SUBJECT/AGENDA ACTION ITEM:
2018 Revision of the 2014 CICCS Qualifications Guide

Recommended Actions:
Approve the 2018 CICCS Qualification Guide

Background Information:
The 2018 revision of the 2014 CICCS Qualifications Guide was presented at the January 12, 2018 STEAC meeting. This is the second reading of this item.

After three years of existence the 2014 California Incident Certification System Qualifications Guide is in need of revision. The primary reasons for the revision are:

- additional emphasis on the all-hazard nature of CICCS;
- clarification of the definition of quality assignments;
- simplifying the method of transferring qualifications from non-CICCS agencies to CICCS participating agencies;
- changes to Peer Review Committees to improve their formation and processes;
- adding additional positions and deletion of positions that are seldom used in by local government; changes to Position Requirements for many Incident Command System positions;
- the replacement of some NWCG position training by the NIMS All-Hazard Position training sponsored by FEMA;
- changes to the Equivalency Matrix by the changes to curriculum by the State Fire training.

Attached are the draft of the 2018 Qualifications Guide and a document that summarize the changes from the 2014 Qualifications Guide to the 2018 Qualifications Guide.
Analysis/Summary of Issue:
The California Incident Command Certification System is unique in the country. CICCS qualification standards are rigorous providing the highest levels of incident response and public service. The 2018 revision to the Guide captures the NWCGs direction on wildland fire, the National Incident Management System (NIMS) all-hazard certification and qualification requirements, and is inclusive of a broad spectrum of services consistent with their all-hazard mission. The certification system is managed at the local, regional, and state levels. CICCS recognizes the voluntary nature of this program and the differences in the mission of local, state and federal wildland fire agencies.
Summary of Proposed CICCS Qualification Guide Changes
08/2017

• Changes Date to 2018
  Rationale: Recognizes that not all course additions will be completed by this year and that the document will not be through the rule making process until 2018.

• The Appendices will be included as part of the Qualifications Guide and not as separate files.
  Rationale: Clarity of the document.

• Adds a Glossary to the Appendix.
  Rationale: Clarifies document and provides definitions.

• Changes the logos on the document from CalOES Fire and Rescue and CAL FIRE to CalOES Fire and Rescue, FIRESCOPE and State Fire Training.
  Rationale: Reflects the agencies that have authority over CICCS.

• Page 8: Authority
  Removes the reference to the California Public Health and Safety Code.
  Rationale: The Authority establishing the CICCS TF is adequately described in the narrative.

• Page 9: Program Administration and Accountability
  Adds under FIRESCOPE:
  FIRESCOPE works with SBFS and the CICCS Task Force to ensure an integrated process is provided to the California Fire Service and is responsible for:
  Rationale: to clarify the role of FIRESCOPE and CICCS.

• Page 12: Training
  New wording.
  The two types of training that are identified in this guide are ‘required’ and ‘recommended’. Both types of training have several components integrated to ensure a quality training experience is provided. Those integrated components include: approved curriculum, a qualified instructor, and the issuance of proper completion certificates.
  It is the responsibility of the sponsoring department/agency, providing the training course, to ensure that the above three components are provided. The CICCS Peer Review committee is unable to recognize the training if an unapproved course is provided, the instructor is not certified, or an incorrect certificate is issued.
  Rationale: Clarity.

• Page 14: Instructors
  Removes the general guidelines for instructors and replaces them with links to NWCG Field Managers Course Guide, the SFT Procedures manual and the NIMS All-Hazard Position Training program.
  Rationale: maintains currency with the referenced documents and reduces the size of the document.

• Page 16: Required Training
Changes title of the receiving official of PACE V applications from Operations Chief to Task Force Manager.

Rationale: Consistency

- Page 16: Required Recurrent Training

Rationale: Removes required training such as RT-130 from positions that do require the position for consistency. Adds Agency Determined Training the consists of any additional training specific to the sponsoring Department/Agency.

- PTB requirements

Page 18: Adds PTB requirements section.

PTB Requirements:

- Only the Chief Administrator, or their Designee, of the sponsoring Department/Agency has the ability to initiate PTBs.
- The trainee status date begins when the position initiation and certification is completed by the training officer and the employee is entered into ROSS in that ICS position.
- Once a PTB is initiated, a trainee will continue with that PTB until completion (if they are within timeframes) regardless of whether there are new requirements for that position.
- For Command & General (C&G) Staff Positions, completion of O-305, S-420, S-520, S-620, CIMC, or AAIM is not a requirement for task book initiation. This procedure allows trainees to gain experience that prepares them for passing these advanced courses.

Page 18 & 19: Adds PTB completion section.

- PTB Completion:
  - PTBs for the Air Operations positions must be completed within 3 years.
  - PTBs for all other positions must be completed within 5 years.
  - With concurrence of the appropriate Peer Review Committee, the Chief Administrator or their Designee may grant an extension to the completion of a PTB. Extensions will be granted in 1-year increments, to a maximum of 5.
  - PTBs not completed within the specified timeframes may require an individual to meet the current adopted training/experience qualification standard.
  - A minimum of two quality assignments is required for an applicant to be considered for certification. Quality assignments include those that exercise the full range of responsibilities of the assigned trainee positions. The appropriate Peer Review Committee should evaluate each application based on the complexity of the assignments submitted for certification.
  - All hazard incidents shall be considered when evaluating applications for certification.
  - Every assignment requires a completed ICS 225 Form (Appendix D).
To receive the proper documentation and improve the quality of the trainee assignment, a trainee shall check in with the assigned Training Specialist (TNSP) at an incident when a TNSP is assigned.

All documentation in a PTB must be legible. This includes the printed name of the evaluator and their signature.

Each task in the PTB must be individually dated and initialed by the evaluator.

The CICCS Task Force approves PTBs for use in the certification/qualification process.

Rationale: Clarification and simplification.

Page 21: Transferring Qualifications:
Changes the process to move from a non-CICCS participating agency, such as CAL FIRE or a Federal agency, to a CICCS participating agency.

- Type 1 and other PACE V reviewed position applications will be sent directly to the PACE V Committee.
- Type 2 and other regionally reviewed position applications will be sent directly to the appropriate Regional Peer Review Committee.
- Positions reviewed at the Operational Area will continue to be reviewed at the Operational Area.
- The Peer Review Committee may require additional information or documentation in addition to that listed above.

Rationale: Simplification of the transfer process.

Page 22: Currency

- Functioning in a position while participating in a documented scenario-based exercise or drill.
  
  *Example: Currency for a Resources Unit Leader (RESL) can be maintained by:*
  
  - Reference 310-1
  
  - Demobilization Unit Leader (DMOB)
  
  - Planning Section Chief Type 1 (PSC1)
  
  - Planning Section Chief Type 2 (PSC2)
  
  - Planning Section Chief Type 3 (PSC3)
  
  - Status/Check-In Recorder (SCKN)

Rationale: Matches list order in the qualifications for RESL

Page 25: Incident Complexity

Removes:

The complexity numbering scale of one to five “incident types”, the most serious or complex incident is labeled with a number one (1) and the least complex incident is labeled with a number five (5).

The following chart includes sets of contributing indicators for each of the five complexity types. The person responsible for determining incident complexity should analyze the general span of control indicators specific to the actual or potential incident. This person will need to make a determination about what indicators the incident displays at a given time. Every indicator shown in the chart for a complexity level does not need to be present for that particular incident or complexity level to be selected.
An incident’s complexity can change. A Type 3 incident may be reduced to a Type 5 as the incident is managed, or it might also grow, or be forecasted to grow, to become a more complex incident. After shocks, for instance, may add more complexity to an earthquake event which initially indicated a Type 3 incident response. Incident managers will continuously review all indicators to ensure that the incident can be managed properly with the right resources regardless of how complex.

Refer to the following link for a complete listing of ‘Complexity Indicators’.

FEMA
https://emilms.fema.gov/IS200b/ICS0106320text.htm

Rationale: Reduces size of the document and currency of the complexity indicators is maintained by NWCG and FEMA rather than CICCS.

Page 26: Committee Make-up / Members
Adds definitions to:

- City Fire Department
  (Municipal function of a city or town)
- Metro Fire Department
  (Department with more than 350 personnel)
- Fire Protection District
  (Political subdivision that has its own governing body separate from a town or city)

Rationale: Clarification of terms

Page 27: Committee Formation

Adds flexibility to committee formation.

The review committee formation process begins with the Operational Area Coordinator or Regional Coordinator. The coordinator will initiate the following sequence of events to formulate the Peer Review Committees.

- Peer review Committees will be established at the Operational Area, Region and State Level.
- The Operational Area Coordinator or Regional Coordinator announces the opportunity to participate on the committee and accepts applications for committee membership from applicable organizations/agencies from within the boundaries of the review area.
- Operational Area Coordinator/Regional Coordinator makes the initial appointments to the Peer Review Committee.
- The Committee Members elect a Chairperson who shall be from a CICCS participating department/agency.
- The Chairperson Serves a one two year term or longer at the approval of the rest of the Peer Review Committee
- Committee Members serve a two year term or longer at the approval of the rest of the Peer Review Committee
A primary responsibility of CICCS is the delegated authority to Cal OES Operational Area and Region Peer Review Committees to oversee the certification process. Peer Review Committees need to adhere to the following guidelines and direction:

- Peer Review Committees exist to maintain the professional standards and integrity of the California Incident Command Certification System. It is their responsibility to ensure applicants for certification receive proper consideration and a thorough review of documented position performance.

- The Peer Review Committee members represent the area or agency and do not need to be qualified in all of the ICS positions *(although that is helpful)*. Peer Review Committees should consult qualified subject matter experts, in the positions being reviewed, if the expertise does not reside on the committee when reviewing applications for certification.

- Peer Review Committees will meet at least annually; however, it is recommended that additional meetings be scheduled to allow for timely review of applications and maintenance review work pertaining to the ROSS.

- Any questions a Peer Review Committee might have regarding a process or procedure should be referred to the next higher-level committee or the CICCS Task Force for assistance.

- Peer Review Committees, with the approval of the applicant’s Chief/Administrator, may require that trainees be vetted through the peer review process prior to their qualification status being updated in ROSS.

- Each Peer Review Committee shall submit their membership roster to the CICCS Task Force by July 1st of each year.

- Annually, Peer Review Committees will submit a list of qualified personnel and trainees to the next higher Peer Review Committee.

- Operational Area and Region Peer Review Committees cannot be less restrictive than this Guide.

- Operational Area and Region Chiefs/Administrators can set direction for their review committees to ask for additional training, experience, or other requirements if the Chiefs/Administrators decide that it is in the best interest of their Operational Area or Region. In doing so, Peer Review Committees may create undesired constraints and barriers to advancement in the qualifications system.

- Any committee member that has an application to be reviewed must be excused during their application review process.

- To maintain the integrity of the system, Operational Area and Region Peer Review Committees should conduct an annual audit to validate who holds qualifications in ROSS.

- It is recommended that each Operational Area establish a web page that includes frequently asked questions (FAQs), applications, and links to related sites.

- It is strongly recommended that committee members remain open to receive communications and questions, from the Operational Area or Region on subjects pertinent to CICCS process, throughout the year.

- It is recommended that each sponsoring Department/Agency create their own internal review committee to review their responsibility positions, and all CICCS applications that will be sent to the external Peer Review Committees to ensure the applications are complete.

Rationale: Simplification and clarification.
Page 29: Committee Quorum
A simple majority (50% plus 1) of the committee membership shall be a quorum.
Replaces:
A simple majority of the committee membership shall be a quorum. *(Page 14, SFM Procedures Manual)*
Rationale: Consistency with SFM Procedures Manual.

Page 29: Committee Position Review Responsibilities

Removes Course numbering (100/200) etc…
There are four levels of CICCS application review:

- The sponsoring Department/Agency
- The Operational Area
- The Region
- The State

Rationale: The NWCG course numbering system does not correspond in some cases to what level an application is reviewed.

The following lists are separated into the above outlined review committees. When a new position is identified, the CICCS Task Force will determine which level of peer review will perform the CICCS application review and certification.

The sponsoring Department/Agency will be responsible for the review and certification of the following:

- Agency Representative (AREP)
- Crew Boss (CRWB)
- Engine Boss (ENGB)
- Engine Operator (ENOB)*
- Firefighter Type 1 (FFT1)
- Firefighter Type 2 (FFT2)
- Incident Commander Type 4 (ICT4)
- Incident Commander Type 5 (ICT5)

*ENOP position qualifications are determined by the sponsoring Department/Agency.
The sponsoring Operational Area Peer Review Committees will be responsible for the review and certification of the following:

- Aircraft Base Radio Operator (ABRO)
- Aircraft Dispatcher (ACDP)
- Aircraft Time Recorder (ATIM)
- Base/Camp Manager (BCMG)
- Claims Specialist (CLMS)
- Communications Unit Leader (COML)
- Compensation/Claims Unit Leader (COMP)
- Compensation for Injury Specialist (INJR)
- Cost Unit Leader (COST)
- Damage Inspection Specialist (DINS)
- Damage Inspection Technician (DINT)
- Deck Coordinator (DECK)
- Demobilization Unit Leader (DMOB)
- Display Processor (DPRO)
- Division/Group Supervisor (DIVS)
- Documentation Unit Leader (DOCL)
- Equipment Manager (EQPM)
- Equipment Time Recorder (EQTR)
- Expanded Dispatch Recorder (EDRC)
- Expanded Dispatch Support Dispatcher (EDSD)
- Facilities Unit Leader (FACL)
- Felling Boss (FELB)
- Field Observer (FOBS)
- Finance Section Chief Type 3 (FSC3)
- Fireline EMT (EMTF)
- Fireline Paramedic (EMPF)
- Fire Effects Monitor (FEMO)
- Firing Boss (FIRB)
- Food Unit Leader (FUDL)
- Geographic Information System Specialist (GISS)
- Ground Support Unit Leader (GSUL)
- Heavy Equipment Boss (HEOB)
- Helibase Radio Operator (HERO)
- Helicopter Crewmember (HECM)
- Helicopter Manager Single Resource (HMGB)
- Human Resource Specialist (HRSP)
- Incident Commander Type 3 (ICT3)
- Incident Communications Manager (INCM)
- Incident Communications Technician (COMT)
- Logistics Section Chief Type 3 (LSC3)
- Medical Unit Leader (MEDL)
- Operations Section Chief Type 3 (OSC3)
- Ordering Manager (ORDM)
- Personnel Time Recorder (PTRC)
- Planning Section Chief Type 3 (PSC3)
- Procurement Unit Leader (PROC)
- Public Information Officer Type 3 (PIO3)
- Public Information Officer (PIOF)
- Radio Operator (RADO)
- Rapid Extraction Module (XXXX)
- Rapid Extraction Module Leader (XXXX)
- Receiving and Distribution Manager (RCDM)
Resources Unit Leader (RESL)
Safety Officer Type 3 (SOF3)
Safety Officer, Line (SOFR)
Security Manager (SECM)
Single Engine Air Tanker Manager (SEMG)
Situation Unit Leader (SITL)
Staging Area Manager (STAM)
Status Check-in Recorder (SCKN)
Strike Team Leader Crew (STCR)
Strike Team Leader Engine (STEN)
Strike Team Leader Heavy Equipment (STEQ)
Supply Unit Leader (SPUL)
Take-off and Landing Coordinator (TOLC)
Task Force Leader (TFLD)
Time Unit Leader (TIME)

The Cal OES Regional Area will be responsible for the review and certification of the following:
Air Operations Branch Director (AOBD)
Air Support Group Supervisor (ASGS)
Air Tactical Group Supervisor (ATGS)
Expanded Dispatch Coordinator (CORD)
Finance/Administration Chief Type 2 (FSC2)
Helibase Manager 1 (HEB1)
Helibase Manager 2 (HEB2)
Helicopter Coordinator (HLCO)
Incident Commander Type 2 (ICT2)
Liaison Officer (LOFR)
Logistics Chief Type 2 (LSC2)
Operations Branch Director (OPBD)
Operations Section Chief Type 2 (OSC2)
Planning Section Chief Type 2 (PSC2)
Prescribed Fire Burn Boss Type 1 (RXB1)
Prescribed Fire Burn Boss Type 2 (RXB2)
Prescribed Fire Manager Type 1 (RXM1)
Prescribed Fire Manager Type 2 (RXM2)
Public Information Officer Type 2 (PIO2)
Safety Officer Type 2 (SOF2)
Structure Protection Specialist (STPS)
Training Specialist (TNSP)

The SFT and PACE V Committee will be responsible for the review and certification of the following:
Area Commander (ACDR)
Area Command Aviation Coordinator (ACAC)
Area Command Logistics Chief (ACLC)
Area Command Planning Chief (ACPC)
Finance/Admin Section Chief Type 1 (FSC1)
Fire Behavior Analyst (FBAN)
Incident Business Advisor Type 1 (IBA1)
Incident Business Advisor Type 2 (IBA2)
Incident Commander Type 1 (ICT1)
Logistics Section Chief Type 1 (LSC1)
Long Term Fire Analyst (LTAN)
Operations Section Chief Type 1 (OSC1)
Planning Section Chief Type 1 (PSC1)
Public Information Officer Type 1 (PIO1)
Safety Officer Type 1 (SOF1)
Strategic Operational Planner (SOPL)

Adds to the end of the Committee Review Responsibilities section:

Also note there are Incident Command Positions not addressed in the CICCS Qualification Guide because there is little demand for the qualification by local government, or the position is specific to a single agency.

With:

The CICCS process begins with the application, which can be viewed or downloaded at: http://www.firescope.org/specialist-groups/ciccs/ciccs.htm. The application is required to be typed. A sample of a properly filled out CICCS application is provided in Appendix C.

- In addition to the completed CICCS application, the following information is also required:
  - A complete copy of the PTB
    A copy of a properly filled out PTB can be found in Appendix D.
  - ICS 225 Forms
    The incident, where the qualification was recommended by the trainer, is required to have a performance evaluation submitted. The name of the trainer and evaluator must be legibly written.

The CICCS Peer Review Committee will receive applications from the member departments/agencies. During the Peer Review Committee meetings, the following procedures will be followed or accomplished:

- The committees will review CICCS applications for certification and trainee packages (where applicable).

- Determine that the applicant meets the CICCS standards for certification or trainee status (where applicable).
The chairperson notifies the applicant and or their chief/administrator or designee of the results of the peer review.

The committee will award a CICCS certificate upon successful committee evaluation and approval, and, in the case of a trainee, will recommend their entry into ROSS.

The CICCS Peer Review Committee will receive applications from the member Departments/Agencies. During the Peer Review Committee meetings, the following procedures will be followed/accomplished, where applicable:

- The committee will review CICCS applications for certification, and trainee packages.
- The committee will determine if the applicant meets the CICCS standards for certification or trainee status.
- The chairperson will notify the applicant and or their Chief/Administrator or Designee of the results of the peer review.
- The committee will award a CICCS certificate upon successful committee evaluation and approval and, in the case of a trainee, will recommend their entry into ROSS.
  
  Note: PACE V certificates are issued by the State Fire Marshal.

- The committee will use Subject Matter Experts during the review process to ensure the Peer Review Committee has the level of expertise necessary to review positions.

Page 36: CICCS Certificates

Replaces:

Once a CICCS application has been approved by any of the review committees, that committee will issue a CICCS certificate. The CICCS certificate will indicate the ICS position and will be signed by the chairperson of the review committee. The certificate will be issued through the authority of the SFM. Completed/signed certificates will be sent to the sponsoring department/agency for distribution to the certified individual.

Peer Review Committees can obtain blank certificates from their respective Cal OES Region Assistant Chief.

Departments/agencies are responsible for issuing certificates indicating certification for the positions they are responsible for as outlined earlier in this Guide. Departments/agencies will be required to issue certificates for these positions so they can be included in CICCS applications for higher-level positions.

Departments/Agencies are responsible for issuing certificates, for the positions they are responsible for, as outlined earlier in this Guide. Departments/Agencies will be required to issue certificates for these positions so they can be included in CICCS applications for higher-level positions.

Once a CICCS application has been approved by any of the review committees, that committee will issue a CICCS certificate. It will include the ICS position, signature of the chairperson of the review committee,
and will be issued through the authority of the SFM. Completed/signed certificates will be sent to the sponsoring Department/Agency for distribution to the certified individual.

Note: Peer Review Committees can obtain blank certificates from their respective Cal OES Region Assistant Chief.

Page: 36 & 37: Incident Qualifications System (IQS)

The Incident Qualifications System (IQS) is the CICCS recommended system for maintaining certification records. IQS tracks all management personnel, training, assignments and qualifications. Incidents with an ICS form 225 can be entered into IQS and the program will automatically update an individual’s records. Some of the advantages of IQS are that it limits corruption from outside the system, limits the number of persons who can update system and improves working with ROSS dispatching system. Each sponsoring department/agency should designate a person to manage IQS to maintain the accuracy and integrity of the system. Information about IQS can be found at www.vdatasys.com.

With:

IQS & ROSS

Incident Qualification System (IQS) is a software program that allows the home agency to manage qualifications, experience, task books, and fitness levels for personnel. The IQS is the CICCS recommended system for maintaining certification records. IQS directly interfaces with Resource Ordering Status System (ROSS) to maintain certification records.

Page 36: IQS and ROSS

IQS has begun the transition of all California Agencies to the IQSweb/ROSS interface. Agencies are encouraged to visit the IQS website for further information http://www.vdatasys.com/index.htm

With:

CICCS & ROSS

A review of personnel qualifications in ROSS should be performed annually by each CICCS Peer Review Committee to ensure accuracy. This must be coordinated with the Cal OES Fire and Rescue Operational Area and Region Coordinators and sponsoring Department/Agency IQS coordinators.

Page 37: Qualification Cards

Agencies are required to have qualification cards or other proof of qualifications at all times when responding outside of their home jurisdiction. If an individual does not have a qualification card they may be denied an incident assignment until they provide proof of qualification. Qualification Cards will be issued yearly. An example of a qualification card can be found in Appendix F and on the FIRESCOPE website:

(http://www.firescope.org/specialist-groups/ciccs/ciccs.htm) or at the CalOES Fire and Rescue Operations page (http://www.caloes.ca.gov/cal-oes-divisions/fire-rescue/fire-operations) additionally, an example is in the Incident Qualifications Program (IQS). The IQS program provides a platform to print qualification cards for a sponsoring department/agency. The chief/administrator may delegate authority to sign an Incident Qualification Card to department training or other designee.

The chief/administrator shall ensure that certification/qualification records are maintained and shall issue a qualification card annually to each currently qualified individual. The card shall contain, at a minimum:

- Individual's name
- Sponsoring department/agency
- Expiration date
- Qualified positions
- Trainee positions
- Physical fitness level
- Signature of qualifying official

Qualification cards will need to be available whenever an individual is assigned to an incident. The cards will need to be available for both qualified and trainee positions.

Adds to the separation page between the administrative portion and position portion of the Qualification Guide:

Note: There are Incident Command Positions not addressed in the CICCS Qualification Guide because there is little demand for the qualification by local government, or the position is specific to a single agency.

For positions not otherwise identified in this guide, please refer to CAL FIRE 4039 and/or NWCG 310-1.

Significant Position Guide Changes

Multiple Disciplines:

- Add a new heading to all positions: Required Recurrent Training: this heading will indicate whether RT-130 is required for a position and indicates that agency specific training is allowed. Rationale: Many positions in the Guide do not require exposure to the incident. Agencies may decide that their employees are required to take RT-130 or have an agency alternative course.
- Add N9025 to the equivalency matrix: Rationale: Reflects a change in NWCG curriculum.
• Add I-300 to: STEN, STCR, STEQ, TFLD, DIVS, All Unit Leader positions (SITL, DMOB, RESL, DOCL, MEDL, COML, FDUL, SPUL, FACL, GSUL, COST, COMP, PROC:
  Rationale: consistency in where I-300 is introduced in ICS position progression.

• Delete the reference to the COMET course:
  Rationale: COMET refers to an online Fire Behavior Course. There is now an online NWCG S-290 Course that replaces COMET.

Command
• Reformat ICT3 Required experience to look like ICT2.
  Rationale: Maintains consistency within the document.

• Incident Commander Type 3 (ICT3):
  Adds Extended Attack Incident Commander (S-300) as an alternative to All-Hazard Incident Commander (G/E/L 950) in Required Training.

• Removes Incident Commander Type 5.
  Rationale: Infrequent use by local government.
Changes the requirements of All-Hazards Safety Officer Type 3 (SOF3) from:

**REQUIRED TRAINING**
Advanced ICS (I-400)
All Hazard Incident Management Training (O305), or Command and General Staff (S-420)
Safety Officer (S-404), or All Hazards Safety Officer (G/E/L-954)
Annual Fireline Safety Refresher Training (RT-130)
To:

**REQUIRED TRAINING**
Intermediate ICS (I-300)
All-Hazards Incident Management Training (O-305)
Safety Officer (S-404) OR
All-Hazards Safety Officer (G/E/L-954)

Note: All-Hazards Safety Officer Type 3 (SOF3) is not reciprocal with Safety Officer, Line (SOFR)

**Adds:** to Safety Officer, Line (SOFR)
Note: All-Hazards Safety Officer Type 3 (SOF3) is not reciprocal with Safety Officer, Line (SOFR)

**Changes All-Hazard Public Information Officer Type 3 (PIO3) from:**

**REQUIRED TRAINING**
Introduction to ICS (I-100)
Basic NIMS/ICS (I-200)
Intermediate ICS (I-300)
NIMS an Introduction (IS-700)
National Response Framework (IS-800B)
Advanced ICS (I-400)
All Hazard Incident Management Training O305 (or S-420)
Public Information Officer (G/E/L-952) or Information Officer (S-403)

To:

**REQUIRED TRAINING**
Introduction to ICS (I-100)
Basic ICS (I-200)
Intermediate ICS (I-300)
NIMS an Introduction (IS-700)
All-Hazard Incident Management Training (O-305)
Public Information Officer (G/E/L-952)

**Liaison Officer-reorders list of required list of courses and required experience.**

**HRSP- move Human Resources Specialist from Planning Section to Command:**
Rationale: Reflects who the HRSP in practice reports to (either the IC or Deputy IC)
Prescribed Fire:
- Delete Prescribed Burning positions (Prescribed Fire Manager 1 and 2 and Prescribed Burn Boss 1 and 2) from CICCS Qualifications Guide:
  Rationale: Prescribed Fire positions will reference NWCG requirements. There are few local government agencies that require these positions and the amount of time and budget to maintain the required courses is not feasible for CICCS.

Operations/Air Operations:
- Remove I-300 from: ENGB, FIRB, FELB, HMGB, HEQB, ABRO:
  Rationale: consistency in where I-300 is introduced in ICS position progression.
- Change S-336 to N-9025 (Tactical Decisions and Sand Tables):
  Rationale: Reflects a change in NWCG curriculum. S-336 was dropped by NWCG as a required course. Using N9025, that contains much the same material, will continue to provide a high level of tactical exercise and learning.
- Change Ignition Operations (S-234) throughout the document to: Firing Operations (S-219):
  Rationale: NWCG has removed S-234 from their curriculum and substituted S-219.
- All Hazards Operations Section Chief Type 3 (OSC3)
  Delete "or Command and General Staff (S-420)" from required training.
  Rationale: S-420 is difficult to attend and is intended for those pursuing Type 2 qualifications.

Operations Branch Director (OPBD)
- Adds Advanced ICS (I-400) to required training.
  Rationale: if an individual is going to be an OPBD without first going through OSC2 they would miss the requirement for I-400 that is in OSC2.
- DIVS: Remove "Option 3" (Not the option, but rather the heading)
  Rationale: Consistency of presentation in the parent document.
  Change G/E/L 958 to G/E/L 960.

- Adds new position:
  Task Force Leader, Water Carrying [TFLW]

REQUIRED TRAINING
Intermediate ICS (I-300)
Firing Operations (S-219)
Basic Air Operations (S-270)
Intermediate Wildland Fire Behavior (S-290)*
FIRESCOPE All-Risk Task Force/Strike Team Leader (AH-330)

REQUIRED EXPERIENCE
Qualified as an Engine Boss, Single Resource (ENGB)
+ Successful position performance as a Strike Team Leader Engine (STEN)

REQUIRED RECURRENT TRAINING  Annual Fireline Safety Refresher Training (RT-130)
FITNESS LEVEL
Arduous

OTHER POSITION ASSIGNMENTS THAT WILL MAINTAIN CURRENCY
Strike Team Leader (STCR, STEQ)
Any higher position for which this position is a prerequisite

RECOMMENDED TRAINING WHICH SUPPORTS DEVELOPMENT OF KNOWLEDGE AND SKILLS
Demonstrated Knowledge of Certifications Qualifications Systems Fireline Leadership (L-380)
Tactical Decisions & Sandtable (N-9025)

* The online NWCG S-290 course does not meet the requirement for this position. Only the full NWCG OR SFT classroom version is acceptable.

**A Qualified STEN shall have the ability to function as a TFLD specific to water handling apparatus.

***Concurrent qualification with Strike Team Leader, Engine (STEN). (pending approval)

• Dozer Boss: Change (S-232) to Heavy Equipment Boss (S-236):
  Rationale: NWCG replacement course to reflect the changing nature of firefighting equipment.

  Firefighter 1:
  Replaces:

REQUIRED TRAINING
Firefighter Training (S-130)
Firefighter Type 1 (S-131)
Look Up, Look Down, Look Around (S-133)
Annual Fireline Safety Refresher Training (RT-130)

OR

SFM Firefighter 2 (FF2)

+ Wildland Training for Structural Firefighters (G-131)
Annual Fireline Safety Refresher Training (RT-130)
With:
Firefighter Type 1 - [FFT1]

REQUIRED TRAINING
Basic ICS (I-200)
Firefighter Type 1 (S-131)
Portable Pumps and Water Use (S-211)
Wildland Fire Chain Saws (S-212)
OR
State Fire Marshal (SFM) Wildland Firefighter 2

REQUIRED EXPERIENCE
Qualified as a Firefighter Type 2 (FFT2)
+
Successful position performance as a Firefighter Type 1 (FFT1)

REQUIRED EXPERIENCE
Qualified as an NWCG Firefighter Type 2 (FFT2)
OR
Qualified as a SFM (FF1)
+
Successful position performance as a NWCG Firefighter Type 1 (FFT1)
OR
Qualified as a SFM Firefighter 2 (FF2)
Rationale: Alignment with State Fire Training requirements.

- Firefighter 2 (FF2):
  Removes I-200 from required training/
  Rationale: consistency within the qualifications guide.

- Helicopter Manager Type 1 (HEB1): Change to 6+ from 4+:
  Rationale: NWCG change in complexity.

- Helicopter Manager Type 2 HEB2: Change to 1-5 from 1-3:
  Rationale: NWCG change in complexity.

  Helicopter Manager, Single Resource (HMGB): removes I-300 from required training.
  Rationale: consistency within the qualifications guide.

- Removes Single Engine Air Tanker (SEMG), Load Master (LOAD), Parking Tender (PARK) and
  Helibase Radio Operator (HERO).
  Rationale: these positions are seldom if ever used by Local Government.

Planning
- Adds Damage Inspection Specialist (DINS) and Damage Inspection Technician (DINT) to
  CICCS positions.
  Rationale: New FIRESCOPE approved positions.

- Planning Section Chief Type 2 PSC2 Remove “S-440 (Bridge Course)” from Required Training:
Rationale: This was a onetime only course.

- **Planning Section Chief Type 3 PSC3:**
  Changes I 400 to I-300.
  Rationale: Consistency within the qualifications guide.
  Removes S420 from the required training section.
  Rationale: S-420 is difficult to attend and is intended for those pursuing Type 2 qualifications.
  Add language to PSC3 Required Experience as an “OR”
  Complete All Hazards Resource Unit Leader (G/E/L 965) +
  Complete All Hazards Situation Unit Leader (G/E/L 964)
  Rationale: Having the only experience option of Qualified Resource Unit Leader was too difficult for many agencies developing teams. Training in the Unit Leader positions is an alternative to assist making the Type 3 PSC successful by understanding the requirements of the subordinate positions.

- **Situation Unit Leader (SITL):** Remove S-346 from required training.
  Rationale: NWCG has dropped the course and adopted (G/E/L 964).

- **Field Observer (FOBS):** Replace requirement for GPS Course and Map and Compass for Wildland Firefighters with Basic Land Navigation (PMS-475). Move sGPS Course to recommended.
  Rationale: There is no approved GPS Course for firefighting.

- **Geographic Information System Specialist (GISS):** Removes (IS 800B).
  Rationale: Consistency within the Qualifications Guide.

- **DMOB-Remove Resources Unit Leader (S-349) from required training, replace with All-Hazard Unit Resource Leader (G/E/L – 965):**
  Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS course by NWCG.

- **Resource Unit Leader (RESL):** Remove Resources Unit Leader (S-349) from required training and replace with (G/E/L 965):
  Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS course by NWCG.

- **Training Specialist (TNSP):** Add to recommended training: Demonstrated Knowledge of Certifications and Qualifications Systems.
  Rationale: There is a recognized lack of knowledge of the different systems by Training Specialists.

**Logistics Section**

- **Logistics Section Chief Type 1,2,3 (LCS1, 2 & 3):**
  Under Required Training remove reference to S-450 Logistics Section Chief training to (G/E/L 967).
  Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS course by NWCG.

Logistics Section Chief Type 3 (LCS3): Remove S-420 from required training.
Rationale: S-420 is difficult to attend and is intended for those pursuing Type 2 qualifications.
Add language to LSC3 Required Experience as an “OR”
Complete All Hazards Complete Supply Unit Leader (G/E/L-970)

+ Complete All Hazards Facilities Unit Leader (S-354 or G/E/L-971) Classes
Rationale: Having the only experience option of Qualified Supply Unit Leader was too difficult for many agencies developing teams. Training in the Unit Leader positions is an alternative to assist making the Type 3 LSC successful by understanding the requirements of the subordinate positions.

- MEDL- Add Fireline Medic (S-223) to Required Training:
  Rationale: there is now an approved Fireline Medic course and the Medical UL needs to have the same training as their subordinates.
- Change FEMT to EMTF:
  Rationale: consistency with national naming conventions.
- Change FEMP to EMPF:
  Rationale: consistency with national naming conventions.
  (note: the change to line medics and EMT's is due in part to the CICCS acronyms were not being recognized in ROSS that in some cases passed over in state resources for outside resources)
- Move EMTF & EMPF from agency review to Op Area review:
  Rationale: there are now new course requirements, S-223 and S-290 Classroom and a Position Task Book that require a higher level of review.
- Remove asterisk and the following notes in EMTF & EMPF regarding the S-223 class and PTB:
  Once a Fire Line Emergency Technician class is approved through FIRESCOPE, it will be a required class for FEMT or FEMP.
- Once a PTB for the FEMT or FEMP position has been approved by FIRESCOPE the PTB will be required to be completed for certification.
  Rationale: There is now an approved Fireline Medic Course and PTB.
- EMTF and EMTP: Add “Classroom Only” to the S-290. Remove “Online”:
  Rationale: Consistency with other single resources with line assignments.
- EMTF-Add: Successful position performance as a Fire Line Emergency Medical Technician (EMTF):
  Rationale: Maintains consistency within the document.
- Add Rapid Extraction Team Member and Rapid Extraction Team Leader to CICCS positions:
  Rationale: New FIRESCOPE approved positions
- SPUL-Remove Supply Unit Leader (S-356) from Required training:
  Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS Supply Unit Leader course (G/E/L 970) by NWCG.

- FSC2 – Remove, “Finance/Administration Section Chief (S-460) OR, under Required Training:
  Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS Finance/Administrative Section Chief course (G/E/L 973) by NWCG.
- FSC3-Remove, “Finance/Administration Section Chief (S-460) OR, under Required Training.
  Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS Finance/Administrative Section Chief course (G/E/L 973) by NWCG.
Replace:

**REQUIRED TRAINING**
Finance/Administration Section Chief (S-460)

**OR**
All-Hazards Finance/Administration Section Chief (G/E/L-973)
Command and General Staff (S-420)

**OR**
All Hazard Incident Management Training (O305)
Advanced ICS (I-400)

**REQUIRED EXPERIENCE**
Qualified as a Cost Unit Leader (COST)

+ Successful position performance as a Finance/Administration Section Chief Type 3 (FSC3)

**OR**
Qualified as a Finance Unit leader (FEMA)

+ Successful position performance as a Finance/Administration Section Chief Type 3 (FSC3)

With:

**REQUIRED TRAINING**
All-Hazard Incident Management Training (O-305)
All-Hazards Finance/Administration Section Chief (G/E/L-973)

**REQUIRED EXPERIENCE**
Qualified as a Cost Unit Leader (COST)

+ Successful position performance as a Finance/Administration Section Chief Type 3 (FSC3)

**OR**
Complete All-Hazards Finance/Administrative Unit Leader (G/E/L-975)

+ Successful position performance as a Finance/Administration Section Chief Type 3 (FSC3)

Add language to FSC3 Required Experience as an "OR"
Complete All Hazards Complete Finance/Administrative Unit Leader (G/E/L-975)

+ Complete All Hazards Finance/Administrative Unit Leader (G/E/L-975) Class

Rationale: Having the only experience option of Qualified Finance/Administrative Unit Leader was too difficult for many agencies developing teams. Training in the Unit Leader positions is an alternative to assist make the Type 3 LSC successful by understanding the requirements of the subordinate positions.
• Remove Finance Administration Unit Leader (FAUL), Incident Business Advisor Type 1 and Incident Business Advisor Type 2.
Rationale: These positions are not used by Local Government.

• TIME-Remove Finance/Administration Unit Leader (S-360), Add Finance/Administration Unit Leader (G/E/L-975):
Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS Finance/Administrative Section Chief course (G/E/L 973) by NWCG.

• COMP-Remove Finance/Administration Unit Leader (S-360), Add Finance/Administration Unit Leader (G/E/L-975):
Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS Finance/Administrative Section Chief course (G/E/L 973) by NWCG.

• PROC-Remove Finance/Administration Unit Leader (S-360), Add Finance/Administration Unit Leader (G/E/L-975).
Rationale: Change in NWCG curriculum to reflect the adoption of the NIMS Finance/Administrative Section Chief course (G/E/L 973) by NWCG.

Dispatch:
• Remove the Incident Dispatcher (INDI) position from the CICCS Qualifications Guide.
Rationale: This position was removed by NWCG and was, as far as the CICCS TF can determine, seldom if ever used.

**Background & History**

After Action Reports (AAR) from incidents in the early 1990’s cited ICS training deficiencies that may have led to near misses, accidents and injuries. To address this concern, a meeting was held in 1995, with 230 representatives from the State Fire Marshal’s Office (SFMO), California Office of Emergency Services (Cal OES), Cal Chiefs and State Training Officers to discuss the use and implementation of ICS and to discuss the creation of a system to standardize certification and qualifications for Incident Command Systems (ICS) positions specific to California.

After the October 1996 Calabasas Fire, a task force of the involved agencies developed the Calabasas Fire Report. A total of 56 recommendations were presented to enhance fire agencies’ capability to combat wildland fire incidents and provide for the safety of personnel. There was an agreement by the agencies that the 12 highest priority recommendations be forwarded to Firefighting Resources of California Organized for Potential Emergencies (FIRESCOPE) for review and implementation statewide.

In April of 1997, the Cal OES Fire & Rescue Service Advisory Committee/FIRESCOPE Board of Directors were presented with the findings of the Calabasas Fire Report. Three of the recommendations involved “Development of qualifications & experience requirements for all firefighters responding to mutual aid wildland/urban interface incidents.”

In June 1997, Art Cota, the Training Chief for the SFMO presented a recommendation to the FIRESCOPE Board of Directors that “The Board of Directors should appoint members to a working group chaired by SFMO to develop standards for all-risk incident management using the National Wildfire Coordinating Group (NWCG) Positions Qualification Guide or PMS 310-1 as a model.” In October 1997, Cal OES Fire & Rescue Service Advisory Committee/FIRESCOPE Board of Directors agreed the SFMO should lead the development of State of California Incident Management Certification and Qualification for the State.

In 1998, the California Incident Command Certification System (CICCS) Task Force was established with representatives from across the State. In 1999, the CICCS Task Force presented recommendations to the State Board of Fire Services (SBFS) who agreed on the following elements:

- Voluntary fire department participation
- Historical recognition of prior experience
- Specific system components
- Use of NWCG 310-1 as a base document

The SBFS, Cal OES Fire & Rescue Service Advisory Committee and the FIRESCOPE Board of Directors adopted CICCS In November 2000. State Fire Training (SFT), and the Governor’s Office of Emergency Services Fire & Rescue Branch implemented the system in August 2002.
Introduction

The CICCS Incident Qualifications Guide was created when the SFMO tasked a subcommittee of the SBFS with developing a certification system that would enhance the state's ability to field adequately trained and qualified personnel resources for service throughout our emergency response system.

The CICCS Guide provides clear certification criteria, acknowledges individuals who have already completed equivalent training, recognizes individuals that have the appropriate training and are already functioning at these levels, and provides a road map for new resources to be certified.

The California Fire Service now has a document, that captures the NWCGs direction on wildland fire, the National Incident Management System (NIMS) all-hazard certification and qualification requirements, and is inclusive of a broad spectrum of services consistent with their all-hazard mission. The certification system is managed at the local, regional, and state levels. CICCS recognizes the voluntary nature of this program and the differences in the mission of local, state and federal wildland fire agencies.

The SBFS and the Cal OES Fire and Rescue Services Advisory Committee/FIRESCOPE Board of Directors have endorsed this CICCS Qualification Guide.

Authority

The CICCS Task Force is a sub-committee of the SBFS. The Board is chaired by the State Fire Marshal and comprised of representation from fire service labor, Fire Chiefs, fire districts, volunteer firefighters, city and county governments, CAL FIRE, Cal OES, and the insurance industry. The SBFS plays a major role in providing a state-level focus for resolving fire prevention and control issues affecting the entire fire service. The SBFS serves in an advisory capacity in such areas as the development of technical and professional performance standards for training fire service personnel, curriculum accreditation, establishing policy for the certification system for the California fire service, and other issues of importance.

The SFMO has delegated the administration of CICCS to SFT. SFT is the state certifying entity and serves on the CICCS Task Force (CICCS TF). The Task Force also functions as The Peer Assessment for the CICCS Evaluation Committee (PACE V), which is responsible for reviewing and certifying applications for ICS positions at the state level, and makes recommendations for certification to SFT. This process outlined in the SFT Procedures Manual.

**Objectives, Process & Design**

The objective of CICCS is to create a qualification system that meets the needs of the California Fire Service. The process uses the established organization and authorities of the SFMO and Cal OES.

Cal OES utilizes their affiliation with local Departments/Agencies to establish local and regional Peer Review Committees, made up of a cross section of Departments/Agencies located within the jurisdictional boundaries. Peer Review Committees act as the certifying component of the CICCS process and issue a SFMO certificate once an individual is determined to be certified for a CICCS position.

This single statewide system ensures a minimum standard for all personnel deployed to all-hazard incidents outside of their home Department/Agency area of responsibility, or jurisdiction.

**Program Administration & Accountability**

**Governor’s Office of Emergency Services**

Cal OES is responsible for the following components of the CICCS process:
- Establishing Operational Area and Regional Peer Review Committees
- Overseeing the peer review process
- Provide a statewide point of contact for CICCS
- Coordination of the CICCS Task Force
- Provide coordination of CICCS between Cal OES and SFMO
- Provide coordination of CICCS and FIRESCOPE
- Manage publications and documents of the CICCS Task Force

**FIRESCOPE**

FIRESCOPE works with the SBFS and the CICCS Task Force to ensure an integrated process is provided to the California Fire Service and is responsible for:
- Professional and technical information to the CICCS Task Force (through the Operations Team) on course development
▪ Assistance with the development of position requirements for Incident Management positions within California
▪ Responsibility for operations, development and maintenance of ICS and the Multi-Agency Coordination System (MACS) within California
▪ A common voice for the California Fire Service

State Board of Fire Services

The SBFS is responsible for and provides:
▪ The authority to create the CICCS program
▪ Reviews and approves the CICCS process

State Fire Marshal/State Fire Training

The SFMO is responsible for and provides:
▪ Guidance to the CICCS TF in the peer review process
▪ Certificates for Operational Area, Regional and State Peer Review Committees
▪ Establishment of the PACE V Committee to review Type 1, Area Command and unique position applications
▪ Assurance that the membership of the PACE V Committee meets the requirements as outlined in the SFT Procedures Manual

Fire Department/Agencies

Fire Department/Agencies choosing to participate in the CICCS process are responsible for and provide:
▪ Endorsement of the peer review process
▪ Education of their department on the process
▪ Maintenance of all training records pertinent to the CICCS process
▪ Issuance of certification and qualification cards, or other department approved documentation
- Assurance that personnel are entered into ROSS according to Operational Area and/or Regional procedure
- Accurate and complete application packets to the Peer Review Committees
- Provides representation to the Peer Review Committee when requested
- Incident position training
- Certification for positions at the Department/Agency level

**Fire Chiefs/Administrators**

The Fire Chief/Administrator provides final review and approval for qualification of their department personnel following the peer review process. The Fire Chief is responsible for and provides:

- Validation that personnel meet all the requirements as set forth in the CICCS
- Assurance that personnel meet the department’s physical fitness standards
- A signature on the application letter presented to appropriate Peer Review Committee
- Final review and approval for qualification of personnel following certification
- Certification, recertification and decertification

**Individuals Seeking Certification**

Individuals are responsible for and provide:

- Completion of all CICCS application requirements prior to submission.
- Maintenance of all of the original course completion certificates, performance evaluations and Position Task Books (PTBs)
- Assurance that all performance evaluations to maintain currency are submitted for documentation purposes to the appropriate person within the sponsoring Department/Agency
- Assurance that qualifications card/documents are accurate and current
- A properly initiated PTB when assigned as a trainee
System Description, Components & Process

Performance Based System

CICCS is a performance based qualification system and is not rank based. Qualification is based upon completion of required training and successful position performance demonstrated by completing the applicable PTB on all-hazard incidents, events, job activities, simulations, exercises, and/or classroom activities. Each of the tasks in PTBs have been developed by subject matter experts from a variety of agencies and geographical areas throughout the United States.

PTBs are used to document a Trainee’s performance in all critical competencies, behaviors and tasks that must be successfully completed in order to become certified in the position. Tasks may be evaluated through means such as a simulation, non-emergency events, or actual incidents which are required for tasks pertaining to tactical decision-making and safety.

The primary criteria for qualification are a properly initiated PTB and properly documented individual performance as observed by an evaluator qualified in that position or a higher-level position. Successful completion of all tasks required for the position form the basis for a recommendation for certification by the evaluator(s).

Training

The two types of training that are identified in this guide are ‘required’ and ‘recommended’. Both types of training have several components integrated to ensure a quality training experience is provided. Those integrated components include: approved curriculum, a qualified instructor, and the issuance of proper completion certificates.

It is the responsibility of the sponsoring Department/Agency, providing the training course, to ensure that the above three components are provided. Peer Review Committees are unable to recognize the training if an unapproved course is provided, the instructor is not certified, or an incorrect certificate is issued.

Approved Course Curriculum

It is recommended that Departments/Agencies provide classes offered through:

- NWCG – member agencies, or their designated partners
- SFT – Fire Service Training and Education Program (FSTEP)
- FEMA – National Fire Academy and Emergency Management Institute
- CAL FIRE - California Department of Forestry and Fire Protection
- CFFJAC – California Firefighter Joint Apprenticeship Committee
- FIRESCOPE – Firefighting Resources of Southern California Organized for Potential Emergencies
- Community Colleges

Approved course curriculum is made available from many different sources. A complete list of the equivalent approved courses is provided in the Equivalency Matrix found in Appendix A.

Approved courses have specific competency components that must be met in order to maintain the course’s approved objectives and intent. Each course must use a qualified instructor, teach to the course objectives, use the approved course materials and meet the classroom hour requirements. Instructors may add materials and classroom hours to the course as long as the original objectives and intent are met.

The requirements for the NWCG course can be found in the Field Managers Course Guide. ([https://www.nwcg.gov/publications/901-1](https://www.nwcg.gov/publications/901-1))

The CICCS TF recognizes that Departments/Agencies may have a need to use or develop an alternative or equivalent course based on curriculum availability and/or student and Department/Agency needs. An agency using alternative curriculum must have:

- A reason the alternative course was used or developed, or
- A benefit gained through the use of the alternative course, such as:
  - Cost savings
  - Broaden target audience
  - Enhanced learning experience for students

Should a Department/Agency desire to seek course equivalency, they must conduct a detailed analysis and document their findings. The analysis should follow these guidelines:

- All learning and performance objectives are met or exceeded in the equivalent course.
- The same minimum instructor qualifications required for the CICCS course apply to the equivalent course.
- Course prerequisites have not been altered.
- The equivalent course does not conflict or contradict established SFT, NWCG or FEMA guidelines and standards.

The analysis must be presented to the SFMO for consideration as outlined in the SFT Procedure Manual.
Instructors

New instructors for Incident Management courses are required to have their teaching abilities evaluated to ensure they meet the requirements as set forth by the organizations providing the approved course. Each organization has different requirements. Currently, there are several organizations that provide direction and guidelines for instructors.

New instructors for NWCG, SFT (FSTEP) and NIMS Position Specific Courses will need to comply with all of the guidelines presented in the appropriate manual(s) listed below:

- **NWCG: NWCG Field Managers Course Guide**  
  [https://www.nwcg.gov/publications/901-1](https://www.nwcg.gov/publications/901-1)

- **SFT: State Fire Training Procedures Manual**  

- **NIMS: NIMS ICS All-Hazard Position Specific Training Program**  
  [https://training.fema.gov/allhazards/](https://training.fema.gov/allhazards/)

Certificates

ICS training courses are the foundation of CICCS. When a CICCS application is submitted to the appropriate Peer Review Committee, the course completion certificate is the official document verifying successful completion of an approved course by a qualified instructor and is one of the cornerstones of the documentation package.

At a minimum, the course completion certificate will include the following information:

- Correct name of the ICS course
- Instructor’s name signed and legibly printed
- Instructor’s sponsoring Department/Agency
- ICS qualifications as it relates to the course instructed
- Hours of Instruction

It is recommended that Departments/Agencies provide classes offered through:

- NWCG member agencies or their designated approved partners
- SFT FSTEP Classes
- NIMS All-Hazard Position Specific Training through OES, State Training and the Emergency Management Institute
CFFJAC

Departments/Agencies

Operational Areas

Courses sponsored by a Department/Agency must meet the minimum requirements set by the organization that developed the course (i.e. for a NWCG course, the minimum requirements are listed in the Field Managers Course Guide).

Unless the course is sponsored by an NWCG member agency, or the lead instructor is an authorized representative of NWCG, issuance of a NWCG certificate of completion is not authorized.

If a Department/Agency elects to teach an NWCG course and they are not an NWCG member agency, following statement must be provided on the Department/Agency course completion certificate: “The course, instructor and curriculum meet the minimum standards set forth by NWCG in the FMCG”.

Required Training

Required Training provides a direct link between training and job performance. This encompasses a focus on responder health and safe operations on incidents and planned events. Required Training cannot be challenged and must be completed prior to initiating a PTB.

There are a few exceptions to the completion of required training prior to the issuance of a PTB. These exceptions are for Command and General (C and G) Staff positions that require the successful completion of O-305, S-420, S-520, CIMC, AAIM and S-620.

To obtain a qualification at the Type 2 Level takes considerable commitment to training and qualifications in the CICCS process. When an individual is interested in applying to attend an S-420 class, they will need to complete the nomination form with the list of the experience, qualifications and completed coursework documents.

The requirement for the S-420 class in each of the Command and General Staff positions are as follows:

- **Incident Commander**
  Completed G/E/L-950 or S-400 and have completed any of the requirements set forth in one of positions below

- **Public Information Officer**
  Qualified as a PIOF or a PIO3, completed G/E/L-952, or S-403 and I-400

- **Safety Officer**:
  Qualified as a DIVS, SOFR or a SOF3, completed G/E/L-954 or S-404 and I-400

- **Liaison Officer**
  Completed G/E/L-956 or C-402 and I-400
- **Plans Section Chief**
  Qualified as a [RESL](#) and [SITL](#), completed G/E/L-962 or S-440 and I-400

- **Logistics Section Chief**
  Qualified in any two of the following positions, [FACL](#), [GSUL](#), [SPUL](#), completed G/E/L-967 or C-450 and I-400

- **Operations Section Chief**
  Qualified as a [DIVS](#) and completed G/E/L-958 or S-430 and I-400

- **Finance Section Chief**
  Qualified in any two of the following positions, [COST](#), [TIME](#) or [PROC](#) and have completed G/E/L-973 or C-460 and I-400

Once the information is compiled, the completed application packet will need to be submitted to the PACE V Review Committee (Cal OES Fire and Rescue Division, CICCS Task Force Manager, 3650 Schriever Avenue, Mather, CA, 95655) for approval to attend the S-420 class. Once the packet is approved, the PACE V Committee will notify the sponsoring Department/Agency, the individual and the Regional OES Review Committee. Unapproved packets will be returned to the sponsoring Department/Agency with the noted deficiencies.

Individuals interested in becoming Type 1 qualified will need to be Type 2 qualified and complete NWCG S-520, CIMC or the AAIM class. To be considered to attend these classes, the individual will need to fill out an application outlining the incidents that they have been involved with, indicate classes completed, and provide the CICCS Certificate. This certificate needs to be in the same position that is being applied for at the Type 1 Level.

Once the above information is compiled, the completed application packet will need to be submitted to the PACE V Review Committee (Cal OES Fire and Rescue Division, Task Force Manager, 3650 Schriever Avenue, Mather, CA, 95655) for approval to attend the desired class. Once the packet is approved, the PACE V Committee will notify the sponsoring Department/Agency, the individual and the Regional OES Review Committee. Unapproved packets will be returned to the sponsoring Department/Agency with the noted deficiencies.

**Required Recurrent Training**

Required Recurrent Training will consist of the following, if applicable, or Agency Determined:

- Aviation Hazardous Materials Training (A-110)
- Annual Fireline Safety Refresher (RT-130)
- HRSP Refresher Workshop (RT-340)
- Triennial Helicopter Manager Workshop (RT-372)
- Air Tactical Group Supervisor (RT-378)
Agency Determined Training consists of any additional courses specific to that sponsoring Department/Agency.

**Recommended Training**

Individuals are not required to complete courses referenced under ‘Recommended Training’ in order to qualify for a CICCS position unless specific department, agency, Operational Area, or regional policy dictates that courses have been elevated to ‘Required Training’.

The training identified in the ‘Recommended Training’ includes: job aids, knowledge and skills acquired through on-the-job training, work experience, and training determined by the sponsoring Department/Agency. It is a means by which individuals can prepare for position performance evaluation by obtaining specific knowledge and skills required to perform tasks identified in the PTB.

**Job Aids**

Job Aids are “how to” books that assist an individual in performing all tasks associated with a position. They are used by an individual, in a trainee position, who has met all of the prerequisites but has not completed the PTB for the position. In some cases, familiarization of the Job Aid is a part of the required training. Job Aids are also used after the individual has become qualified, as an aid or refresher in performance of the position.

No Job Aid can be issued without the approval of the Fire Chief/Administrator or their Designee.

**Equivalencies**

Equivalency courses are classes that have been determined to meet the objectives of the referenced course. The goal of course equivalencies is to minimize redundancy of training, expedite the certification process, and avoid unnecessary costs due to duplication of curriculum delivery. It is not the purpose of the Equivalency Matrix to dilute the referenced course curriculum. In comparative analysis, the identified equivalent course work meets or exceeds the intent of the referenced course content.

Approved equivalency courses can be found in the Equivalency Matrix in Appendix A. Any course listed as an equivalent course can be substituted for the referenced course for purposes of submitting a CICCS qualification application.

**Position Task Books (PTBs)**

PTBs contain all the minimum critical Competencies, Behaviors and Tasks required to become certified for an ICS position. PTBs are designed in a format that allows documentation of a
trainee’s task performance. Documented performance provides critical feedback to the trainees and validates position performance for Peer Review Committees when considering applications for certification. Successful completion of all position tasks is required, as determined by an evaluator, and shall be the basis for recommending certification.

An individual may not have more than four active PTBs open at one time, and no more than two of the four PTBs may be in a single functional area. Aviation positions will not be considered Operations positions; they are considered their own functional area. This will allow an individual the ability to have two PTBs open in Operations and two in Aviation and still be compliant with the maximum of two PTBs open in a functional area.

Example:
An individual may be issued a PTB for Facilities Unit Leader and a PTB for Food Unit Leader in the Logistics functional area; also, they may be issued PTBs for Staging Area Manager and Strike Team Leader, Engine in the Operations functional area. They would be compliant with the maximum number of four PTBs, with no more than two in a single functional area.

Individuals serving as trainer, coach or evaluator must be currently qualified in the position being evaluated.

PTB Requirements:

- Only the Chief Administrator, or their Designee, of the sponsoring Department/Agency has the ability to initiate PTBs.
- The trainee status date begins when the position initiation and certification is completed by the training officer and the employee is entered into ROSS in that ICS position. (4039)
- Once a PTB is initiated, a trainee will continue with that PTB until completion (if they are within timeframes) regardless of whether there are new requirements for that position.
- For Command & General (C&G) Staff Positions, completion of O-305, S-420, S-520, S-620, CIMC, or AAIM is not a requirement for task book initiation. This procedure allows trainees to gain experience that prepares them for passing these advanced courses.

PTB Completion:

- PTBs for the Air Operations positions must be completed within 3 years.
- PTBs for all other positions must be completed within 5 years.
- With concurrence of the appropriate Peer Review Committee, the Chief Administrator or their Designee may grant an extension to the completion of a PTB. Extensions will be granted in 1-year increments, to a maximum of 5.
- PTBs not completed within the specified timeframes may require an individual to meet the current adopted training/experience qualification standard.
- A minimum of two quality assignments is required for an applicant to be considered for certification. Quality assignments include those that exercise the full range of responsibilities of the assigned trainee positions. The appropriate Peer Review
Committee should evaluate each application based on the complexity of the assignments submitted for certification.

- All hazard incidents shall be considered when evaluating applications for certification.
- Every assignment requires a completed ICS 225 Form (Appendix D).
- To receive the proper documentation and improve the quality of the trainee assignment, a trainee shall check in with the assigned Training Specialist (TNSP) at an incident when a TNSP is assigned.
- All documentation in a PTB must be legible. This includes the printed name of the evaluator and their signature.
- Each task in the PTB must be individually dated and initialed by the evaluator.
- The CICCS Task Force approves PTBs for use in the certification/qualification process.

**Required Experience**

Required Experience includes qualification in any prerequisite position, successful position performance through completion of the PTB, or recognition through the historical recognition process. The historical recognition process can only be initiated by the CICCS Task Force/PACE V Committee with concurrence of Cal OES and State Fire Training.

Peer Review Committees are encouraged to be flexible in considering experience. Local and all hazard incidents shall be included in any review of experience. Required Experience cannot be challenged.

**Certification**

Certification is the role of SFT through the Peer Review Process, with the exception of the positions that are approved by the local sponsoring Department/Agency. SFT certification can be achieved through either the:

- Cal OES Operational Area
- Cal OES Region
- CICCS Task Force

This review process ensures that an individual has completed the required coursework, and has obtained documented experience. Once an individual has received the approval of the appropriate CICCS Peer Review Committee, a certification certificate will be issued from SFT through the certifying CICCS Peer Review Committee.

The quality of the assignment shall be closely evaluated when making a determination for advancement to the next highest ICS position. Quality assignments include those that exercise
the full range of responsibilities of the assigned trainee positions. The quality of experience should relate to the number of assignments, the variety of incidents such as wildland or all-hazard, or the size and complexity of the incident or event in terms of personnel, equipment, and operations.

Applications for certification shall be submitted to the appropriate Peer Review Committee. Certification for subordinate level positions will be granted when appropriate.

Qualification

Qualification is a twofold process.

First, the CICCS Peer Review Committee must certify an individual for the position by determining the required experience and prerequisites meet CICCS minimum standards. Second, the sponsoring Chief/Administrator confirms the individual meets the sponsoring Department/Agency’s physical fitness requirements, the need for additional qualified personnel in a given position, and any other criteria deemed necessary. This two-step process will apply to all positions other than the ICS positions approved by the local agency.

The Chief/Administrator is the ultimate authority for determining if an individual is qualified. Once a sponsoring Department/Agency has determined qualification, that individual can perform that position outside of the qualifying sponsoring Department/Agency’s jurisdiction and is made available to the Mutual Aid System by being placed in Resource Ordering and Status System (ROSS) or currently approved ordering system.

The Chief/Administrator shall ensure that certification records are maintained and shall either annually issue a CICCS Qualification Card or maintain sponsoring Department/Agency-approved documentation for each currently qualified individual. The CICCS Qualification Card shall contain, at a minimum, the individual's name, sponsoring Department/Agency, expiration date, qualified positions, trainee positions, physical fitness level, and Chief/Agency Administrator signature (or their Designee). This qualification card provides documented proof of position currency.

Completion of required training and experience alone does not guarantee an individual will be qualified to perform in a position. Qualification is a subjective determination each sponsoring Department/Agency must make based on task evaluations, position performance evaluations, and their own judgment of the quality of an individual’s experience.

 Participation by local government personnel on CAL FIRE Incident Management Teams (IMT), Federal IMTs, and Local All-Hazards IMTs is at the discretion of the sponsoring Department/Agency. Local government personnel assigned to these teams must follow the standards as set forth by the CICCS Qualification Guide.

Note:
CAL FIRE “Types” their IMTs as Type 1; they do not have Type 2 Teams. Local government personnel, assigned to CAL FIRE teams in Command and General Staff positions that have not completed the Type 2 PTB, must first complete the Type 2 PTB and Regional Peer Review process. Once qualified as a PSC2 a Type 1 PTB can be initiated. Both Type 1 and Type 2 experience can be achieved while assigned to the CAL FIRE IMTs.
Transferring Qualifications

When an individual transfers qualifications from a non-CICCS participating Department/Agency to a sponsoring Department/Agency that endorses CICCS, they will need to follow the process outlined below:

- A complete CICCS application will need to be filled out, including the incidents that will keep the applicant current since the issuance of their last qualification card.
- Documentation of being on qualifying incidents will also need to be provided, (e.g. Incident Action Plans [IAP], ICS 225s, Incident Qualification System [IQS] printouts).
- A copy of past sponsoring Department/Agency qualification cards or other documentation will also need to be provided. If the individual was ‘historically recognized’ by their previous employer, that documentation will need to be provided.
- Type 1 and other PACE V reviewed position applications will be sent directly to the PACE V Committee.
- Type 2 and other Regionally reviewed position applications will be sent directly to the appropriate Regional Peer Review Committee.
- Positions reviewed at the Operational Area will continue to be reviewed at the Operational Area.
- The Peer Review Committee may require additional information or documentation in addition to that listed above.

When an individual transfers from a CICCS participating Fire Department/Agency to another Fire Department/Agency that is subject to CICCS they will need to provide a copy of their CICCS file or documentation from their previous operational/regional Peer Review Committee. The supporting documentation will be reviewed by the receiving Peer Review Committee who may require additional information or documentation, based on local requirements, prior to an individual being entered into ROSS in the new Operational Area.

Currency

Each sponsoring Department/Agency is responsible for reviewing the qualifications of its personnel based upon the requirements of this Guide on an annual basis.

Individuals who are qualified for any CICCS position shall be required to perform that position satisfactorily at least once every five (5) years with the exception of air operations and expanded dispatch positions, which require satisfactory performance once every three (3) years to maintain currency.

Currency for a position can be maintained by meeting any of the following requirements:

- Successful performance in the position qualified for within the stated timeframe
- Successful performance in a position identified in this Guide as “other position assignments that will maintain currency”
- Successful completion of a trainee assignment in the position which they were qualified. This will apply when a qualified individual falls out of currency and has reverted back to ‘trainee’ status.

- Functioning in a position while participating in a documented scenario-based exercise or drill.
  
  Example: Currency for a Resources Unit Leader (RESL) can be maintained by:
  
  - Demobilization Unit Leader (DMOB)
  - Planning Section Chief Type 1 (PSC1)
  - Planning Section Chief Type 2 (PSC2)
  - Planning Section Chief Type 3 (PSC3)
  - Status/Check-In Recorder (SCKN)

Exercises or drills need to meet minimum complexity standards:

- The exercise or drill must fully exercise the position requirements as found in the FIRESCOPE Field Operations Guide (ICS 420-1).

- The exercise or drill has a completed Incident Action Plan or Training Plan with the objectives of the exercise and with the name and the position of the person fulfilling the currency requirement.

- A written performance evaluation, by a person fully qualified in that position or a higher position to that being evaluated, must be completed.

- The drill or exercise must be pre-approved by the appropriate Peer Review Committee to be considered as a qualifying event. The specific positions that can receive experiential credit must be identified in advance of the event: Every event will not provide a quality experience for all CICCS positions.

Decertification

Decertification is the process of removing or reducing an individual’s qualifications. Decertification is not an adverse action, it is a process to improve position skills. An employee may be recertified according to the procedures outlined in the ‘Recertification’ section of this document.

The decertification procedures in this section are intended to ensure safe and effective individual performance and to provide supervisors and managers with another mechanism to ensure employee safety.

Causes for decertification may include the following:

- An individual voluntarily surrenders their certification of qualifications, or requests to be qualified at a lower level of responsibility
As an individual, member of a crew, or IMT, an individual performs actions that violate recognized standard operational procedures or identified safety procedures that are determined to have been instrumental in the endangerment of incident personnel or the public.

Examples of instances that may warrant decertification include:
- Deliberate disregard of identified safe practices
- Insubordinate actions that lead to unsafe conditions
- Intentional misrepresentation of fire qualifications
- Unsatisfactory performance in key elements of position tasks that lead to unsafe conditions
- Falsification of experience or training records

Performance Evaluation and Documentation

All actions that violate established safety procedures shall be documented. The preferred method to document deficiencies is on a performance evaluation, ICS 225 Form. Performance reviews, especially those that trigger consideration of decertification, shall be coordinated and tracked.

Responsibility for Performance Evaluation and Decertification:
- The Incident Commander is responsible for providing oversight of the initial performance review process. Within the authority delegated to all Incident Commanders is the responsibility to relieve from assignment, and demobilize, any individual for safety violations. Incident Commanders; however, do not have the authority to decertify individuals.
- Incident Commanders are responsible for providing documented reasons for relieving an individual. ICs will send a copy of the performance rating and documentation package to the Cal OES Fire and Rescue Division, Operations Deputy Chief, 3650 Schriever Avenue, Mather, CA, 95655, and the individual’s home agency.
- The Peer Review Committee is responsible for initiating an administrative review to determine if decertification is appropriate.
- Any decision to decertify an individual should include a performance improvement plan.
- During an evaluation of decertification, an individual’s certification may be temporarily suspended. Decisions around certification can be made through expert mentoring or independent assessment.
- Peer Review Committees shall review individual certification and address decertification.
- Individuals recommended for decertification, who have been relieved from an assignment, shall not be reassigned to any other incident until approval by the Peer Review Committee.

**Recertification**

The evaluation of an individual's competency is key to recertification where qualifications have expired or been decertified. If currency has lapsed or decertification has taken place, the individual shall: revert to the trainee level, be issued a PTB for the position, complete on-the-job-training if needed, and requalify in a position performance assignment. By returning to the trainee level, the person recertifying is introduced to new technology that will assist with recalling position duties and responsibilities.

**Physical Fitness**

Personnel must meet established physical health and fitness demands for the specific ICS position to which they are assigned. Criteria are established by individual Departments/Agencies. Once an individual meets the criteria for the specific position, it is deemed that the individual meets the health and fitness levels as outlined by CICCS.

In an effort to ensure individual safety, CICCS recommends that all Departments/Agencies consider the following health and fitness components:

- Baseline medical evaluations
- Comprehensive wellness and fitness program
- Evaluation to determine that an individual can meet the physical demands of the position for which they are being qualified

CICCS identifies four (4) levels of health and fitness required for position qualification.

The health and fitness levels are defined as outlined below:

**Arduous**

Duties involve fieldwork requiring physical performance calling for above-average endurance and superior conditioning. These duties may include an occasional demand for extraordinarily strenuous activities in emergencies under adverse environmental conditions and over extended periods of time. Requirements include running, walking, climbing, jumping, twisting, bending, and lifting more than 50 pounds; the pace of work typically is set by the emergency situation.
Moderate
Duties involve fieldwork requiring complete control of all physical faculties and may include considerable walking over irregular ground, standing for long periods of time, lifting 25 to 50 pounds, climbing, bending, stooping, squatting, twisting, and reaching. Occasional demands may be required for moderately strenuous activities in emergencies over long periods. Individuals usually set their own work pace.

Light
Duties mainly involve office-type work with occasional field activity characterized by light physical exertion requiring basic good health. Activities may include climbing stairs, standing, operating a vehicle, and long hours of work, as well as some bending, stooping, or light lifting. Individuals can usually govern the extent and pace of their physical activity.

None Required
Positions that do not require a physical fitness level.

Incident Complexity

‘Incident Complexity’ is a characterization, used by incident management personnel, to describe the level of difficulty, severity, or overall resistance while trying to manage an incident to a successful conclusion or to manage one type of incident compared to another type. Determining ‘Incident Complexity’ is a subjective process based on examining a combination of indicators or factors. These may include: the area (location) involved; threat to life, environment, and property; political sensitivity; organizational complexity; jurisdictional boundaries; values at risk; and weather. Most indicators are common, but some may be unique to a particular type of incident.

Refer to the following link for a complete listing of ‘Complexity Indicators’.

Review Committees

Committee Makeup / Members

Peer Review Committees are established to represent a cross section of the Departments/Agencies that make up the geographical boundaries of the Operational Area (OA) or Region. Each Peer Review Committee is only required to have representatives from the categories listed below if that category has a sponsoring/participating Department/Agency within the boundaries of the Operational Area or Region. If an Operational Area has fewer than 3 Departments/Agencies, it will be combined with another Operational Area to increase the number of Departments/Agencies to 3 or more.

Below is a list of the membership categories that will make up a Peer Review Committee:

- City Fire Department
  *(Municipal function of a city or town)*
- Metro Fire Department
  *(Department with more than 350 personnel)*
- Fire Protection District
  *(Political subdivision that has its own governing body separate from a town or city)*
- CAL FIRE
- Cal OES
- Contract County (Los Angeles, Orange, Ventura, Kern, Santa Barbara, Marin)
- Federal Wildland Fire Agency
- Federal Military Fire Agency
- Tribal Fire Department
- Labor Organization
- Independent/Volunteer Fire Department
- Qualified ICS Training Specialist (from any sponsoring Department/Agency)
- Community College that offers ICS courses
Committee Formation

The Peer Review Committee formation process begins with the Operational Area or Regional Coordinator. The coordinator will initiate the following sequence of events to formulate the Peer Review Committees:

- Peer Review Committees will be established at the Operational Area, Region, and State level.
- The Operational Area or Regional Coordinator announces the opportunity to participate on the committee and accepts applications for committee membership from applicable Departments/Agencies from within the boundaries of the peer review area.
- The Operational Area or Regional Coordinator makes the initial appointments to the Peer Review Committee.
- The committee members elect a chairperson who shall be from a CICCS participating Department/Agency.
- The chairperson serves a two-year term or longer at the approval of the other members of the Peer Review Committee.
- Committee members serve a two-year term or longer at the approval of the other members of the Peer Review Committee.
- The committee shall select any new members from applications, received by the Operational Area or Regional Coordinator, as vacancies occur.
- An agency represented on the committee can only hold one position on the committee. Example: Los Angeles County Fire Department, while it is a Contract County, a Metro Department, a Fire District, and a City Department, may only represent one of these committee categories.
- The Cal OES CICCS Task Force Manager will be notified of changes to Peer Review Committee chairs.
- Operational Areas (OA) have the option of moving a position to the Region for the review if they do not have the expertise to adequately review the applications.
- OA’s that do not have adequate resources to develop a Peer Review Committee may partner with contiguous OA’s to establish a more complete committee.

Committee Responsibilities

A primary responsibility of CICCS is the delegated authority to Cal OES Operational Area and Region Peer Review Committees to oversee the certification process. Peer Review Committees need to adhere to the following guidelines and direction:

- Peer Review Committees exist to maintain the professional standards and integrity of the California Incident Command Certification System. It is their responsibility to ensure
applicants for certification receive proper consideration and a thorough review of documented position performance.

- The Peer Review Committee members represent the area or agency and do not need to be qualified in all of the ICS positions (*although that is helpful*). Peer Review Committees should consult qualified subject matter experts, in the positions being reviewed, if the expertise does not reside on the committee when reviewing applications for certification.

- Peer Review Committees will meet at least annually; however, it is recommended that additional meetings be scheduled to allow for timely review of applications and maintenance review work pertaining to the ROSS.

- Any questions a Peer Review Committee might have regarding a process or procedure should be referred to the next higher-level committee or the CICCS Task Force for assistance.

- Peer Review Committees, with the approval of the applicant’s Chief/Administrator, may require that trainees be vetted through the peer review process prior to their qualification status being updated in ROSS.

- Each Peer Review Committee shall submit their membership roster to the CICCS Task Force by July 1st of each year.

- Annually, Peer Review Committees will submit a list of qualified personnel and trainees to the next higher Peer Review Committee.

- Operational Area and Region Peer Review Committees cannot be less restrictive than this Guide.

- Operational Area and Region Chiefs/Administrators can set direction for their review committees to ask for additional training, experience, or other requirements if the Chiefs/Administrators decide that it is in the best interest of their Operational Area or Region. In doing so, Peer Review Committees may create undesired constraints and barriers to advancement in the qualifications system.

- Any committee member that has an application to be reviewed must be excused during their application review process.

- To maintain the integrity of the system, Operational Area and Region Peer Review Committees should conduct an annual audit to validate who holds qualifications in ROSS.

- It is recommended that each Operational Area establish a web page that includes frequently asked questions (FAQs), applications, and links to related sites.

- It is strongly recommended that committee members remain open to receive communications and questions, from the Operational Area or Region on subjects pertinent to CICCS process, throughout the year.

It is recommended that each sponsoring Department/Agency create their own internal review committee to review their responsibility positions, and all CICCS applications that will be sent to the external Peer Review Committees to ensure the applications are complete.
Committee Quorum

A simple majority (50% plus 1) of the committee membership shall be a quorum.

Peer Review Committee members, available via conference call, will be counted toward the quorum count.

Committee Position Review Responsibilities

There are four levels of CICCS application review:

- The sponsoring Department/Agency
- The Operational Area
- The Region
- The State

The following lists are separated into the above outlined review committees. When a new position is identified, the CICCS Task Force will determine which level of peer review will perform the CICCS application review and certification.

The sponsoring Department/Agency will be responsible for the review and certification of the following:

- Agency Representative (AREP)
- Crew Boss (CRWB)
- Engine Boss (ENGB)
- Engine Operator (ENOP)*
- Firefighter Type 1 (FFT1)
- Firefighter Type 2 (FFT2)
- Incident Commander Type 4 (ICT4)

* Position qualification requirements are determined by the Sponsoring Department/Agency.
The sponsoring Operational Area Peer Review Committees will be responsible for the review and certification of the following:

- Aircraft Base Radio Operator (ABRO)
- Aircraft Dispatcher (ACDP)
- Base/Camp Manager (BCMG)
- Claims Specialist (CLMS)
- Communications Unit Leader (COML)
- Compensation/Claims Unit Leader (COMP)
- Compensation for Injury Specialist (INJR)
- Cost Unit Leader (COST)
- Damage Inspection Specialist (DINS)
- Damage Inspection Technician (DINT)
- Deck Coordinator (DECK)
- Demobilization Unit Leader (DMOB)
- Display Processor (DPRO)
- Division/Group Supervisor (DIVS)
- Documentation Unit Leader (DOCL)
- Equipment Manager (EQPM)
- Equipment Time Recorder (EQTR)
- Expanded Dispatch Recorder (EDRC)
- Expanded Dispatch Support Dispatcher (EDSD)
- Facilities Unit Leader (FACL)
- Felling Boss (FELB)
- Field Observer (FOBS)
- Finance Section Chief Type 3 (FSC3)
- Fireline EMT (EMTF)
- Fireline Paramedic (EMPF)
- Fire Effects Monitor (FEMO)
- Firing Boss (FIRB)
- Food Unit Leader (FDUL)
- Geographic Information System Specialist (GISS)
- Ground Support Unit Leader (GSUL)
- Heavy Equipment Boss (HEQB)
- Helicopter Crewmember (HECM)
- Helicopter Manager Single Resource (HMGB)
- Human Resource Specialist (HRSP)
- Incident Commander Type 3 (ICT3)

All of the requirements of the positions listed above can be found in the ‘Positions Qualifications’ portion of this guide. Each sponsoring Department/Agency is responsible for establishing position requirements guided by the sponsoring Department/Agency directives or interagency guides.

In many cases personnel with unique skills are needed to support incident operations. Many technical specialists are certified in their field or profession and may be utilized within any functional area of the incident organization. The qualifications of technical specialists can be evaluated by checking licenses, evaluating previous training, work experience, and observing on-the-job performance. The evaluation and use of these technical specialists is outside the scope of this document.

Also note there are Incident Command Positions not addressed in the CICCS Qualification Guide because there is little demand for the qualification by local government, or the position is specific to a single agency.

**CICCS Application Submittal Process**

The CICCS process begins with the application, which can be viewed or downloaded at: [http://www.firescope.org/specialist-groups/ciccs/ciccs.htm](http://www.firescope.org/specialist-groups/ciccs/ciccs.htm). The application is required to be typed.

*A sample of a properly filled out CICCS application is provided in Appendix E.*
In addition to the completed CICCS application, the following information is also required:

- A complete copy of the PTB
  *A copy of a properly filled out PTB can be found in Appendix C.*
- ICS 225 Forms
  The incident, where the qualification was recommended by the trainer, is required to have a performance evaluation submitted. The name of the trainer and evaluator must be legibly written.
  *A sample of a properly completed ICS Form 225 can be found in Appendix D.*

**CICCS Application Peer Review Process**

The CICCS Peer Review Committee will receive applications from the member Departments/Agencies. During the Peer Review Committee meetings, the following procedures will be followed/accomplished, where applicable:

- The committee will review CICCS applications for certification, and trainee packages.
- The committee will determine if the applicant meets the CICCS standards for certification or trainee status.
- The chairperson will notify the applicant and or their Chief/Administrator or Designee of the results of the peer review.
- The committee will award a CICCS certificate upon successful committee evaluation and approval and, in the case of a trainee, will recommend their entry into ROSS.
  *Note: PACE V certificates are issued by the State Fire Marshal.*
- The committee will use Subject Matter Experts during the review process to ensure the Peer Review Committee has the level of expertise necessary to review positions.

**CICCS Certificates**

Departments/Agencies are responsible for issuing certificates, for the positions they are responsible for, as outlined earlier in this Guide. Departments/Agencies will be required to issue certificates for these positions so they can be included in CICCS applications for higher-level positions.

Once a CICCS application has been approved by any of the review committees, that committee will issue a CICCS certificate. It will include the ICS position, signature of the chairperson of the review committee, and will be issued through the authority of the SFM. Completed/signed certificates will be sent to the sponsoring Department/Agency for distribution to the certified individual.

*Note: Peer Review Committees can obtain blank certificates from their respective Cal OES Region Assistant Chief.*
Appeals Process

When a CICCS application is denied, an appeals process has been established. The applicant must appeal the denial, in writing, to the CICCS Task Force c/o Cal OES Fire and Rescue Division, CICCS Deputy Chief, 3650 Schriever Avenue, Mather, CA, 95655, within 30 days of receiving the denial notification. The CICCS Task Force will have 30 days to respond, in writing, after the receipt of the appeal. The decision of the CICCS Task Force shall be final.

CICCS Record Keeping

The CICCS chairperson shall keep a file of all information pertaining to the procedures of the Peer Review Committees including:

- Electronic messages or notes
- Hard copy notes, letters and other correspondence
- Minutes of each meeting
- Original signed applications
- ROSS inputs and reviewed documentation
- Incident Qualifications System reviewed documentation

Each committee must establish procedures for the safe storage of the CICCS records and for the transfer of files to new chairpersons.

CICCS records are considered training records and must be retained for the duration of employment of the member. The home agency is ultimately responsible for maintaining the training files for its employees.

IQS & ROSS

Incident Qualification System (IQS) is a software program that allows the home agency to manage qualifications, experience, task books, and fitness levels for personnel. The IQS is the CICCS recommended system for maintaining certification records.

IQS directly interfaces with Resource Ordering Status System (ROSS) to maintain certification records.
CICCS & ROSS

A review of personnel qualifications in ROSS should be performed annually by each CICCS Peer Review Committee to ensure accuracy. This must be coordinated with the Cal OES Fire and Rescue Operational Area and Region Coordinators and sponsoring Department/Agency IQS coordinators.

Qualification Cards

Agencies are required to have Qualification Cards, or other proof of qualifications, at all times when responding outside of their home jurisdiction. An example of a qualification card can be found in Appendix F, or at the below listed websites:

FIRESCOPE
http://www.firescope.org/specialist-groups/ciccs/ciccs.htm

Cal OES Fire and Rescue Operations
http://www.caloes.ca.gov/cal-oes-divisions/fire-rescue/fire-operations

Additionally, an example is in the Incident Qualifications Program (IQS).

The chief/administrator shall ensure that certification/qualification records are maintained and shall issue a qualification card annually to each currently qualified individual. The card shall contain, at a minimum:

- Individual's name
- Sponsoring Department/Agency
- Expiration date
- Qualified positions
- Trainee positions
- Physical fitness level
- Signature of qualifying official

Qualification cards must be available, for both qualified and trainee positions, whenever an individual is assigned to an incident.
Historical Recognition

Historical Recognition is the process of providing the opportunity, for individuals that possess extensive experience, to become certified for a newly-created position. For experience to be considered, it must have been obtained prior to the announcement of the new position.

Once a position has been created/identified there will be a one-year timeframe to submit CICCS packets for consideration. The timeframe begins the date of the letter from the CICCS Taskforce announcing the new position. All CICCS packets must be received by the review committees prior to the one-year anniversary date of the CICCS new position announcement letter.

Because of the nature of the Historical Recognition process, PTBs or Performance Evaluations are not considered part of the submission packet. Other forms of documentation will be necessary, and may include: IAP components (203’s and 204’s), 214’s, compensation documentation, and/or letters from superiors that have supervised or can validate necessary experience.
Note: There are Incident Command Positions not addressed in the CICCS Qualification Guide because there is little demand for the qualification by local government, or the position is specific to a single agency.

For positions not otherwise identified in this guide, please refer to CAL FIRE 4039 and/or NWCG 310-1.

<tr>
<td>Currency</td>
<td>Individuals who are qualified for any CICCS position shall be required to perform that position satisfactorily at least once every five (5) years, with the exception of air operations and expanded dispatch positions which require satisfactory performance once every three (3) years to maintain currency.</td>
</tr>
<tr>
<td>De-certification</td>
<td>De-certification procedures are intended to ensure safe and effective individual performance in assigned ICS positions. These procedures are intended to provide supervisors and managers with a mechanism to ensure employee safety. De-certification is the process of removing or reducing an individual’s qualifications.</td>
</tr>

Equivalent courses have been determined by the CICCS Taskforce to meet the objectives of the referenced course. The goal of course equivalencies are to minimize redundancy of training, expedite the certification process, and avoid repetitive costs due to duplication of curriculum delivery. It is not the purpose of the equivalency matrix to dilute the intent of course curriculum. In comparative analysis, the identified equivalent course work meets or exceeds the intent of the course content identified for comparison.

INSTRUCTIONS

- Applicant shall meet the California Incident Command Certification System (CICCS) requirements that were in effect when the position task book (PTB) was initiated.
- The first section is a letter from the chief/administrator from the sponsoring department/agency that indicates that they approve both the individual and position being applied for.
- The second section is the general personal information about the individual submitting the application. The application needs to be signed by the individual as well as the sponsoring department/agency individual verifying that all of the information in the application is accurate and verified.
- The third section is a list of the incidents that the applicant has gained experience from. This list should be in chronological order with the oldest incident listed at the top of the page.
- The fourth section is a list of the completed classes list. This list should be in order by class number with the lowest class number at the top of the page.
- In addition to the completed CICCS application, the following information will be required to be submitted with the application:
  - A complete copy of the position task book (PTB)
  - A copy of all Performance Evaluations (ICS form 225) for the position being applied for. The incident where the qualification was recommended by the trainer is required to have a performance evaluation submitted.
  - Copies of lower level CICCS certificates that demonstrate the “required experience” component from the “Positions Guide” of this document.
  - Copies of all course completion certificates will need to be provided for all of the courses listed as required training in the “Positions Guide” portion of this document.

**SEPARATE APPLICATIONS MUST BE SUBMITTED FOR EACH POSITION FOR WHICH AN APPLICANT DESIRES TO APPLY.**

APPLICANTS SHOULD REFER TO THE COMMITTEE POSITION REVIEW RESPONSIBILITIES SECTION OF THE CICCS QUALIFICATION GUIDE TO DETERMINE WHICH COMMITTEE THE APPLICATION SHOULD BE SUBMITTED TO.
