procedures .................................... 1:00
15. Methods Used to Confine Fire ........................................... 1:00
16. Methods Used to Extinguish Fire ....................................... 1:00
17. Methods Used to Overhaul Fire ......................................... 0:30
18. Salvage Operations ......................................................... 1:00
19. Pre-Fire Plans ............................................................... 1:00
20. Methods Used to Attain Additional Assistance During Multiple Alarm Fires ........ 0:30

Hours: 16

Designed For: All entry-level fire service personnel

Description: A hands-on course designed to provide the student with information, methods, and techniques for operating basic fire fighting tools and carrying out basic fire fighting evolutions. Areas covered include Hose, nozzles, and fittings, ground ladders, self-contained breathing apparatus, pump operations in theory, pump operations in the field, and the use of fire extinguishers.

Prerequisites: None

Certification: None

Max. Class Size: 40

Restrictions: None

Required Student Materials

FIRE CONTROL 2 COURSE OUTLINE

Course Objectives: To provide the student with...

- Information on the types of tools used for basic fire operations.
- Methods and techniques for utilizing basic fire fighting tools.
- Methods and techniques for maintaining basic fire fighting tools.
- Information and utilization of pump operations and procedures.

Course Content

Introduction to Basic Operations .......................................................... 16:00
Use of Hose Nozzle and Fittings ........................................................... 1:00
Use of Ground Ladders ................................................................. 2:30
Use of Self Contained Breathing Apparatus ........................................ 2:30
Pump Operations in Theory ............................................................... 2:30
Pump Operations in the Field ............................................................. 2:30
Use of Fire Extinguishers ................................................................. 2:30
Course: Fire Control 3A: Structural Fire Fighting in Acquired Structures (2009)

Hours: 16

Designed For: All fire service personnel

Description: This course is designed to develop fundamental skills in combating structure fires by providing the students with a thorough understanding of fire behavior, ventilation procedures and techniques, interior fire attack, and exterior fire attack. In many cases, this will be the fire fighter’s first exposure to live structural fire fighting. The structures used in class are generally donated buildings with a written agreement between the owner and the authority having jurisdiction (AHJ) specifying the live fire training that will be conducted and acknowledges the expected condition of the structure upon completion of the training.

Prerequisites: Fire Control 2 (recommended)

Certification: None

Max. Class Size: Dependent on the number of structures and size of the burn

Student/Instructor Ratio: 10:1 (Skills Proficiency)

Restrictions: This course requires both a Primary Instructor and a Senior Instructor. This course also requires a site with adequate materials and equipment to deliver the training according to the course outline.

REQUIRED STUDENT MATERIALS

- None

REQUIRED INSTRUCTOR MATERIALS

- Course Guide

Course: Fire Control 4: Controlling Ignitable Liquids and Gases (2015)

Hours: 16

Designed For: Individuals pursuing SFT Firefighter II certification

Description: This course provides the knowledge and skills that prepare a firefighter to extinguish an ignitable liquid fire, control a flammable gas fire, and develop an incident action plan for a pipeline emergency.

Prerequisites: SFT Firefighter I training (completion of education requirements)
SFT or CSTI – Fire Responder Hazmat Operational (FRO)

Certification: None

Max. Class Size: Determined by student/instructor ratio

Ratio: ∞:1 (Lecture/Activities);
      5:1 (Skills: 1 senior, 1 primary, and as many assistant instructors needed to meet the 5:1 ratio)

Restrictions: This course requires both a Primary and a Senior Instructor (Senior cannot function as both the Senior and Primary Instructor).

Other Restrictions - See Facilities, Equipment, and Personnel requirements section of the Course Plan

REQUIRED STUDENT MATERIALS

- Textbook is selected by the instructor
- Pipeline Emergencies (Noll, Gregory G., Hildebrand, Michael S., ISBN: 1-932235-08-6)

Course Objectives: To provide the student with...

- Information on organizing and equipping an airport CFR service.
- Information on procedures and techniques for CFR operations.
- The methods and techniques of utilizing CFR tools and equipment.
- Proper procedures on the maintenance and storage of CFR tools and equipment.

Course Content:

- Identify Organization of an Airport CFR System .......................................................... 0:30
- Identify Types of Specialized Tools and Equipment Used for CFR .............................. 0:20
- Utilizing Conventional Fire Apparatus and Equipment for CFR .................................. 0:20
- Identify Types of Extinguishing Agents Used for CFR ................................................. 0:30
- Identify Types of Aircraft ......................................................................................... 0:30
- Identify Safety Procedures When Working with Aircraft .......................................... 0:20
- Describe Standby Procedures for Incoming Aircraft with Possible CFR Problems .......... 0:30
- Identify Methods of Positioning Apparatus and Personnel at the CFR Scene ............... 1:00
- Operate Dry and CO2 Chemical Fire Extinguishers ................................................... 1:00
- Operate Pressurized Water Fire Extinguishers with AFFF Additive ............................. 1:00
- Operate Dry Chemical and PW with AFFF Extinguishers in Dual Agent Application ..... 1:30
- Operate Conventional and Specialized CFR Apparatus ............................................. 2:00
- Use a Refractometer to Verify Proper Foam Delivery .............................................. 0:30
- Position Apparatus for CFR Standby Position ....................................................... 2:00
- Position Apparatus at an On-Field Crash Position .................................................. 2:00
- Use Specialized CFR Apparatus to Control an On-Field Crash ............................... 4:00
Use Conventional Apparatus to Control an On-Field Crash ................................................................. 4:00
Recharge Specialized CFR Apparatus .................................................................................................... 0:30
Inspect and Maintain Specialized CFR Apparatus .............................................................................. 1:00
Store Airport CFR Apparatus ............................................................................................................. 0:30
Course Information and Required Materials

Hours: 16

Designed For: All fire service personnel

Description: This course provides information, methods, and techniques for the utilization of the California Fire and Rescue Mutual Aid Plan, Incident Command System, wildland fire fighting strategy and tactics, structure triage, terminology, survival skills and operating safely in a wildland fire-fighting incident.

Prerequisites: None

Certification: None

Max. Class Size: 40

Restrictions: None

Required Student Materials

- None

Required Instructor Materials

- Instructor Guide

Edition: 1992

Vendors: SFT

State Fire Training Website

FSTEP Curriculum Link

Course Objectives: To provide the student with...

- An overview of the California Fire and Rescue Mutual Aid Plan and their responsibilities participating in a strike team.
- Information using the ICS during emergency operations while responding as strike team.
- A variety of methods and techniques to operate in a wildland suppression effort with safety.
- An opportunity to apply major principles of strategy and tactics in wildland fire fighting operations.
- The tactics and methods to provide structure protection during wildland fire suppression.
- Wildland fire fighting survival skills for potential extreme wildland fire conditions.

Course Content

Orientation and Administration .................................................................................................................. 16:00

Wildland/Urban Interface Fire .................................................................................................................... 0:30

Concepts of ICS Organization .................................................................................................................. 1:00

State Fire and Rescue Mutual Aid Plan ...................................................................................................... 2:00

Surviving the Strike Team Response ......................................................................................................... 0:30

"Agency Specific" Strike Team Standard Operating Procedures .............................................................. 1:00

Wildland Fire Terminology ....................................................................................................................... 0:30

Factors Affecting Wildland Fires ................................................................................................................ 1:00

Defensive and Offensive Strategies in Wildland Fire Fighting ................................................................... 0:30

The Use of Direct and Indirect Attacks on Wildland Fires ......................................................................... 0:30

Structure Triage ......................................................................................................................................... 1:00

Using Structures and Vehicles for Refuge in Wildland Fires ...................................................................... 0:30

Wildland Fire Safety ................................................................................................................................... 1:00

Safety Precautions to Be Used Around Aircraft ......................................................................................... 0:30

Fundamentals of Fire Shelters ................................................................................................................... 2:00

How to Deploy Fire Shelters ...................................................................................................................... 0:30

Course Review and Evaluation .................................................................................................................. 1:30
Course: Fire Control 7: Wildland Fire Fighting  
Hours: 16  
Designed For: All fire service personnel  
Description: This course provides hands-on experience in fighting wildland or agricultural crop fires. Exercises include: Fire behavior, hand tools, helicopter support, dozer operations, mobile pumping, backfiring/burning out safety, progressive hose lays, water tender shuttle, initial attack, and wildland fire investigation.  
Prerequisites: Fire Control 6 (recommended)  
Certification: None  
Max. Class Size: 40  
Student/Instructor Ratio: 10:1 (Skills Proficiency)  
Restrictions: This course requires both a Primary Instructor and a Senior Instructor. This course also requires a site with adequate materials and equipment to deliver the training according to the course outline. A course outline must be submitted and approved by State Fire Training.

Course Information and Required Materials
January 2019

Course: Fire Fighter I (2013)
Hours: 394:30
Designed For: Entry level fire fighter
Description: This course provides the skills and knowledge needed for the entry level professional fire fighter to perform his/her duties safely, effectively, and competently. The curriculum is based on the 2013 edition of NFPA 1001 Standard for Fire Fighter Professional Qualifications, the 2012 edition of NFPA 1051 Standard for Wildland Fire Fighter Professional Qualifications, and the 2008 edition of NFPA 472 Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. The seven overarching themes of the California State Fire Fighter I curriculum are: general knowledge germane to the profession, fire department communications, fireground operations, rescue operations, preparedness and maintenance, wildland suppression activities, and hazardous materials/WMD.

Prerequisites: Minimum of Public Safety First Aid and CPR (CA Health and Safety Code 1797.182)
Corequisites: Confined Space Awareness (CA Code of Regulations, Title 8, Section 5157) Introduction to the Incident Command System (ICS-100), FEMA National Incident Management System, An Introduction (IS-700.A), FEMA

Standard: Complete all activities and formative tests. Complete all summative tests with a minimum score of 80%. Complete all mandatory skills testing.
Max. Class Size: 50
Instructor Level: Training Instructor 1A and 1B
Instructor/Student Ratio: 1:50 (Lecture); 1:10 (Skills)
Restrictions: None

Course Information and Required Materials
January 2019

Course: Fire Fighter Survival (2010)
Hours: 16
Designed For: All fire service personnel
Description: This course was developed in the continuing effort to reduce the number of fire fighter injuries and fatalities that occur on an annual basis and provides a greater understanding how to avoid committing fatal errors on the fireground. Avoiding situations that could cause you to become lost trapped, or injured is the best way to prevent tragedies at a fire scene. Topics include fire fighter survival terminology, developing a survival attitude, increasing situational awareness, and being trained in problem-solving techniques so you can become more self-reliant in an emergency. Case studies will be reviewed to outline factors common in many line-of-duty deaths (LODDs) across the nation.

Prerequisites: None
Certification: None
Max Class Size: Student/Instructor ratio is 10:1 (40 student’s maximum with four Primary Instructors)
Restrictions: This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

REQUIRED STUDENT MATERIALS
- Instructor/Student Manual (combined document) 2010 SFT
- Instructor/Student Manual (combined document) 2010 SFT

FIRE FIGHTER SURVIVAL COURSE OUTLINE
Course Objectives: To provide the student with...
- Fire fighter survival terminology.
- Knowledge of the federal government involvement to reduce fire fighter injuries and fatalities and the guidelines and laws put in place from tragic fire loss events.
- Fire fighter fatality case study recommendations to enhance fire fighter training to handle their own emergencies on the fireground.
- Techniques for developing fire fighter survival attitude and identify personal equipment that fire fighters should carry in their possession for self-preparedness measures.
- Situational awareness to prevent the fire fighter emergency and recognize critical structural fireground factors.
- Knowledge and the application of "When to call a fire fighter emergency" and emergency communications when fire fighters become lost, trapped, or disoriented inside a burning structure.
- SCBA knowledge and techniques for air awareness and SCBA air emergencies, and applying them during hands-on evolutions.

Course Content ................................................................. 16:00
Orientation and Administration ................................................................. 1:00
Developing A Survival Attitude ................................................................. 0:45
Preventing the Fire Fighter Emergency ....................................................... 0:45
The Fire Fighter Emergency ................................................................. 0:45
SCBA Emergencies ................................................................. 0:45
Fire Fighter Survival Skills ................................................................. 8:00
#1: SCBA Emergency Procedure Check
#2: Calling "Mayday"
#3: Reading Couplings
#4: Window Hang
#5: Hose Slide
#6: Emergency Ladder Escape – Hook-two/Slide-to-four Method
#7: Entanglement Emergencies – Swim or Sweep Method
#8: Entanglement Emergencies – SCBA Removal Method
#9: Wall Breach
#10: Changing Your SCBA Profile – Non-removal Method
#11: Changing Your SCBA Profile – Low or Reduced Profile (Partial-removal Method)
#12: Changing Your SCBA Profile – Zero or No Profile (Full-removal Method)

Fire Fighter Survival Evolutions
#1: SCBA Confidence Course
#2: SCBA Awareness
**Course Information and Required Materials**

January 2019

**Course: Fireline Safety Awareness for Hired Vendors (2011)**

**Hours:** 8:00

**Designed For:** Hired vendors working with CAL FIRE or USFS on any active wildland fire, including water tender operators, heavy equipment with water operators (Skidgine), dozer operators, crew bus drivers, vehicle drivers, mechanics, fallers, swampers, and chain saw operators.

**Description:** This course provides an awareness of fireline safety to hired vendors who plan to engage in wildland fire suppression and other incident support activities. Topics include current safety training, relevant policy and procedures, how to recognize and mitigate risk, and maintain safe and effective practices while working under agency supervision on an incident. Upon successful completion of training, participants will receive a course completion card valid for one (1) year from date of issue.

**Prerequisites:** None

**Certification:** None

**Max Class Size:** 40

**Restrictions:** 5:1 student/skills evaluator ratio for fire shelter deployment skill

**Training Expiration:** Valid for one (1) year from date of training

Hours: 8:00

Designed For: Fire fighters, fire service personnel, animal control officers, and law enforcement officers

Description: Fire departments are beginning to play a vital role in large animal rescues. Moreover, since these rescues can be a hazardous activity and pose a risk of serious injury or death, the safety of rescuers must be the first priority. This course provides the knowledge and skills necessary so responders can work in "concert" with each other, guided by an understanding of horse characteristics and behavior.

Prerequisites: None

Certification: None

Max Class Size: 25

Restrictions: This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

**LARGE ANIMAL RESCUE OPERATIONAL COURSE OUTLINE**

Course Objectives: To provide the student with...

- Information about large animal rescue as a technical rescue.
- Information about prey animal behavior and characteristics.
- Information and training on emergency containment of large animals.
- Information and training on scene management and large animal operations.
- Information and training on large animal rescue equipment and application.
- Information and training on horse trailers and on-road accidents.
- Information and training on rope operations and large animals.
- Information and training on hauling, lifting, and lowering large animals.
- Information and training on vertical lifting operations with large animals.
- Information and training on water rescue with large animals.

Course Content ................................................................. 8:00

Course: Low Angle Rope Rescue Operational (2007)
Hours: 24
Designed For: All fire service personnel
Description: Designed to equip the student with the techniques and methods for using rope, webbing, hardware friction devices, litters in low angle rescue situations. Areas covered include rope and related equipment, anchor systems, safety lines, stretcher lashing and rigging, mechanical advantage systems, and single-line and two-line rescue systems.

Prerequisites: None
Certification: None
Max Class Size: Student/Instructor ratio is 12:1 (48 student’s maximum with four Primary Instructors)
Restrictions: This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

Low Angle Rope Rescue Operational Instructor and Student Manual
- Edition: 2007
- Vendors: SFT Website

Low Angle Rope Rescue Operational Instructor and Student Manual
- Edition: 2007
- Vendors: SFT Website

Course Objectives: To provide the student with...

- Information on rope rescue equipment, rescue knots and hitches, anchor systems, system attachments and fall restraint, belay/safety line systems, load-releasing devices.
- Methods and techniques used to inspect and maintain rescue rope, webbing, and hardware.
- Methods and techniques to tie knots and package victims and rescuers.
- Methods and techniques for using rescue equipment to build lower/raise systems.
- Information on rescue scene organization and management.
- An opportunity to demonstrate and apply basic low angle rope rescue techniques.
- Optional information on litter walkouts and ladder systems used in low angle rope rescue operations.

Course: Motion Picture/Television – Fire Safety Officer (2012)

Hours: 24

Designed For: Fire prevention, suppression and investigation officers, special effects technicians, film production safety coordinators, stunt coordinators, line producers, directors, location managers, film commissioners, insurance risk managers and other governmental officials who interact with the entertainment industry in a safety capacity.

Description: This course provides the student with a basic knowledge of film production fire safety, both on the studio lot and location filming. Areas covered include: filming and fire code permits, licensing, safety officer responsibilities, who's who on location, fire safety hazards associated with lighting, generators, electrical cabling, set construction, studio and warehouse filming, pyrotechnic special effects laws and regulations (handling, use, storage and transportation) and stunt safety.

In addition, the training incorporates live pyrotechnic special effects and stunt demonstrations, special guest speakers, product orientation and slides and videos from many different films.

Prerequisites: None

Max. Class Size: 75

Restrictions: This course is scheduled and taught by OSFM Fire Engineering – Fireworks Program staff experienced with Motion Picture/Television only.

REQUIRED STUDENT MATERIALS

- Filming in California 2012 OSFM-MP&E
- Fireworks in California 2011 OSFM-MP&E

REQUIRED INSTRUCTOR MATERIALS

Filming in California 2012 OSFM-MP&E

Instructor Guide 2012 OSFM-MP&E

VENDORS

OSFM Fire Engineering – Motion Picture & Entertainment Safety

MOTION PICTURE/TELEVISION – FIRE SAFETY OFFICER COURSE PLAN

Course Objectives: To provide the student with...

- Provide students with the knowledge, skills and abilities to recognize common and special hazards in the filming industry and enforce fire prevention laws and regulations while assigned to filming locations.
- Provide students with information about the role of the fire department while assigned to filming locations.
- Provide a level of enforcement consistency from jurisdiction to jurisdiction when assigned to filming locations.
- Provide the Filming Industry and the People of the State a safe environment when production companies are filming on location.

Course Information and Required Materials
January 2019

Course: Open Water Rescuer – Basic (2014)
Hours: 24
Designed For: Rescue/Firefighting
Description: This course provides detailed information, and the skills training required, to improve an individual’s level of comfort and confidence for safely and proficiently performing contact rescues in static and surf water conditions. Safety is strongly emphasized throughout the class. Risk management is reinforced during every skill to establish your level of comfort in the water and to identify and overcome your limitations. The emphasis on risk management helps you determine if your actions meet your agencies SOPS/SOGS in the determination of a rescue being a “offensive” or “defensive” operation. Swimming, stroke technique and body positioning in the water are covered. “In water” skills for students include how to read and understand water flow, reading and understanding surf, contact rescues using rescue buoy devices and boards, dealing with combatant victims, performing self-rescues, and rescues of multiple victims both conscious and unconscious. The entire course meets the requirements of swimming contact rescue of NFPA 1670 and NFPA 1006 Chapter 11, sections 11.2, Chapter 15, sections 15.2.

Prerequisites: It is recommended that the AHJ devise or adopt a minimum swim capability standard based on the response area needs. A realistic evaluation of the rescuer’s water survival skills should be conducted by the AHJ to meet this requirement. It is recommended that the AHJ use an annual swim test standard that meets or exceeds the International Association of Dive Rescue Specialists (IADRS) Annual Watermanship Test.

Certification: None
Standard: 80%
Class Size: 32 participants maximum, 8:1 student/Instructor ratio
Restrictions: This course requires appropriate fitness and ability to complete the AHJ swim standard or the recommended NFPA, IADRS Watermanship swim test.

### OPEN WATER RESCUE COURSE PLAN

---

Fire Fighting/Rescue Courses

68

Hours: 16

Designed For: Water rescue personnel

Description: This course provides the skills needed to operate a personal watercraft (PWC) and perform rescue in river and flood situations. Safety, course philosophy, and PWC terminology are covered. "In water" experiences for students include how to read dynamics flow for safety travel, perform self-rescue and victim-rescue operations, along with executing pre/post-inspections of the PWC.

Prerequisites: River and Flood Water Rescue

Certification: None

Max Class Size: 25

Restrictions: This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

Required Student Materials

- None

Required Instructor Materials

- Instructor Guide

Edition: 1996

Vendors: SFT

PERSONAL WATERCRAFT RESCUE OPERATIONS COURSE OUTLINE

Course Objectives: To provide the student with...

- Information on the codes and regulations that impact personal watercraft operations.
- A thorough knowledge of personal watercraft operations.
- A strong working knowledge of personal watercraft operations in both static and dynamic water.
- Information on performing inspections and maintaining personal watercraft.
- An opportunity to apply their knowledge through demonstrations.

Course Content

- Personal Watercraft Safety Training
- Philosophy of Personal Watercraft Use
- Orientation and Terminology of Personal Watercraft
- Performing Pre-operation Inspections
- Launching Personal Watercraft
- Rescuer Mounts for Personal Watercraft
- Methods for Reading Rivers
- Traveling in Dynamic Water
- Hovering and Ferrying a Personal Watercraft
- Righting a Tipped Personal Watercraft
- Serving a Flooded Personal Watercraft
- Shoring a Personal Watercraft
- Performing a Rope Crossing
- Performing a Victim Pickup with a Rescue Litter
- Performing a Victim Pickoff
- Trailering a personal Watercraft
- Placing a Personal Watercraft Back In-service
- Performing Daily and Weekly Checks on Personal Watercraft
- Course Review and Final Exam

Total Hours: 16:00

- Personal Watercraft Safety Training: 1:30
- Philosophy of Personal Watercraft Use: 0:30
- Orientation and Terminology of Personal Watercraft: 1:00
- Performing Pre-operation Inspections: 0:30
- Launching Personal Watercraft: 0:30
- Rescuer Mounts for Personal Watercraft: 0:30
- Methods for Reading Rivers: 1:00
- Traveling in Dynamic Water: 1:00
- Hovering and Ferrying a Personal Watercraft: 0:30
- Righting a Tipped Personal Watercraft: 1:00
- Serving a Flooded Personal Watercraft: 1:00
- Shoring a Personal Watercraft: 0:30
- Performing a Rope Crossing: 1:00
- Performing a Victim Pickup with a Rescue Litter: 1:00
- Performing a Victim Pickoff: 1:00
- Trailering a personal Watercraft: 0:30
- Placing a Personal Watercraft Back In-service: 1:00
- Performing Daily and Weekly Checks on Personal Watercraft: 0:30
- Course Review and Final Exam: 1:30
Course: Photovoltaic Training (2010)
Hours: 8

Designed For: All fire service personnel

Description: This course is designed specifically to provide fire protection and fire prevention personnel with background information regarding photovoltaic technology so that they can make informed decisions at the scene of an emergency or in the plan review and construction inspection of photovoltaic system installation.

Prerequisites: None
Certification: None

Standard: OSFM (2010); Fire Operations for Photovoltaic Emergencies Handbook
Max. Class Size: 30
Restrictions: None

### REQUIRED STUDENT MATERIALS

- Fire Operations for Photovoltaic Emergencies Handbook 2010 SFT Website

### PHOTOVOLTAIC COURSE OUTLINE*

Course Objectives:
- Have a working knowledge of a Photovoltaic System
- Be able to identify component parts of a Photovoltaic System
- Identify and mitigate potential hazards
- Identify occupancies and locations for Photovoltaic Systems
- Perform size-up and develop response strategies and tactics

Unit 1: Course Introduction ............................................................................................................................ 0:30
Unit 2: Photovoltaic History, Distribution and regulation .............................................................................. 1:00
Unit 3: Photovoltaic Components; Modules, Wiring and Inverters ................................................................ 1:00
Unit 4: Photovoltaic Operation and Tactical Considerations ............................................................................ 2:00
Unit 5: Residential and Suburban Applications ............................................................................................... 1:00
Unit 6: Large and Small Commercial Applications .......................................................................................... 1:00
Unit 7: Battery Hazards for Off-Grid Systems ................................................................................................ 1:00
Unit 8: Photovoltaic Technologies Underdevelopment ..................................................................................... 0:30
Course Hours ...................................................................................................................................... 8:00

*This is an abbreviated Course Plan. Terminal & Enabling Learning Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: http://osfm.fire.ca.gov/divisions/state-fire-training/fstep-curriculum/
Course: RIC Operations (2011)

Hours: 24

Designed For: All fire service personnel

Description: The Rapid Intervention Crew Operations course trains fire fighters to rescue a downed fire fighter in an immediately dangerous to life and health environment in the continuing effort to reduce the number of fire fighter injuries and deaths that occur regularly. Students train using evolutions and scenarios based off tragedies suffered by fellow fire fighters from departments across the country. Students receive information on how to locate and use these LODD studies as training and prevention tools throughout their careers.

The course focuses on the three phases of a RIC operation: 1) predeployment, 2) deployment, and 3) rescue. During the class, you will also gain a greater understanding of RIC operations terminology and the RIC mindset.

Prerequisites: Fire Fighter I training, Fire Fighter Survival or IAFF course Fire Ground Survival.

Certification: None

Max Class Size: Student/Instructor ratio is 10:1 (40 student’s maximum, with four Primary Instructors)

Restrictions: This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

**RIC OPERATIONS COURSE OUTLINE**

Course Objectives: To provide the student with...

- Rapid intervention crew terminology.
- Fire fighter fatality case study recommendations to enhance rapid intervention crew training to handle fire fighter emergencies on the fireground.
- Techniques and training in developing the "RIC mindset" and steps taken before a RIC deployment occurs (predeployment) to increase the chances of a successful outcome.
- Techniques and training in conducting a RIC deployment, including search operations and thermal imaging.
- Techniques and training in conducting rescue operations once a downed fire fighter is located, including assessment and extrication from the structure.

Course Content ............................................................................................................................................. 24:00

- Orientation and Administration ............................................................................................................. 1:00
- The RIC Mindset ................................................................................................................................. 0:45
- Predeployment Concepts ..................................................................................................................... 0:45
- Deployment Concepts ......................................................................................................................... 0:45
- Rescue Operations ............................................................................................................................. 0:45
- RIC Operation Skills ......................................................................................................................... 12:00

- #1: Size-up and Assemble A Mobile Tool Cache
- #2: Downed Fire Fighter Assessment
- #3: RIC Air Delivery
- #4: Search Line Deployment
- #5: Dragging A Downed Fire Fighter, One Rescuer
- #6: Dragging A Downed Fire Fighter
- #7: Packaging and Moving a Downed Fire Fighter Utilizing Rescue Loops
- #8: Packaging and Moving a Downed Fire Fighter Utilizing a Drag Sled
- #9: Packaging and Moving a Downed Fire Fighter Utilizing a Mast
- #10: Dragging A Downed Fire Fighter Down Stairs
- #11: Dragging A Downed Fire Fighter Up Stairs
- #12: Feet-first Ladder Carry
- #13: Seated Ladder Carry with SCBA Removal
- #14: Head-first Ladder Carry
- #15: Rescue from A Confined Area
- #16: Rescuing a Conscious and Uninjured Fire Fighter Through the Floor – Hose Method
- #17: Rescuing a Conscious and Injured Fire Fighter Through the Floor – Hose Method
- #18: Rescuing an Unconscious Fire Fighter Through the Floor – Hose Method
- #19: Rescuing A Downed Fire Fighter Through the Floor – Rope Method

**RIC Operations Evolutions**

- #1: Pittsburg Evolution
- #2: Tarver Evolution
- #3 and #4: Scenario-based Site-specific Evolutions

---

**Course Information and Required Materials**

January 2019
Hours:          24
Designed For:  Water rescue personnel
Description:   This course provides the skills needed to operate a rescue boat and perform rescue in river and flood situations. Safety, course philosophy, and terminology are covered. "In water" experiences for students include how to read dynamics flow for safety travel, perform self-rescue and victim-rescue operations, along with executing pre/post-inspections of the PWC.
Prerequisites: River and Flood Water Rescue
Certification:  None
Max Class Size: 25
Restrictions:  This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

RESCUE BOAT OPERATIONS COURSE OUTLINE

Course Objectives: To provide the student with...
- Information on the codes and regulations that impact rescue boat operations.
- A strong working knowledge of rescue boat operations in both static and dynamic water.
- Information on performing inspections and maintaining rescue boats.
- An opportunity to apply their knowledge through demonstrations.

Course Content ............................................................................................................................................. 24:00
- Rescue Boat Safety Training. ..................................................................................................................... 1:00
- Philosophy of Rescue Boat Use. ............................................................................................................... 0:30
- Rescue Boat Types, Uses, and Limitation. ............................................................................................... 1:00
- Recognized Standard Set-up for an IRB. ................................................................................................. 1:00
- Methods of Reading Rivers. .................................................................................................................. 1:00
- Traveling in Dynamic Water. ................................................................................................................... 1:30
- Operational Terminology. ....................................................................................................................... 1:00
- IRB Crew Positions. ................................................................................................................................. 0:30

**River and Flood Water Rescue Course Outline**

Course Objectives: To provide the student with...
- Basic rescue techniques to water rescue problems.
- Information on the special hazards and problems in swift water rescue.
- Basic skills to make safe moving water rescues.
- Skills in rope handling, rigging, and repelling.

Course Content .......................................................... 16:00
- Introduction ................................................................. 0:30
- Cold Water Emersion, Hypothermia, and Mammalian Reflex ......................................................... 0:30
- White Water Regarding Body Surfing, Boat Handling, and Shallow Water Crossing ....................... 1:00
- Introduction to Vertical Rescue ........................................ 1:00
- How to Tie Rescue Knots ................................................ 1:00
- Field Exercises ......................................................... 3:00
- Water Briefing ............................................................ 0:30
- Field Exercises with the Tyrollian Line ......................... 2:00
- Field Exercises with Water Crossing Techniques ................ 2:00
- Waterside Briefing ..................................................... 0:30
- Rescue Simulations ..................................................... 4:00

Hours: 6

Designed For: All fire service personnel

Description: This course provides information on the growing problem of scrap tire storage throughout California. Topics include: History, chemical compounds, sources of ignition, codes and regulations, ground rubber operations and hazards, pre-incident planning of outdoor tire storage yards, tire fire behavior, and hazardous materials response.

Prerequisites: None

Certification: None

Max. Class Size: 40

Restrictions: None

**TIRE FIRE PREVENTION AND SUPPRESSION COURSE OUTLINE**

Course Objectives: To provide the student with...

- Information on the background and history of the scrap tire industry.
- Information on chemical compounds used in tire manufacturing.
- Information on traditional sources of ignition.
- Information on the current codes and regulations.
- Information on ground rubber operations and hazards.
- Pre-incident planning of outdoor tire storage yards.
- Information on tire fire behavior.
- Information on hazardous materials response.

Course Content: 6:00

- Introduction: Defining the Problem: 0:30
- Tire History: 0:30
- Tire Markets: 0:30
- Tire Storage: 0:30
- Sources of Ignition: 0:30
- Codes and Regulations: 1:00
- Ground Rubber: 0:30
- Preplanning: 0:30
- Fire Behavior: 0:30
- Hazardous Materials Response: 1:00
Course: Trench Rescue

Hours: 16

Designed For: All fire service personnel

Description: This course is designed to train fire service personnel in hands-on application of the techniques necessary to safely affect a rescue from an excavation or trenching cave-in. Topics include: Critical considerations while responding to trenching emergencies, evaluation of cave-in scenes, basic life support procedures and temporary protection for victims, specialized tool usage, shoring techniques, and below grade rescue safety procedures.

Prerequisites: None

Certification: None

Max. Class Size: 40

Student/Instructor Ratio: 10:1 (Skills Proficiency)

Restrictions: This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

**TRENCH RESCUE COURSE OUTLINE**

Course Objectives: To provide the student with...

- Information on the common causes for trench collapse.
- Information on the personal safety equipment used for trench rescues.
- Techniques for using scene safety equipment.
- The procedures for placing edge protection to make the lip of the trench safe.
- The procedures for sheeting and shoring.
- Different methods for removing victims from a trench.
- Techniques for safely removing tools and equipment from a trench.
- An opportunity to demonstrate and apply trench rescue techniques.

Course Content ............................................................................................................................................. 16:00

- Introduction
- The Law
- Confined Space Regulations
- Soil Analysis
- Types of Trenches and Collapse Patterns
- Emergency Rescue
- Guide Making the Trench Safe

Vehicle Extrication Course Outline

Unit 1: Introduction
- Topic 1-1: Orientation and Administration

Unit 2: Vehicle Extrication
- Topic 2-1: Planning for and Sizing Up a Vehicle Incident
- Topic 2-2: Establishing Scene Safety Zones
- Topic 2-3: Establishing Fire Protections
- Topic 2-4: Stabilizing a Common Passenger Vehicle
- Topic 2-5: Isolating and Managing Energy Sources
- Topic 2-6: Determining Passenger Vehicle Access and Egress Points
- Topic 2-7: Creating Access and Egress Openings for Rescue
- Topic 2-8: Disentangling Victims
- Topic 2-9: Removing a Packaged Victim to a Safe Area
- Topic 2-10: Terminating a Vehicle Incident

*This is an abbreviated Course Plan. Terminal & Enabling Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: FSTEP Curriculum Link*
HAZARDOUS MATERIALS FIRST RESPONDER AWARENESS LEVEL COURSE OUTLINE

Course Objectives: To provide the student with...
- Information on hazardous materials relevant to the risks and negative outcomes hazardous materials events/incidents present.
- Methods and procedures to identify a hazardous materials event/incident.
- With methods and procedures to isolate a hazardous materials event/incident and make proper modifications to mitigate an event/incident.
- Information on safety and hazard assessment techniques when dealing with a hazardous materials event/incident.
- A tabletop exercise to apply the information provided in this course.

Course Content ................................................................. 8:00
- Course Orientation and Administration ................................................................. 0:30
- Introduction to Hazardous Materials at the Awareness Level ................................. 1:00
- Hazardous Materials Recognition and Safety .......................................................... 1:30
- Safety, Isolation, and Notifications ........................................................................... 1:00
- Basic Command, IDHA, and Action Plans ............................................................... 1:30
- First Responder Exercise ....................................................................................... 1:30

**Advanced All-Hazards Incident Management Course Outline**

**Unit 1 Course Introduction** .......................................................... 1:00  
**Scope Statement:** The Scope of this Unit is to provide a description and overview of the course, define TLO, define ELO and provide students with the course expectations and evaluation process. During this Unit, students will be introduced to the instructors, provide an introduction of themselves, and learn the layout of the classroom and facilities.

**Unit 2 Agencies, Entities and Plans** .............................................. 4:00
ADVANCED ALL-HAZARDS INCIDENT MANAGEMENT COURSE OUTLINE

Scope Statement: The scope of this Unit will be to provide the student with information regarding: Agencies, entities, and plans that may need to be accessed and engaged in order to mitigate incidents. Agencies and entities may bring jurisdictional considerations, and resources which could be required to deal with incidents.

Unit 3 Command and Coordination ................................................................................................................................................. 2:30
Scope Statement: Students will be provided information on the interactions that occur with IMT’s and various levels of coordinating and directing organizations which may be instituted at a higher-level command authority. These organizations may occur at the Federal, State, and Local levels of government.

Unit 4 Scenario - Transportation ......................................................................................................................................................... 8:00
Scope Statement: This will be a five- to six-hour exercise that will allow the students to utilize lessons learned in previous Units. The IMT’s will develop a plan and provide solutions to a transportation scenario provided by the instructional staff. The intent of this scenario is to utilize tools that have been provided to demonstrate an ability to coordinate with agencies at the Federal, State, and Local levels.

Unit 5 Safe Management of Incident Resources ................................................................................................................................. 2:30
Scope Statement: The scope of this Unit includes tools and information that IMT’s can utilize to identify and mitigate safety issues. Students will learn to address long duration assignments, tragedy and high stress situations. The team will be provided information to form a basis for making sound decisions to conduct safe incident operations.

Unit 6 Incident management Team Challenges ....................................................................................................................................... 3:00
Scope Statement: In this Unit, teams will be provided with information to identify challenges that can impact a team and potential strategies to address them.

Unit 7 Incident Management Assistance Team (IMAT) .............................................................................................................................. 2:00
Scope Statement: IMAT’s are quite often called upon to assist and instruct other agencies in the management of incidents under their jurisdiction. This presents unique challenges in that IMAT’s are placed in an advisory capacity with no delegated authority.

Unit 8 Scenario- Public Health ................................................................................................................................................................. 8:00
Scope Statement: This will be a five- to six-hour exercise that will allow the students to utilize lessons learned in previous Units. They are expected to interact with simulated served agency personnel during a public health pandemic. The team is not from the requesting entity.

Unit 9 Volunteers and Donations .......................................................................................................................................................... 2:30
Scope Statement: Students will be provided information on the importance of volunteer organizations, their response to incidents and how best to utilize volunteers to support personnel and the public. Additional Information addresses the spontaneous volunteer, people who just show up and want to help.

Unit 10 External influences ............................................................................................................................................................... 3:00
Scope Statement: This Unit will provide the students with information which will help them to identify and manage external influences. These influences may include issues related to: governmental agencies, special interest groups, industrial groups, political issues, the media, and situations where agencies and entities have conflicting primary, secondary, and/or parallel responsibilities.

Unit 11 Fiscal Considerations .............................................................................................................................................................. 1:00
Scope Statement: The students will be provided information which will assist them in identifying and finding potential solutions to complex or unfamiliar financial issues such as: Who has the authority to encumber funds? Who establishes the accounting systems to track and project costs? What is the fiscal effect of emergency declarations?

Unit 12 Final Written Exam ................................................................................................................................................................. 2:30
Scope Statement: The summative exam covers all the AAIM material presented up to this point.
Unit 13 Scenario- Natural Disaster ........................................................................................................................................7:00

Scope Statement: This will be a five- to six-hour exercise which will provide the students with a natural disaster scenario that incorporates all lessons from throughout the course. This will be the final scenario and will be weighted more heavily in the grading.

Unit 14 Course Critique / Team Evaluations / Closeout ............................................................................................................. 1:00

Course Hours ................................................................................................................................................................................. 48:00

*This is an abbreviated Course Plan. Terminal and Enabling Learning Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: http://osfm.fire.ca.gov/divisions/state-fire-training/fstep-curriculum/

Hours: 12-16

Designed For: First line supervisors, single resource bosses, lead dispatchers, field supervisors, company officers, and entry level positions (trainees) on incident management teams

Description: This course introduces students to the principles of the Incident Command System (ICS) associated with incident-related performance. Topics include leadership and management, delegation of authority and management by objectives, functional areas and positions, briefings, organizational flexibility, transitions and transfers.

Prerequisites: None.

Certification: Not Applicable

Class Size: 40

Restrictions: None

**Course Information and Required Materials**

January 2019

**Course:** I-400: Advanced ICS (2006)

**Hours:** 16

**Designed For:** Senior personnel expected to perform in a management capacity in an area command/complex incident environment

**Description:** This course directs the student towards an operational understanding of large single-agency and complex multi-agency/multi-jurisdictional incident responses. Topics include fundamentals review for command and general staff, major and/or complex incident/event management, area command, and multi-agency coordination.

**Prerequisites:** I-300 Certification

**Certification:** Not Applicable

**Class Size:** 40

**Restrictions:** None

**I-400 Course Plan**

Course information can be found on the link above
### S-130: Fire Fighter Training (2003)

- **Hours:** 30-35½
- **Designed For:** Entry-level firefighters.
- **Description:** This course is designed to provide entry-level firefighters skills. Many of the units are set up so they can be taught in either the classroom or the field; field time is encouraged. A version of L-180, Human Factors on the Fireline, has been included as part of this course.
- **Prerequisites:** S-190
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-131: Fire Fighter Type 1 Training (2004)

- **Hours:** 8
- **Designed For:** Fire Fighter Type 1 (FFT1)
- **Description:** This course meets the training needs of the Fire Fighter Type 1 (FFT1) and is interactive in nature. Topics include fireline reference materials, communications, and tactical decision-making.
- **Prerequisites:** Qualified as a Fire Fighter Type 2 (FFT2)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

- **Hours:** 6-8
- **Designed For:** Entry-level fire fighters
- **Description:** This course provides instruction in the primary factors affecting the start and spread of wildfire and recognition of potentially hazardous situations. S-190 is typically taught in conjunction with or prior to Basic Fire Fighter Training, S-130. It is designed to meet the fire behavior training needs of a Fire Fighter Type 2 (FFT2) on an incident as outlined in the PMS 310-1, Wildland Fire Qualification System Guide and the position task book developed for the position.
- **Prerequisites:** None
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-200: Initial Attack Incident Commander (2007)

- **Hours:** 16
- **Designed For:** Personnel desiring to be qualified as an (ICT4)
- **Description:** This course is designed to meet the training needs of the Incident Commander Type 4. The six units cover: foundation skills, intelligence gathering and documentation, size-up, developing a plan of action, post-fire activities, evaluating incident objectives, and managing the incident. Evaluation of the student is by unit tests and performance based evaluations.
- **Prerequisites:** Qualified as a Single Resource Boss
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-203: Introduction to Incident Information (2008)

- **Hours:** 30
- **Designed For:** Personnel desiring to be qualified as Public Information Officer (PIOF)
- **Description:** Receive the skills and knowledge needed to serve as a public information officer. Topics
include establishing/maintaining an incident information operation, communicating with internal/external audiences, working with the media, handling special situations, and long-term planning/strategy.

**Prerequisites:** None  
**Certification:** None  
**Class Size:** 40  
**Restrictions:** None

**Hours:** 24-36  
**Designed For:** Individuals desiring to be qualified as Fire Fighter Type 1 (FFT1), Incident Commander Type 5 (ICT5) or Felling Boss (FELB)  
**Description:** This course introduces the function, maintenance and use of internal combustion engine powered chain saws, and their tactical wildland fire application. Field exercises support entry-level training for fire fighters with little or no previous experience in operating a chain saw, providing hands-on cutting experience in surroundings similar to fireline situations.

**Prerequisites:** Qualified as a Fire Fighter Type 2 (FFT2)  
**Certification:** None  
**Max Class Size:** Ratio: 10:1 (Skills Proficiency)  
**Restrictions:** This course requires a site with adequate materials and equipment to deliver the training according to the course outline.

**Hours:** 28-32  
**Designed For:** Wildland Fire Agencies: Required for Initial Attack Incident Commander Type 4 (ICT4) and Strike Team Leader (tractor/plow, dozer, engine, or crew).  
**Structural Fire Departments:** Engine operators, chief officers, and company officers responsible for structure protection in suburban/urban interface areas that may be threatened by wildland fire.  
**Description:** Designed to assist structure and wildland fire fighters who will be making tactical decisions when confronting wildland fire that threatens life, property, and improvements, in the wildland/urban interface. Topics include: interface awareness, size-up, initial strategy and incident action plan, structure triage, structure protection tactics, incident action plan assessment and update, follow-up and public relations, and fire fighter safety in the interface. If the optional exercises at the end of the tactics unit are used or a field exercise is included additional course time is needed. Instructors are encouraged to extend the course to 32 hours and add a field exercise covering size-up, structure triage, tactics, and any other local area training as appropriate.

**Prerequisites:** Wildland Fire Agencies: Qualified as a Fire Fighter Type 1 (FFT1)  
**Certification:** None  
**Class Size:** 40  
**Restrictions:** None

### S-219 Firing Operations (2014) (formerly S-234)

**Hours:** 16  
**Designed For:** Personnel desiring to be qualified as Firing Boss (FIRB)  
**Description:** This course introduces the roles and responsibilities of a Firing Boss (FIRB), common firing devices, and general firing operations and techniques. Although comprehensive in nature, the coursework is not a substitute for the dynamic fire environment. The course provides students with important information concerning general tasks required to be successful.
Any opportunity to show students a small-prescribed burn or demonstrate how devices operate in the field will promote transferring these new skills to the job. Due to the wide variety and capabilities of sponsors presenting this course, the field exercise portion of the class is not defined. Therefore, the cadre and sponsoring unit are responsible for planning field exercises and demonstrations in accordance with their capabilities.

- **Hours:** 24
- **Designed For:** Personnel desiring to be qualified as an Engine Boss (ENGB)
- **Description:** Training for the single resource boss position from initial dispatch through demobilization to the home unit. Topics include operational leadership, preparation and mobilization, assignment preparation, risk management, entrapment avoidance, safety and tactics, offline duties, demobilization, and post incident responsibilities.
- **Prerequisites:** S-290
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

**S-231: Engine Boss (2004)**

- **Hours:** 12-16
- **Designed For:** Personnel desiring to be qualified as an Engine Boss (ENGB)
- **Description:** Designed to produce student proficiency in the performance of the duties associated with ENGB. Topics include engine and crew capabilities and limitations, information sources, fire size-up considerations, tactics, and wildland/urban interface.
- **Prerequisites:** S-230 and qualified as a Fire Fighter Type 1 (FFT1)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

**S-234 Ignition Operations (2009)**

- **Hours:** 16
- **Designed For:** Personnel desiring to be qualified as Firing Boss (FIRB)
- **Description:** This course introduces the roles and responsibilities of a Firing Boss (FIRB), common firing devices, and general firing operations and techniques. Although comprehensive in nature, the coursework is not a substitute for the dynamic fire environment. The course provides students with important information concerning general tasks required to be successful. Any opportunity to show students a small-prescribed burn or demonstrate how devices operate in the field will promote transferring these new skills to the job. Due to the wide variety and capabilities of sponsors presenting this course, the field exercise portion of the class is not defined. Therefore, the cadre and sponsoring unit are responsible for planning field exercises and demonstrations in accordance with their capabilities.
- **Prerequisites:** S-290
- **Certification:** None
- **Class Size:** Ratio: 10:1 (Skills Proficiency)
- **Restrictions:** This course requires a site with adequate materials and equipment to deliver the training according to the course outline.
SC-244: Field Observer (2007)

- **Hours:** 20
- **Designed For:** Personnel desiring to be qualified as a Field Observer (FOBS) and/or Fire Effects Monitor (FEMO)
- **Description:** This course provides the student with the skills necessary to perform as a field observer (FOBS) and/or a fire effects monitor (FEMO). Topics include roles and responsibilities of the FOBS and FEMO; how to make observations and document those observations; how to produce hand drawn and GPS field maps; and how to navigate using a compass and GPS. The navigation unit has 4½ hours of field exercises and the final field exercise is 8 hours.
- **Prerequisites:** Successful completion of the precourse work
  - Ability to use a GPS receiver
  - FOBS: Qualified as a Single Resource Boss
  - FEMO: Qualified as a Fire Fighter Type 2 (FFT2)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

SC-245: Display Processor (2007)

- **Hours:** 8
- **Designed For:** Personnel desiring to be qualified as a Display Processor (DPRO)
- **Description:** This course provides students with the skills necessary to perform as a Display Processor (DPRO). Topics include general roles and responsibilities and how to assist the situation unit leader with producing incident maps, inputs for the Incident Status Summary (ICS-209) and other incident products. The final exam is 3 hours.
- **Prerequisites:** Successful completion of the precourse work
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

- **Hours:** 16
- **Designed For:** Single Resource Boss, Incident Commander Type 4 (ICT4), and Support Dispatcher (EDSD)
- **Description:** This course covers aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. Note: the regulations, procedures, and policies addressed in this course are primarily those governing federal agency and ICS operations. State, county, or other political subdivisions using this course will need to consult their agency having jurisdiction with respect to regulations, procedures, and policies.
- **Prerequisites:** None
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

- **Hours:** 32
- **Designed For:** Personnel desiring to be qualified as any Single Resource Boss or Fire Effects Monitor (FEMO)
- **Description:** This is a classroom-based skills course designed to prepare the prospective fireline supervisor to undertake safe and effective fire management operations. It is the second course in a series that collectively serves to develop fire behavior prediction knowledge and skills. Fire environment differences are discussed as necessary; instructor should stress local conditions.
### S-300: Extended Attack Incident Commander (2008)

- **Hours:** 16
- **Designed For:** Personnel desiring to be qualified as an Incident Commander Type 3 (ICT3)
- **Description:** The focus is on leadership and command as they relate to the ICT3 position and presented in participative lecture format with multiple tactical decision games for students to practice new knowledge. The seven instructional units cover: foundational skills, situational awareness, command and control, managing the incident, transitional activities, post-fire activities, and final simulation. There is also an optional staff ride activity (Unit 8) if instructors choose to include it.

- **Prerequisites:** Successful completion of the precourse work
  - Qualified as an Incident Commander Type 4 (ICT4) and Task Force Leader (TFLD)
  - or
  - Qualified as an Incident Commander Type 4 (ICT4), Strike Team Leader (TFLD), and any two Single Resource Boss positions – one must be Crew (CRWB) or Engine (ENGB)

- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

- **Hours:** 24
- **Designed For:** Personnel desiring to be qualified as a Task Force Leader (TFLD) or any Strike Team Leader (STPL, STDZ, STEN, or STCR)
- **Description:** Designed to meet the training requirements outlined in the Wildland Fire Qualification System Guide and the Position Task Books (PTB) developed for the positions of Task Force Leader and Strike Team Leader and specific to wildland fire suppression. If students are expected to perform in some other risk area, exercises and examples appropriate to the expected risk should be added.

- **Prerequisites:** Successful completion of the precourse work
  - Qualified as any Single Resource Boss

- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

- **Hours:** 24-32
- **Designed For:** Experienced Single Resource Bosses and Initial Attack Incident Commanders
- **Description:** Designed to meet training requirements in the Operations Section of the ICS and is specific to wildland fire suppression. This course prepares experienced Single Resource Bosses and Initial Attack Incident Commanders in the tactics necessary at the Strike Team/Task Force Leader level. It is also valuable for Operations Supervisors qualified at higher management levels who have not received training in wildfire suppression tactics.

- **Prerequisites:** Qualified as a Single Resource Boss or Initial Attack Incident Commander Type 4 (ICT4)

- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None
Course Information and Required Materials
January 2019

ICS All Hazard Courses  93

S-346: Situation Unit Leader (2008)
Hours: 18-24
Designed For: Personnel desiring to be qualified as Situation Unit Leader (SITL).
Description: The course starts with how to activate, setup, organize, manage, and demobilize a situation unit. It then addresses the products (maps, ICS-209, and other reports) the unit produces, as well as the technology needed to produce the products.
Prerequisites: Successful completion of the precourse work
Qualification: as any Strike Team Leader or Incident Commander Type 4 (ICT4)
Certification: None
Class Size: 40
Restrictions: None

S-349: Resources Unit Leader/Demobilization Unit Leader (2008)
Hours: 28-32
Designed For: Personnel desiring to be qualified as Resources Unit Leader (RESL) and/or Demobilization Unit Leader (DMOB)
Description: Training begins with a discussion on unit activation and management. Topics include RESL responsibilities related to resource status systems, planning process, and resource products/outputs and DMOB responsibilities for developing and implementing the demobilization plan.
Prerequisites: Successful completion of the precourse work and test
Basic knowledge of current automated resource status system, such as I-Suite Qualified as a Status/Check-in Recorder (SCKN)
Certification: None
Class Size: 40
Restrictions: None

Hours: 16
Designed For: Personnel desiring to be qualified as a Ground Support Unit Leader (GSUL)
Description: Managing the transportation plan, maintenance, and related services at an incident. Topics include gathering assignment information; organizing, staffing, and laying out the unit; field inspection of equipment; operation and coordination with other units, and demobilization.
Prerequisites: Qualified as an Equipment Manager (EQPM)
Certification: None
Class Size: 40
## Course Information and Required Materials

**January 2019**

### S-356: Supply Unit Leader (2001)

- **Hours:** 16
- **Designed For:** Personnel desiring to be qualified as a Supply Unit Leader (SPUL)
- **Description:** Training on the duties of a Supply Unit Leader and managing the incident supply unit.
- **Prerequisites:** Qualified as an Ordering Manager (ORDM) Qualified as a Receiving/Distribution Manager (RCDM)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-358: Communications Unit Leader (2008)

- **Hours:** 24
- **Designed For:** Personnel desiring to be qualified as a Communications Unit Leader (COML)
- **Description:** This course is designed to provide skills and knowledge needed to perform in the role of Communications Unit Leader. Topics include mobilization, establishing the communications unit, communications system design and ordering, communications system installation and maintenance, communications equipment assignment and accountability, incident communications center, internal and external coordination, demobilization, and current communications issues and technology.
- **Prerequisites:** Qualified as an Incident Communications Technician (COMT) Qualified as an Incident Communications Center Manager (INCM)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-359: Medical Unit Leader (2000)

- **Hours:** 20
- **Designed For:** Personnel desiring to be qualified as a Medical Unit Leader (MEDL)
- **Description:** This course is designed to provide the skills and knowledge needed to perform in the role of Medical Unit Leader. Topics include gathering information, organizing the medical unit, supervising the unit, evaluation, documentation, and demobilization.
- **Prerequisites:** Prior or current certification as an Emergency Medical Technician or equivalent
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-360: Finance/Administration Unit Leader (2001)

- **Hours:** 32
- **Designed For:** Personnel desiring to be qualified as a Procurement (PROC), Cost (COST), Time (TIME), and/or Compensation/Claims (COMP) Unit Leader
- **Description:** Designed to provide the prerequisite knowledge and skills necessary to perform the tasks of Finance/Administration Unit Leader.
- **Prerequisites:** Qualified as Personnel Time Recorder (PTRC) for Time Unit Leader (TIME) Qualified as Equipment Time Recorder (EQTR) and meet agency procurement authority requirements for procurement unit leader (PROC) Qualified as Compensation-For-Injury Specialist (INJR) and Claims Specialist (CLMS) for Compensation/Claims Unit Leader (COMP)
Have agency related cost estimation and analysis experience for Cost Unit Leader (COST)

- **Hours:** 32
- **Designed For:** Personnel desiring to become qualified as Division/Group Supervisor (DIVS), Prescribed Fire Burn Boss Type 2 (RXB2), Incident Commander Type 3 (ICT3), or in a position requiring this knowledge
- **Description:** Designed to introduce fire behavior calculations by manual methods, using nomograms and the Fire Behavior Handbook Appendix B. the student gains an understanding of the determinants of fire behavior though studying inputs (weather, slope, fuels, and fuel moisture). The student also learns how to interpret fire behavior outputs, documentation processes, and fire behavior briefing components.
- **Prerequisites:** S-290 and qualified as a Single Resource Boss
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-400: Incident Commander (2002)

- **Hours:** 24
- **Designed For:** Personnel desiring to be qualified as an Incident Commander Type 2 (ICT2)
- **Description:** Topics include team administration, communication, information/intelligence processing, agency administrator and IC responsibilities, transfer of command, and demobilization. The course provides exercises to assist the student in acquiring the knowledge to learn these skills. An optional "lessons learned" unit allows the addition of geographic area specific information, but the course time frame must be increased accordingly.
- **Prerequisites:** Qualified as an Incident Commander Type 3 (ICT3)
  - Qualified as one of the General Staff Section Chiefs at the Type 2 level
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-403: Information Officer (2001)

- **Hours:** 28-32
- **Designed For:** Personnel desiring to be qualified as Public Information Officer Type 2 (PIO2)
- **Description:** This course meets the training requirements for a Public Information Officer Type 2. Topics include information organization and assignment, developing a communications strategy, information operations, creating a safe environment, effective media relations, incident within an incident, community relations analysis, documentation, demobilization, and transitioning. Students must pass a final exam.
- **Prerequisites:** S-190
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-404: Safety Officer (2002)

- **Hours:** 24
- **Designed For:** Personnel desiring to be qualified as a Safety Officer
- **Description:** Designed to meet the training needs of the Safety Officer position in the incident
command system. Topics include safety officer effectiveness, analysis techniques, safety messages, briefings and reports, and high hazard operations.

| Prerequisites: | None |
| Certification:  | None |
| Class Size:     | 40   |
| Restrictions:   | None |

### S-420: Command and General Staff (2002)

| Hours:       | 36   |
| Designed For:| Personnel desiring to be qualified as an Incident Commander Type 2 (ICT2) or Command or General Staff positions |
| Description: | Designed to prepare the student to function effectively in the position of a Type 2 Incident Commander, Command, or General Staff. The focus is on the application of previously acquired knowledge and skills. Students will participate in two types of groups (teams and similar position) during exercises that include a simulation of the mobilization, management, and demobilization phases of a rapidly accelerating Type 2 wildfire that has potential to become a Type 1 incident. |
| Prerequisites:| None required |
| Certification:| None |
| Class Size:   | 40   |
| Restrictions: | None |

### S-430: Operations Section Chief (2006)

| Hours:       | 24   |
| Designed For:| Personnel desiring to be qualified as an Operations Section Chief Type 2 (OSC2) |
| Description: | Designed to meet the training needs of the Operations Section Chief Type 2. This course is interactive in nature and contains several exercises designed to facilitate group and classroom discussion. |
| Prerequisites:| Qualified as a Division/Group Supervisor (DIVS) |
| Certification:| None |
| Class Size:   | 40   |
| Restrictions: | None |

### S-440: Planning Section Chief (2001)

| Hours:       | 20   |
| Designed For:| Personnel desiring to be qualified as a Planning Section Chief Type 2 (PSC2) |
| Description: | Designed to meet a portion of the training needs of the Planning Section Chief Type 2. Topics include information gathering, strategies, meetings and briefings, incident action plans (IAP), interactions, forms, documents, supplies, demobilization, and an optional technology section. In the final exercise, the students observe a simulated planning meeting and use the information derived to find errors in an IAP. Students must pass the unit tests and the final exercise to successfully complete the course. |
| Prerequisites:| Successful completion of the prereq course work Qualified as a Situation Unit Leader (SITL) Qualified as a Resources Unit Leader (RESL) |
| Certification:| None |
| Class Size:   | 40   |
| Restrictions: | None |
### S-445: Incident Training Specialist (2009)

- **Hours:** 14-18
- **Designed For:** Personnel desiring to be qualified as Training Specialist (TNSP) and should be based on technical competence in the ICS, availability to participate on incidents, and displayed interest in improving training
- **Description:** Designed to train personnel to perform the duties of a Training Specialist. Duties include coordinating incident training opportunities and activities, ensuring the quality of training assignments, and completing documentation of the incident training.
- **Prerequisites:** None
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-450: Logistics Section Chief (2002)

- **Hours:** 16
- **Designed For:** Personnel desiring to be qualified as a Logistics Section Chief Type 2 (LSC2)
- **Description:** Designed to meet the national core needs of the Logistics Section Chief Type 2. Topics include arriving properly an incident, gathering information to access the assignment, beginning initial planning activities, determining that facilities, services, and materials are provided for the incident, planning, staffing, and managing the Logistics Section, coordinating with other sections, and implementing the demobilization plan.
- **Prerequisites:**
  - Qualified as a Facilities Unit Leader (FACL)
  - Qualified as a Ground Support Unit Leader (GSUL) or
  - Qualified as a Facilities Unit Leader (FACL)
  - Qualified as a Supply Unit Leader (SUPL)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

### S-460: Finance/Administration Section Chief (2001)

- **Hours:** 24
- **Designed For:** Personnel desiring to be qualified as a Finance/Administration Section Chief Type 2 (FSC2)
- **Description:** Designed to meet a portion of the training needs in the finance section organization. Topics include predispatch and response, organization and operation of the finance function, and demobilization.
- **Prerequisites:**
  - Qualified as a Time Unit Leader (TIME)
  - Qualified as a Procurement Unit Leader (PROC) or Cost Unit Leader (COST)
- **Certification:** None
- **Class Size:** 40
- **Restrictions:** None

- **Hours:** 40
- **Designed For:** Personnel desiring to be qualified as a Fire Behavior Analyst (FBAN) or Long Term Fire Analyst (LTAN)
- **Description:** This course is the fourth in a series designed to develop fire behavior and prediction knowledge and skills and prepares the student for S-590, Advanced Fire Behavior Interpretation. Examples and exercises are divided between wildfire and prescribed fire applications. The student learns to project fire perimeter growth based on weather...
predictions and knowledge of fuels and topography, using a variety of scenarios.

**Prerequisites:** S-390 and proficiency using non-automated fire behavior processors and the latest computerized fire modeling system

**Certification:** None

**Class Size:** 40

**Restrictions:** None

---

**Hours:** 32

**Designed For:** Dispatchers and others charged with editing and inputting weather information into WIMS used for NFDRS calculations, fire management staff who apply NFDRS outputs to decision making, and Fire Behavior Specialists who incorporate NFDRS products into assessments and projections

**Description:** The course develops the knowledge and skill to operate, maintain, and manage the NFDRS at the local unit. Course lecture and exercises support practical and technical application of the intellectually complex subject matter. The course requires a computer classroom with internet access to present.

**Prerequisites:** S-290

Successful completion of the prequalifying course work
Intermediate skills with the current Windows™ operating system
Possess a valid Weather Information Management System (WIMS) logon identification

**Certification:** None

**Class Size:** 40

**Restrictions:** None

Course: Terrorism Liaison Officer – Basic (2013)
Hours: 8
 Designed For: Firefighters, Fire Investigators, Fire Inspectors, and Fire Dispatchers
 Description: To educate the basic entry level Terrorism Liaison Officer with the policies and procedures of the Fusion Center which they will be working with in their Area of Responsibility. This training essential for fire service personnel working with multiple discipline stakeholders who share information with the California Fusion Centers.

Prerequisites: None
Certification: None
Class Size: 50
Restrictions: Public Safety Personnel only not intended for General Public.

Module 1 – Overview and Introduction
Scope Statement: Participants are provided an overview of the course and a brief history of the national and statewide TLO concept. The module also introduces key, foundational concepts and sets the stage for instruction in subsequent modules.

Module 2 – The Role of the TLO
Scope Statement: Participants will be given a brief history and evolution of fusion centers and their intended functionality. Participants will be introduced to the history and development of the TLO Program in California, and the role of the TLO in support of the California State Threat Assessment System (STAS). The participants will be introduced to their unique Regional Threat Assessment Center and their individual capabilities-LECC, JRIC, OCIAC, NCRIC, CCIC Specifically, instruction addresses TLO information sharing; terrorism/all-crimes information collection; internal agency training; public and private sector outreach; and TLO recruitment. Instruction addresses TLO role in identifying crime trends; officer safety issues; and indicators and warning signs of potential terrorist activities. During this module, participants also receive instruction on safeguarding restricted information and will complete non-Disclosure agreement.

Module 3 – TLO and Fusion
Scope Statement: This module addresses the TLO role within a post September 11, 2001 domestic intelligence system and how the information provided by TLO into the fusion center is used to facilitate the initiation of investigations and/or the direct interdiction of criminal activities and terrorism threats. Participants are introduced to the distinctions between investigations versus intelligence and their diverse purposes. Instruction also familiarizes participants with the organization and structure of the U.S. Intelligence Community and its relationship with local, county, state stakeholders. Participants will receive instruction on legal issues and privacy policies such as 28CFR, ensuring that the student understands that criminal intelligence systems and operations conform to the privacy and constitutional rights of individuals.

Module 4 - Overview of Terrorism
Scope Statement: Instruction and participant discussions in this 3.5-hour module review the defining characteristics of terrorism. The module addresses terrorism across the spectrum of
transnational, international, domestic, and single-issue categories. Instruction defines each terrorism category and further addresses their various distinctions and characteristics. Additionally, instruction addresses exemplar groups practicing these various types of terrorism and explores each group’s history, capabilities and intentions, MO, and future outlook as a threat to national interests. Terrorism groups and movements addressed in this introductory overview include: transnational terrorist organizations such as al Qaeda and its affiliates in Yemen, North Africa, Somalia, and Indonesia; international terrorist organizations such as Hezbollah and HAMAS; domestic terrorist phenomena such as homegrown violent jihadist, white supremacist, and anti-government groups; and single-issue movements such as animal rights, environmental extremists, and anti-abortionist.

Module 5 - Course Conclusion ................................................................. 0:30

Scope Statement: Instruction and participant discussion in this 30-minute module reviews relevant lessons and clarifies core concepts as requested by participants or as identified by instructors.

**S-339 ALL RISK COURSE OUTLINE**

Course Objectives: To provide the student with...

- The concepts of a division and group as it relates to the position of Division/Group Supervisor.
- The opportunity to apply Division/Group fundamentals to ALL RISK incidents.
- The opportunity to prepare for and participate in planning meetings to develop and implement division/group objectives.
- The opportunity to participate in information gathering practices.
- The opportunity to participate in an operational period briefing and a division/group briefing.
- Information on managing and adjusting the operations organization.
- An understanding of why and when tactics may need to be adjusted.
- Information on the role of the Division/Group Supervisor in risk assessment and safety management.
- The opportunity to demonstrate how to successfully coordinate internal and external relations.

INSTRUCTOR COURSES

Course: Ethical Leadership in the Classroom (2007)

Hours: 8

Designed For: State Fire Training Instructors

Description: This one-day course is designed to provide you with concepts and theories of the ethical decision-making process, help you recognize the signs of an ethical dilemma, identify advantages and disadvantages of ethical behavior, and an opportunity to review examples of classroom situations in which instructors used their leadership role to either encourage or discourage ethical behavior. Participants in this class will examine ethics, values, principles, and morality. State Fire Training's Instructor Code of Ethics/Conduct will also be presented.

Prerequisites: None

Certification: None

Max Class Size: 30

Restrictions: This course may require a State Fire Training representative in addition to the Primary Instructor.

ETHICAL LEADERSHIP IN THE CLASSROOM COURSE OUTLINE

Course Objectives: To provide the student with...

- A fundamental awareness of ethical values within fire service instructors by exploring examples of ethical behavior in the classroom environment.
- The basic concepts, terms, and theories of ethical decision-making processes.
- An instructor code of ethics.
- Concepts in ethical leadership.
- Ethics awareness and a method for assessing personal values.
- A process for analyzing the role of the fire service instructor in maintaining the value system through video case studies and classroom ethical situations.

Course: Certification Examination Evaluator Training (2016)
Hours: 6

Designed For: Personnel affiliated with an Accredited Regional Training Program (ARTP) or an Accredited Local Academy (ALA) who will be serving as either a Registered Lead Evaluator or Skills Evaluator for a certification examination process (written and/or skills).

Description: This course provides in-depth instruction on the registration requirements for Registered Lead Evaluators and Skills Evaluators, processes and procedures to request and successfully deliver both written and skills certification examinations, and information on making the transition from instructor to evaluator.

Prerequisites: Endorsement by the director of an ARTP or ALA. Lead Evaluator candidates must be a Registered Instructor in good standing with SFT; Skills Evaluator candidates must meet the requirements to serve as a Fire Fighter I Instructor as set forth in the SFT Procedures manual.

Certification: None

Standard: Complete all practical exercises

Max. Class Size: 60

Restrictions: This class is scheduled and taught by State Fire Training staff only.

EVALUATOR TRAINING COURSE OUTLINE*

Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: History of Certification Examinations
- Topic 1-3: Certification Examination Sites

Unit 2: Registered Skills Evaluator
- Topic 2-1: Registration Requirements and Responsibilities

Unit 3: Registered Lead Evaluator
- Topic 3-1: Registration Requirements and Responsibilities

Unit 4: Certification Examination Administration Process
- Topic 4-1: SFT/Agency Agreement
- Topic 4-2: Requesting and Examination
- Topic 4-3: Fees
- Topic 4-4: Examination Request Process
- Topic 4-5: Remote Delivery
EVALUATOR TRAINING COURSE OUTLINE*

Unit 5: Conducting the Skills Examination
- Topic 5-1: Skills Exam Procedures
- Topic 5-2: IAP Development
- Topic 5-3: Security
- Topic 5-4: Skills Exam Scoring
- Topic 5-5: Required Skills
- Topic 5-6: Observation Skills
- Topic 5-7: Skills Exam Retake Procedures
- Topic 5-8: Skills Exam Recordkeeping

Unit 6: Conducting the Written Examination
- Topic 6-1: Written Exam Development
- Topic 6-2: On-Line Written Exam
- Topic 6-3: Written Exam Procedures
- Topic 6-4: Written Exam Scoring
- Topic 6-5: Written Exam Re-Take Procedures

Unit 7: Appeals and Audits
- Topic 7-1: Appeals and Audits

Unit 8: Practical Exercises
- Topic 8-1: Evaluation Scenarios

Unit 9: Discussion & Summary
- Topic 9-1: Discussion & Summary

Course Information and Required Materials
January 2019

Course: Instructor I: Instructional Methodology (2014)

Hours: 40 (see course plan for breakdown)

Designed For: Personnel preparing for a college level fire instructor, Company Officer, or SFT Certified Training Instructor position

Description: This course provides the skills and knowledge needed for the entry level professional instructor to perform his or her duties safely, effectively, and competently. The curriculum is based on the 2012 edition of NFPA 1041 Standard for Fire Service Instructor Professional Qualifications. At the end of this course, candidates for Instructor I certification will be able to teach and deliver instruction from a prepared lesson plan utilizing instructional aids and evaluation instruments. The Instructor I will also be able to adapt a lesson plan and complete the reporting requirements to the local jurisdiction.

Prerequisites: None, but the following courses are recommended:
- Introduction to the Incident Command System (IS-100.B), FEMA OR
- National Incident Management System (IS-700.A), FEMA

Certification: Instructor I

Standard: Complete all group activities and formative tests. Pass all individual activities without omitting critical criteria as identified on the activity sheet.

Class Size: 20; (16 students per lab section)

Student/Instructor Ratio: 20:1, plus additional skills evaluators as needed to maintain 16:1 ratio for psychomotor teaching demonstrations.

Restrictions: None. However, instructor’s must submit letter for approval of conditions outside the parameters of normal classroom instruction, e.g. class size exceeds 20, compressed course delivery, distance learning format.

Required Student Materials

- Fire and Emergency Services Instructor (ISBN 9780879394417) 8th IFSTA

Fire Instructor I Course Content

Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: Instructor I Certification Process
- Topic 1-3: Definitions of Duty

Unit 2: Instructional Development
- Topic 2-1: Determining Needed Adaptations
- Topic 2-2: Adapting Lesson Plans
Unit 3: Instructional Delivery
- Topic 3-1: Organizing the Learning Environment
- Topic 3-2: Presenting Lessons
- Topic 3-3: Adjusting Presentations for Changing Circumstances
- Topic 3-4: Maintaining a Safe and Positive Learning Environment
- Topic 3-5: Operating Instructional Audiovisual Equipment
- Topic 3-6: Utilizing Audiovisual Materials

Unit 4: Evaluation and Testing
- Topic 4-1: Administering and Conducting Tests
- Topic 4-2: Grading and Securing Student Examinations
- Topic 4-3: Reporting Test Results
- Topic 4-4: Providing Evaluation Feedback to Students
- Topic 4-5 Evaluating Student Instructor Lesson Demonstrations

Unit 5: Program Management
- Topic 5-1: Assembling Course Materials
- Topic 5-2: Preparing Resource Requests
- Topic 5-3: Scheduling Instructional Sessions
- Topic 5-4: Completing and Submitting Training Records
Course Information and Required Materials

January 2019

Course: Instructor II: Instructional Development (2014)
Hours: 40 (see course plan for breakdown)
Designed For: Personnel preparing for a college level fire instructor, Company Officer, or SFT Certified Training Instructor position
Description: This course provides the skills and knowledge needed for the intermediate level professional instructor to perform his or her duties safely, effectively, and competently. The curriculum is based on the 2012 edition of NFPA 1041 Standard for Fire Service Instructor Professional Qualifications and the 2012 edition of NFPA 1403 Standard on Live Fire Training Evolutions. At the end of this course, candidates for Instructor II certification will be able to develop lesson plans and evaluation instruments, teach and deliver instruction, and evaluate and coach other instructors. The Instructor II will also be able to analyze resources and formulate a program budget.

Prerequisites: Instructional Methodology
Introduction to the Incident Command System (IS-100.B), FEMA OR National Incident Management System (IS-700.A), FEMA
Certification: Instructor II
Standard: Complete all group activities and formative tests. Pass all individual activities without omitting critical criteria as identified on the activity sheet.
Class Size: 20; (16 students per lab section)
Student/Instructor Ratio: 20:1, plus additional skills evaluators as needed to maintain 16:1 ratio for psychomotor teaching demonstrations.
Restrictions: None. However, instructor’s must submit letter for approval of conditions outside the parameters of normal classroom instruction, e.g. class size exceeds 20, compressed course delivery, distance learning format.

INVESTIGATION COURSES

Course: Fire Investigation 1A: Basic Fire Investigation (2017)
Hours: 39.30 (see course plan for breakdown)

Designed For: Fire investigators and law enforcement officers responsible for conducting fire investigations

Description: This course provides information on securing the fire scene and determining the origin and cause of the fire. Topics include responsibilities of a fire investigator, securing the fire ground, conducting an exterior and interior survey, analyzing fire patterns, interpreting individual fire patterns, discriminating the effects of explosions, examining and removing fire debris, reconstructing the area of origin, inspecting the performance of building systems. The 2014 edition of NFPA 1033 Standard Professional Qualifications for Fire Investigator is the basis for this course.

Prerequisite: Fire Behavior and Combustion (California Community College core curriculum)

Corequisites: Basic Electricity (CFITrainer.net)
Ethics and the Fire Investigator (CFITrainer.net)

Certification: Fire Investigator (February 2017)

Standard: Complete all activities. Complete the summative test with a minimum score of 80%.

Max. Class Size: 40
Student/Instructor Ratio: 40:1 (lecture)
10:1 (activity)

Restrictions: Air Quality Management District permit (if required)
Burn cubicles sufficient to accommodate the 1:10 instructor/student ratio
Staffed fire suppression equipment

FIRE MECHANIC 1 COURSE OUTLINE
Course Objectives: To provide the student with...
- The principles and theories associated with the maintenance and operational pump testing required for fire apparatus and equipment.
- An opportunity to troubleshoot.
- An opportunity to receive specialized and on-the-job training.

Course Content
- Pump Identification: 8:00
- Theory: 8:00
- Demonstration and Lab: 12:00
- Troubleshooting: 6:00
- Testing: 2:00

Total Duration: 36:00
Course Information and Required Materials
January 2019

Hours: 36
Designed For: Advanced-level fire apparatus mechanics
Description: This course includes topics on the theory, operation, and maintenance of electrical systems currently being used in fire apparatus.
Prerequisites: Fire Mechanic 1
Certification: Fire Mechanic II
Max Class Size: 40
Restrictions: This course is scheduled and taught by Fire Mechanic Academy staff only.

Required Student Materials

- Student Manual

Required Instructor Materials

- Instructor Guide

Vendors

| CFMA | California Fire Mechanics Association (916-727-7019) |

FIRE MECHANIC 2A COURSE OUTLINE

Course Objectives: To provide the student with...
• Theory, operation, and maintenance information on electrical systems currently being used in ambulance and fire apparatus.
• The principles and theories associated with maintenance required for ambulance and fire apparatus and equipment.
• An opportunity to receive specialized and on-the-job training.

Course Content: 36:00

- Theory of Electron Flow, Principles of Current, Voltage, Resistance, Ohm’s Law; Series, Parallel, Series/Parallel Circuits, Principles of Diodes and Transistors
- Design and Construction, Ratings, Charging, Evaluation/Selection and Testing of Batteries
- Design and Construction, Voltmeter, Ammeter, Ohmmeter, Application, Reading and Ratings of Meters
- Design and Operation, Heavy Duty Ratings, Pulley and Belt Loop, Load Requirements
- Design and Operation, Switches and Solenoids, Mounting, Heavy Duty Applications and Diagnosis of Alternators
- Design and Operation, Switches and Solenoids, Mounting, Heavy Duty Applications and Diagnosis of Cranking Motors
- Load Analysis, CCA Wiring, Fusing, Looming, Installation, and Repair Techniques Of Electrical Systems
- Failure Analysis, Diagnostic Approaches, Computer Learn and Resets, Computer Wake-Up Memory and Instrumentation of Component Systems
- Testing
Course Information and Required Materials

January 2019

Hours: 36

Designed For: Advanced-level fire apparatus mechanics

Description: This course covers introduction, general construction, and application of Allison Transmission.

  Hands-on activities include complete tear down, subassembly tear down, hydraulics, power flows, and complete transmission rebuild. Troubleshooting and maintenance is covered also.

Prerequisites: Fire Mechanic 1

Certification: Fire Mechanic II

Max Class Size: 40

Restrictions: This course is scheduled and taught by Fire Mechanic Academy staff only.

### COMPANY OFFICER 2C COURSE CONTENT

**Unit 1: Introduction**
- Topic 1-1: Orientation and Administration
- Topic 1-2: Fire Officer Certification Process
- Topic 1-3: Definition of Duty

**Unit 2: Fire and Life Safety Inspections**
- Topic 2-1: Describing Fire Inspection Procedures
- Topic 2-2: Identifying Features that Prevent or Contribute to Fire Spread

**Unit 3: Fire Investigation**
- Topic 3-1: Securing Incident Scenes
- Topic 3-2: Determining the Origin and Cause
Course Information and Required Materials
January 2019

Course: Fire Inspector 1A: Duties and Administration (2010)
Hours: 24

Designed For: Entry level Inspector

Description: This course provides students with a basic knowledge of the roles and responsibilities of a Fire Inspector I including legal responsibilities and authority, codes and standards, the inspection process, confidentiality and privacy requirements, and ethical conduct, and administrative tasks including preparing inspection reports, recognizing the need for a permit or plan review, investigating common complaints, and participating in legal proceedings.

Prerequisites: None

Certification: Fire Inspector

Standard: Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.

Class Size: 30

Restrictions: None

*This is an abbreviated Course Plan. Terminal and Enabling Learning Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: [http://osfm.fire.ca.gov/divisions/state-fire-training/cfstes-professional-certification/](http://osfm.fire.ca.gov/divisions/state-fire-training/cfstes-professional-certification/)
Course: Motion Picture/Television Fire Safety Officer

Hours: 24

Designed For: Fire personnel, suppression and investigation officers, special effects technicians, film production safety coordinators, stunt coordinators, line producers, directors, location managers, film commissioners, insurance risk managers and other governmental officials who interact with the entertainment industry in a safety capacity.

Description: This course provides the student with a basic knowledge of film production safety, both on the studio lot and location filming. Areas covered include: Filming and fire code permits, licensing, safety officer responsibilities, who’s who on location, fire safety hazards associated with lighting generators, electrical cabling, set construction, studio and warehouse filming, pyrotechnic special effects law and regulations (handling, use, storage and transportation) and stunt safety. In addition, the training incorporates pyrotechnic special effects and stunt demonstrations, special guest speakers, product orientation and slides and video from many different films.

Prerequisites: None

Certification: None

Class Size: 75

Restrictions: This course is scheduled and taught by OSFM Fire Engineering Fireworks Program staff experienced with Motion Picture/Television only.

Course Objectives:

- Provide students with the knowledge, skills and abilities to recognize common and special hazards in the filming industry and enforce fire prevention laws and regulations while assigned to filming locations.
- Provide students with information about the role of the fire department while assigned to filming locations.
- Provide a level of enforcement consistency from jurisdiction to jurisdiction when assigned to filming locations.
- Provide the Filming Industry and the People of the State a safe environment when production companies are filming on location.

Day 1:

Orientation and Introduction .......................................................... 1:00
Filming in California ................................................................. 1:00
Film Production Safety ......................................................... 1:00
The FSO .................................................................................. 1:00
Permits ................................................................................. 1:00
Electrical Awareness .............................................................. 3:00

Day 2:

Film Production Safety .............................................................. 1:00
Tents & Membrane Structures ................................................ 1:00
Refuelers .......................................................................... 0:30
Other Permits ...................................................................... 0:30
Laws and Regulations ......................................................... 4:00
Studio and Warehouses ...................................................... 0:30
Helicopters ........................................................................ 0:30

Course: Outdoor Aerial Public Fireworks Display (2014)

Hours: 7

Designed For: Fire prevention, suppression, public education, fire investigation and law enforcement personnel with pyrotechnic public display enforcement responsibilities. Also, Pyrotechnic Operator – Basic Commercial Technicians, show designers, producers and unlicensed assistants.

Description: Educate and inform both public safety agencies and the private sector interests regarding Outdoor Aerial Public Display Fireworks safety in California. Discuss and demonstrate the proper use, handling, storage, and transportation of display fireworks within the industry. Provide a leadership role in educating local government agencies throughout the State by standardizing regulatory safety requirements for outdoor aerial public display fireworks. Review laws and regulations governing permits, licensure, inspection practices, pre and post display. Course incorporates outdoor aerial fireworks display demonstration.

Prerequisites: None

Max. Class Size: 75

Restrictions: This course is scheduled and taught by OSFM Fire Engineering – Fireworks Program staff experienced with Outdoor Aerial Public Fireworks Displays only.

Course Objectives:
- Provide students with the knowledge, skills and abilities to recognize common and special hazards in the pyrotechnic industry and enforce fire prevention laws and regulations while assigned to Outdoor Aerial Public Fireworks Displays.
- Provide students with information about the role of the fire department while assigned to Outdoor Aerial Public Fireworks Displays.
- Provide a level of enforcement consistency from jurisdiction to jurisdiction when assigned to Outdoor Aerial Public Fireworks Displays.
- Provide the Pyrotechnic Industry and the People of the State a safe environment when observing an Outdoor Aerial Public Fireworks Display.

**Course:** Plan Examiner 1B: Fire Protection and Life Safety System Plan Review (2015)  
**Hours:** 27  
**Designed For:** Those desiring to become a plan examiner  
**Description:** This course provides the knowledge and skills that prepare a plan examiner to evaluate fire flow compliance and identify requirements and review installation plans for fire protection and life safety systems.  
**Prerequisites:** Plan Examiner 1A: Building Plan Review  
**Certification:** Plan Examiner  
**Standard:** Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.  
**Max. Class Size:** 25  
**Inst./Stud. Ratio:** 1:25  
**Restrictions:** None

### Plan Examiner 1B: Course Content*

#### Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: Plan Examiner Certification Process
PLAN EXAMINER 1B: COURSE CONTENT*

Unit 2: Fire Flow
- Topic 2-1: Evaluating Fire Flow Compliance

Unit 3: Fire Protection and Life Safety Systems
- Topic 3-1: Identifying Requirements for Fire Protection of Life Safety Systems
- Topic 3-2: Reviewing Fire Protection and Life Safety System Installation Plans

*This is an abbreviated Course Plan. Terminal & Enabling Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: http://osfm.fire.ca.gov/divisions/state-fire-training/cfstes-professional-certification/

Hours: 28

Designed For: Those desiring to become a plan examiner

Description: This course provides the knowledge and skills that prepare a plan examiner to evaluate plans associated with new construction, systems integration, alternative compliance, wildland urban interface areas, and special operations including hazardous materials and high-piled combustible storage.

Prerequisites: Plan Examiner 1A and Plan Examiner 1B

Certification: Plan Examiner

Standard: Complete all summative tests with a minimum score of 80%. Complete all activities and formative tests.

Max. Class Size: 25

Inst./Stud. Ratio 1:25

Restrictions: None

**PLAN EXAMINER 1C: COURSE CONTENT**

### Unit 1: Introduction
- Topic 1-1: Orientation and Administration
- Topic 1-2: Plan Examiner Certification Process

### Unit 2: Design and Systems Integration
- Topic 2-1: Evaluating Design Concepts
- Topic 2-2: Evaluating Systems Integration

### Unit 3: Alternative Compliance
PLAN EXAMINER 1C: COURSE CONTENT*

- Topic 3-1: Evaluating Performance-Based Design Concepts
- Topic 3-2: Evaluating a Proposed Alternative Method for Compliance

Unit 4: Wildland Urban Interface Areas
- Topic 4-1: Evaluating Development/Community or Wildland Urban Interface Landscape Plans

Unit 5: Special Operations
- Topic 5-1: Evaluating Plans for Storage, Handling, and Use of Hazardous Materials
- Topic 5-2: Evaluating Plans for a Process or Operation
- Topic 5-3: Evaluating a Plan with Special (High-piled Combustible) Storage Arrangements

*This is an abbreviated Course Plan. Terminal & Enabling Objectives can be found on the full version located on the SFT Curriculum page of the SFT website at: http://osfm.fire.ca.gov/divisions/state-fire-training/cfstes-professional-certification/
**Course Information and Required Materials**

January 2019

**Course:** Proximate Audience Pyrotechnics (2011)

**Hours:** 7

**Designed For:**
- Fire prevention, suppression, public education, fire investigation, Pyrotechnic Operator – Theatrical, Theatrical Trainee, Pyrotechnic Show Producers and law enforcement personnel with pyrotechnic public display enforcement responsibilities.

**Description:** This course provides a basic knowledge of proximate audience pyrotechnics safety; laws and regulations governing permits, licensure, inspection practices, pre-production, operating, post production, and open flames for various types of venues. This course incorporates a live proximate audience pyrotechnic demonstration.

**Prerequisites:** None

**Max. Class Size:** 75

**Restrictions:** This course is scheduled and taught by OSFM Fire Engineering – Fireworks Program staff experienced with Proximate Audience Pyrotechnics only.

**PROXIMATE AUDIENCE PYROTECHNICS COURSE PLAN**

**Course Objectives:**
- Provide students with the knowledge, skills and abilities to recognize common and special hazards in the pyrotechnic industry and enforce fire prevention laws and regulations while assigned to proximate audience pyrotechnic events.
- Provide students with information about the role of the fire department while assigned to proximate audience pyrotechnic events.
- Provide a level of enforcement consistency from jurisdiction to jurisdiction when assigned to proximate audience pyrotechnic events.
- Provide the Pyrotechnic Industry and the People of the State of California a safe environment when observing a proximate audience pyrotechnics public display for group entertainment.

**Course Breakdown:**

- Orientation and Introduction ................................................................. 1:00
- Pyrotechnic Laws and Regulations ......................................................... 1:30
- Permits and Inspection Process ............................................................... 1:00
- Open Flame and Fire Performers ............................................................. 1:00
- Proximate Audience Pyrotechnic Demonstration ........................................ 1:30
- Q&A, Course Evaluations .......................................................................... 1:00

**Course Hours .......................................................................................... 7:00**
**Course Information and Required Materials**

January 2019

**Course:** Statues and Regulations (2015)

**Hours:** 16

**Designed For:** Fire chiefs, fire prevention personnel, building officials, and related design professionals

**Description:** This course is designed for This course provides hands-on training. Topics include codes, standards and local amendments, site-plan review, building construction and characteristics, fire protection equipment, multi-family occupancies, commercial buildings, care facilities, drinking/dining facilities, shopping malls, and high-rise buildings.

**Prerequisites:** None

**Certification:** None

**Standard:** N/A

**Max. Class Size:** 50

**Restrictions:** This course is scheduled and taught by OSFM staff only.

Course: Confined Space Rescue Technician (2008)
Hours: 40
Designed For: All emergency personnel with confined spaces within their jurisdiction
Description: This course is an intensive hands-on training program that will prepare you to respond to
confined space emergencies. This course of instruction prepares the student in identifying
confined spaces and permit-required confined spaces, the hazards associated with permit
required confined spaces, target industries and hazards, state and federal regulations,
components of a rescue operation, and the roles and responsibilities of the rescue team.
Prerequisites: Confined Space Rescue Awareness
Certification: None
Max. Class Size: 36
Student/Instr. Ratio 12:1
36 student max: Three-squad site with 3 Primary Instructors and 1 Senior Instructor
24 student max: Two-squad* site with 2 Primary Instructors and 1 Senior Instructor
12 student max: One-squad* site with 1 Primary Instructors and 1 Senior Instructor
*For 1 or 2-squad sites, the Senior Instructor may also function as a Primary Instructor
Restrictions: This course can only be delivered at an accredited SFT Rescue Training site.

CONFINED SPACE RESCUE TECHNICIAN COURSE OUTLINE*

Course Objectives: To provide the student with...

- Information on regulations and standards for entry into confined spaces
- Information to identify confined spaces and permit-required confined spaces
- Information to identify the hazards associated with confined spaces
- Techniques to perform confined space rescue on incidents involving terrorism or weapons of mass destruction
- Information and techniques to select and use atmospheric monitoring equipment and the equipment necessary to control hazards in confined spaces
- Information and techniques to identify, select, and use personal protective equipment
- Information and techniques to use various types of victim removal and packaging systems
- Information and techniques to construct rope rescue systems for confined space rescue
- The information necessary to plan, organize, operate, and command at confined space rescue incidents
- The opportunity to apply the principles of confined space rescue through directed rescue scenarios

Course Information and Required Materials

January 2019

Course: Rescue Systems 1 (2010)
Hours: 40

Designed For: All emergency response personnel

Description: Key topics include: Team organization, rescue, and environmental considerations, use of ropes, knots rigging and pulley systems, descending, rappelling, and belaying tools and techniques, subsurface rescue techniques, use of cribbing, wedges, cutting/prying and hydraulic tools, use of fire service ladders in specialized rescue situations, and day and night simulated rescue exercises.

Prerequisites: Fire Fighter I or equivalent training, Low Angle Rope Rescue Operational Certification: None

Max. Class Size: Student/instructor ratio: 12:1
- 48 student max: Four-module site with 4 Primary Instructors and 1 Senior Instructor
- 36 student max: Three-module site with 3 Primary Instructors and 1 Senior Instructor
- 24 student max: Two-module site with 2 Primary Instructors
- 12 student max: One-module site with 1 Primary Instructor

Restrictions: This course can only be delivered at an accredited SFT Rescue Training site.

RESCUE SYSTEMS 1 COURSE OUTLINE*

Course Objectives: To provide the student with...
- Techniques to operate safely when working around the structural collapse of light frame buildings
- Information on the potential hazards associated with rescue operations
- An opportunity to build on skills acquired in Low Angle Rope Rescue Operational training
- Information and techniques for lifting and moving heavy objects
- Information and techniques to break or breach building components to access a victim(s)
- Information and techniques to shore and stabilize building components

Topic 1-1: Introduction to the California Urban Search and Rescue System ................................................................. 1:00
Topic 1-2: Rescue Operations ........................................................................................................................................ 1:00
Topic 1-3: US&R Safety and Medical Care for Victims .................................................................................................... 1:00
Topic 1-4: US&R Planning and Preparation .................................................................................................................... 1:00
Topic 2-1: Rescue Knots and Hitches ............................................................................................................................ 0:45
Topic 2-2: Anchor Systems ............................................................................................................................................. 0:45
Topic 2-3: Rescuer and Ambulatory Victim Packaging .................................................................................................. 0:30
Topic 2-4: System Attachments and Fall Restraint .......................................................................................................... 0:30
Topic 2-5: Belay/Safety Line Systems ............................................................................................................................. 0:30
Topic 2-6: Rappelling / Descending .............................................................................................................................. 0:30

RESCUE SYSTEMS 2 COURSE OUTLINE*

Course Objectives: To provide the student with...
- Information to incorporate safety practices in all phases of the planning and implementation of a rescue operation
- Information to identify and mitigate potential hazards associated with rescue operations
- An opportunity to build on skills acquired in Rescue Systems 1 training
- Reconnaissance strategies and techniques for locating victims in a collapsed building
- Information on structural triage and collapse patterns of building structures
- Information and techniques to shore and stabilize building components
- Information and techniques to break or breach building components to access a victim(s)
- Techniques of metal burning systems
- Information and techniques for lifting and moving heavy objects

Topic 1-1 Introduction and Introduction ................................................................. 1:00
Topic 1-2 Safety ........................................................................................................... 1:00
Topic 1-3 Survival ...................................................................................................... 1:00
Topic 1-4 Search Capabilities .................................................................................... 1:00
Topic 1-5 Structure Triage ......................................................................................... 4:00
Topic 2-1: Collapse Patterns Structural Engineering .................................................. 4:00
Topic 2-2: Structural Hazard Identification ............................................................... 4:00
Topic 3-1: Basic Shoring ........................................................................................... 4:00
Topic 3-2: Shoring Construction ............................................................................... 4:00

**Course Information and Required Materials**

**January 2019**

---

**FSTEP**

**Course:** Rescue System 3: Structural Collapse Technician (2012)

**Hours:** 24 (Six, 4 hour modules)

**Designed For:** All fire service and allied emergency response personnel

**Description:** Bridges the training gap between the California State Fire Training Rescue Systems 2 Advanced Rescue Skills course and the Federal Emergency Management Agency Structural Collapse Technician course. Key topics include: powder actuated tools, pneumatic shores, additional tools and techniques for breaking and breaching, cutting a tensioned cable, the "O" course, rigging, and crane operations.

**Prerequisites:** Rescue Systems 2
Confined Space Rescue Technician
Trench Rescue Technician
Hazardous Materials (Operations Level)

**Certification:** None

**Class Size:** 48

**Student to Instructor Ratio:** 12:1 and 1 Senior Instructor for 1-4 module delivery (Note: Senior cannot be a Primary in 3 or 4 module classes)

**Restrictions:** Delivered only at an approved RS-2 training site.

**RESCUE SYSTEMS 3: STRUCTURAL COLLAPSE TECHNICIAN COURSE PLAN**

---

**MODULE I**

**Topic 1: Introduction and Administration / Safety** ................................................................. 2:00

**Topic 2: Power Actuated Tools** .............................................................................................. 1:00

**Topic 3: Rigging** ...................................................................................................................... 1:00

---

**MODULE II**

**Topic 1: Shoring** ...................................................................................................................... 4:00

---

**MODULE III**

**Topic 1: Breaking / Breaching** .................................................................................................. 4:00

---

**MODULE IV**

**Topic 1: Cutting / Burning** ....................................................................................................... 4:00

---

**MODULE V**

**Topic 1: Lifting / Moving ("O" Course)** .................................................................................... 4:00

---

**MODULE VI**

**Topic 1: Lifting / Moving (Crane Operations)** ................................................................. 4:00

---

**Total Hours** ............................................................................................................................... 24:00

---

### Course Information and Required Materials

**Course**: Trench Rescue Technician (2014)

**Hours**: 24

**Designed For**: All fire service and allied emergency response personnel

**Description**: This three-day (24 hour) course will take you from classroom discussion to working safely and efficiently in a trench rescue environment. This hands-on training program will cover topics that include: Trench and Excavation Regulations, Understanding Soil, Trench Configurations, Trench Hazards, Rescue Team Preparation, Incident Response, Initial On Scene and Pre-Entry Operations, Shoring Systems and Components, Installation of Shoring Systems, Victim Rescue and Recovery and Incident Termination

**Prerequisites**: Rescue Systems 1

**Certification**: None

**Class Size**: 24

**Student/Instructor Ratio**: 12:1

1-Squad Site: 12:1 (12 total students) with 1 Senior Instructor

2-Squad Site: 12:1 (24 total students) with 1 Senior Instructor and 1 Primary Instructor

**Restrictions**: The Senior Instructor must validate the trench rescue training site for compliance with the Trench Rescue Site Requirements and Equipment Standards

**Trench Rescue Technician Course Plan**

### Introduction

Terminal Learning Objective: Students provided with information from this chapter, along with headlines from current events, will be able to recall fatality statistics and case histories and accurately apply this information to potential liabilities in trench rescue operations.

### Chapter 1: OSHA Trench Regulations

Terminal Learning Objective: Students, with the information provided in this chapter, will demonstrate their knowledge by accurately citing specific regulations that impact trench rescue operations.

### Chapter 2: Understanding Soil

Terminal Learning Objective: Students provided with information from this chapter, will be able to accurately describe soil classifications and types, soil testing procedures and other factors affecting trench stability.

### Chapter 3: Trench Configurations

Terminal Learning Objective: Students, with the information provided in this chapter, will be able to accurately recognize types of trenches and excavations, along with the types of collapses, collapse patterns, and factors leading to trench failures.
CHAPTER 4: Trench Hazards
Terminal Learning Objective: Students provided with the information provided in this chapter, will accurately describe the different types of hazards associated in and around the trench incident as well as how to mitigate those hazards.

CHAPTER 5: Rescue Team Preparation
Terminal Learning Objective: Students, with information provided in this chapter, will accurately recall and discuss rescue team preparation including rescue tool maintenance and use, scene accountability, personal protective equipment and scene safety.

CHAPTER 6: Incident Response
Terminal Learning Objective: Students provided with information from this chapter, will accurately outline trench rescue considerations when responding to a given trench rescue incident.

CHAPTER 7: Initial On-Scene Operations
Terminal Learning Objective: Students with information provided in this chapter, will be able to accurately identify and integrate the operational priorities at a given trench rescue incident.

CHAPTER 8: Pre-Entry Operations
Terminal Learning Objective: Students, provided with information from this chapter along with the provided tools, equipment, and materials, will accurately describe and demonstrate the pre-entry operation essential to safely perform in-and-around a given trench rescue incident.

CHAPTER 9: Protective Systems
Terminal Learning Objective: Students, with information provided in this chapter along with the provided tools, equipment, and materials, will accurately identify and demonstrate various types of protective systems in trench rescue operations.

CHAPTER 10: Shoring Systems and Components
Terminal Learning Objective: Students, provided with information from this chapter along with the provided tools, equipment, and materials, will accurately identify shoring system components and demonstrate how they are deployed and used in a given trench rescue operation.

CHAPTER 11
Terminal Learning Objective: Students, with information provided in this chapter along with the provided tools, equipment, and materials, will accurately demonstrate the installation of shoring systems in a given trench rescue operation.

CHAPTER 12: Victim Rescue and Recovery
Terminal Learning Objective: Students, provided with information from this chapter along with the provided tools, equipment, and materials, will accurately identify factors that affect victim search, soil removal, and demonstrate victim rescue and recovery at a given trench rescue operation.

CHAPTER 13: Incident Termination
Terminal Learning Objective: Students, with information provided in this chapter along with the provided tools, equipment, and materials, will accurately demonstrate all of the elements necessary to terminate a given trench rescue operation.

Course Hours…………………………………………………………………………………………………………..24:00
