Form PHMSA F 7100.2

PART A - KEY REPORT INFORMATION

Report Type: (select all that apply)  
Original: Yes  
Supplemental: Yes  
Final: Yes

Last Revision Date:
1. Operator's OPS-issued Operator Identification Number (OPID): 15007
2. Name of Operator: PACIFIC GAS & ELECTRIC CO
3. Address of Operator:
   3a. Street Address: PG&E - GAS OPERATIONS, REGULATORY
   3b. City: SAN RAMON
   3c. State: California
   3d. Zip Code: 94583
4. Local time (24-hr clock) and date of the Incident: 10/24/2014 07:28
5. Location of Incident:
   Latitude: 35.244867
   Longitude: -119.04878
6. National Response Center Report Number (if applicable): 1099198
7. Local time (24-hr clock) and date of initial telephonic report to the National Response Center (if applicable): 10/24/2014 00:00
8. Incident resulted from: Unintentional release of gas
9. Gas released: (select only one, based on predominant volume released)
   Natural Gas
   - Other Gas Released Name:
10. Estimated volume of commodity released unintentionally - Thousand Cubic Feet (MCF): 92,000.00
11. Estimated volume of intentional and controlled release/blowdown - Thousand Cubic Feet (MCF): 10,000.00
12. Estimated volume of accompanying liquid release (Barrels):
13. Were there fatalities? No
14. Were there injuries requiring inpatient hospitalization? No
15. Was the pipeline/facility shut down due to the incident? Yes
- If Yes, complete Questions 15a and 15b: (use local time, 24-hr clock)

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>15a. Local time and date of shutdown</td>
<td>10/24/2014 11:51</td>
</tr>
<tr>
<td>15b. Local time pipeline/facility restarted</td>
<td>10/26/2014 11:00</td>
</tr>
</tbody>
</table>

- Still shut down? (* Supplemental Report Required)

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>16. Did the gas ignite?</td>
<td>No</td>
</tr>
<tr>
<td>17. Did the gas explode?</td>
<td>No</td>
</tr>
<tr>
<td>18. Number of general public evacuated:</td>
<td></td>
</tr>
</tbody>
</table>

19. Time sequence (use local time, 24-hour clock):

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>19a. Local time operator identified Incident– effective 10-2014, changed from &quot;Incident&quot; to &quot;failure&quot;</td>
<td>10/24/2014 07:28</td>
</tr>
<tr>
<td>19b. Local time pipeline/facility restarted</td>
<td>10/24/2014 07:57</td>
</tr>
</tbody>
</table>

**PART B - ADDITIONAL LOCATION INFORMATION**

1. Was the origin of the Incident onshore? Yes

- Yes (Complete Questions 2-12)
- No (Complete Questions 13-15)

**If Onshore:**

2. State: California
3. Zip Code: 93313
4. City: Bakersfield
5. County or Parish: Kern
6. Operator designated location: Milepost/Valve Station

<table>
<thead>
<tr>
<th>Field</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specify:</td>
<td>MP 271.55</td>
</tr>
</tbody>
</table>

7. Pipeline/Facility name: L-300A
8. Segment name/ID: 
9. Was Incident on Federal land, other than the Outer Continental Shelf (OCS)? No
10. Location of Incident: Pipeline Right-of-way

<table>
<thead>
<tr>
<th>Other – Describe:</th>
<th>Under soil</th>
</tr>
</thead>
<tbody>
<tr>
<td>Depth-of-Cover (in):</td>
<td>54</td>
</tr>
</tbody>
</table>

11. Area of Incident (as found): Underground

12. Did Incident occur in a crossing? No

- If Yes, specify type below:

<table>
<thead>
<tr>
<th>Crossing Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bridge crossing</td>
<td>Cased/ Uncased</td>
</tr>
<tr>
<td>Railroad crossing</td>
<td>Cased/ Uncased/ Bored/drilled</td>
</tr>
<tr>
<td>Road crossing</td>
<td>Cased/ Uncased/ Bored/drilled</td>
</tr>
<tr>
<td>Water crossing</td>
<td>Cased/ Uncased</td>
</tr>
</tbody>
</table>

Name of body of water (If commonly known): 
Approx. water depth (ft) at the point of the Incident: Select:

**If Offshore:**

13. Approx. water depth (ft) at the point of the Incident: 
14. Origin of Incident:

- If "In State waters":
  - State: 
  - Area: 
  - Block/Tract #: 
  - Nearest County/Parish: 
- If "On the Outer Continental Shelf (OCS)"
  - Area: 
  - Block #: 
15. Area of Incident: 

**PART C - ADDITIONAL FACILITY INFORMATION**

1. Is the pipeline or facility: - Interstate - Intrastate
   Interstate

2. Part of system involved in Incident: Onshore Pipeline, Including Valve Sites

3. Item involved in Incident: Pipe
   - If Pipe – Specify: Pipe Body
3a. Nominal diameter of pipe (in): 34
3b. Wall thickness (in): .375
3c. SMYS (Specified Minimum Yield Strength) of pipe (psi): 52,000
3d. Pipe specification: API 5L X-52
3e. Pipe Seam – Specify: DSAW
3f. Pipe manufacturer: Consolidated Western Steel
3g. Year of manufacture: 1954
3h. Pipeline coating type at point of Incident – Specify: Asphalt
3i. Mainline valve manufacturer:
3j. Year of manufacture:

4. Year item involved in Incident was installed: 1954
5. Material involved in Incident: Carbon Steel
6. Type of Incident involved: Mechanical Puncture
   - If Mechanical Puncture – Specify Approx. size:
     in. (axial) by 8.00
     in. (circumferential) 18.00
   - If Leak - Select Type:
   - If Rupture - Select Orientation:
   - If Other – Describe:

PART D - ADDITIONAL CONSEQUENCE INFORMATION

1. Class Location of Incident: Class 1 Location
2. Did this Incident occur in a High Consequence Area (HCA)? No
   - If Yes:
     2a. Specify the Method used to identify the HCA:
3. What is the PIR (Potential Impact Radius) for the location of this Incident? Feet: 646
4. Were any structures outside the PIR impacted or otherwise damaged due to heat/fire resulting from the Incident? No
5. Were any structures outside the PIR impacted or otherwise damaged NOT by heat/fire resulting from the Incident? No
6. Were any of the fatalities or injuries reported for persons located outside the PIR? No
7. Estimated Property Damage:
   7a. Estimated cost of public and non-Operator private property damage paid/reimbursed by the Operator – effective 6-2011, "paid/reimbursed by the Operator" removed $ 0
   Estimated cost of gas released unintentionally – effective 6-2011, moved to item 7f
   Estimated cost of gas released during intentional and controlled blowdown – effective 6-2011, moved to item 7g
   7b. Estimated cost of Operator's property damage & repairs $ 520,000
   7c. Estimated cost of Operator's emergency response $ 0
   7d. Estimated other costs $ 0
   Describe:
   7e. Property damage subtotal (sum of above) $ 520,000

Cost of Gas Released

7f. Estimated cost of gas released unintentionally $ 414,000
7g. Estimated cost of gas released during intentional and controlled blowdown $ 45,000
7h. Total estimated cost of gas released (sum of 7.f & 7.g above) $ 459,000
Total of all costs $ 979,000
PART E - ADDITIONAL OPERATING INFORMATION

1. Estimated pressure at the point and time of the Incident (psig): 640.00

2. Maximum Allowable Operating Pressure (MAOP) at the point and time of the Incident (psig): 757.00

3. Describe the pressure on the system or facility relating to the Incident: Pressure did not exceed MAOP

4. Not including pressure reductions required by PHMSA regulations (such as for repairs and pipe movement), was the system or facility relating to the Incident operating under an established pressure restriction with pressure limits below those normally allowed by the MAOP?
   - If Yes - (Complete 4a and 4b below)
   4a. Did the pressure exceed this established pressure restriction?
   4b. Was this pressure restriction mandated by PHMSA or the State?

5. Was "Onshore Pipeline, Including Valve Sites" OR "Offshore Pipeline, Including Riser and Riser Bend" selected in PART C, Question 2?
   - If Yes - (Complete 5a. – 5e. below):
   5a. Type of upstream valve used to initially isolate release source: Manual
   5b. Type of downstream valve used to initially isolate release source: Manual
   5c. Length of segment isolated between valves (ft): 42,240
   5d. Is the pipeline configured to accommodate internal inspection tools?
   5e. For this pipeline, are there operational factors which significantly complicate the execution of an internal inspection tool run?
   - If Other, Describe:

6. Was a Supervisory Control and Data Acquisition (SCADA)-based system in place on the pipeline or facility involved in the Incident?
   - If Yes:
   6a. Was it operating at the time of the Incident?
   6b. Was it fully functional at the time of the Incident?
   6c. Did SCADA-based information (such as alarm(s), alert(s), event(s), and/or volume or pack calculations) assist with the detection of the Incident?
   6d. Did SCADA-based information (such as alarm(s), alert(s), event(s), and/or volume calculations) assist with the confirmation of the Incident?

7. How was the Incident initially identified for the Operator?
   - SCADA-based information (such as alarm(s), alert(s), event(s), and/or volume or pack calculations)

8. Was an investigation initiated into whether or not the controller(s) or control room issues were the cause of or a contributing factor to the Incident?
   - If Other – Describe:
   - No, the Operator did not find that an investigation of the controller(s) actions or control room issues was necessary due to: (provide an explanation for why the Operator did not
PART F - DRUG & ALCOHOL TESTING INFORMATION

1. As a result of this Incident, were any Operator employees tested under the post-accident drug and alcohol testing requirements of DOT's Drug & Alcohol Testing regulations?  
   - If Yes:  
     1a. How many were tested:  
     1b. How many failed:  
   - If No:  

2. As a result of this Incident, were any Operator contractor employees tested under the post-accident drug and alcohol testing requirements of DOT's Drug & Alcohol Testing regulations?  
   - If Yes:  
     2a. How many were tested:  
     2b. How many failed:  
   - If No:

PART G - APPARENT CAUSE

Select only one box from PART G in the shaded column on the left representing the APPARENT Cause of the Incident, and answer the questions on the right. Describe secondary, contributing, or root causes of the Incident in the narrative (PART H).

Apparent Cause:  

<table>
<thead>
<tr>
<th>Corrosion Failure – Sub-cause:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- If External Corrosion:</td>
</tr>
<tr>
<td>1. Results of visual examination:</td>
</tr>
<tr>
<td>- If Other, Describe:</td>
</tr>
<tr>
<td>2. Type of corrosion: (select all that apply)</td>
</tr>
<tr>

<tr>
<td>- Atmospheric</td>
</tr>
<tr>
<td>- Stray Current</td>
</tr>
<tr>
<td>- Microbiological</td>
</tr>
<tr>
<td>- Selective Seam</td>
</tr>
<tr>
<td>- Other</td>
</tr>
<tr>
<td>- If Other – Describe:</td>
</tr>
<tr>
<td>3. The type(s) of corrosion selected in Question 2 is based on the following: (select all that apply)</td>
</tr>
<tr>
<td>- Field examination</td>
</tr>
<tr>
<td>- Determined by metallurgical analysis</td>
</tr>
<tr>
<td>- Other</td>
</tr>
<tr>
<td>- If Other – Describe:</td>
</tr>
</tbody>
</table>
4. Was the failed item buried under the ground?
   - If Yes:
     4a. Was failed item considered to be under cathodic protection at the time of the incident?
     - If Yes, Year protection started:
     4b. Was shielding, tenting, or disbonding of coating evident at the point of the incident?
     4c. Has one or more Cathodic Protection Survey been conducted at the point of the incident?
       - If "Yes, CP Annual Survey" – Most recent year conducted:
       - If "Yes, Close Interval Survey" – Most recent year conducted:
       - If "Yes, Other CP Survey" – Most recent year conducted:
     - If No:
     4d. Was the failed item externally coated or painted?

5. Was there observable damage to the coating or paint in the vicinity of the corrosion?

- If Internal Corrosion:

6. Results of visual examination:
   - If Other, Describe:

7. Cause of corrosion (select all that apply):
   - Corrosive Commodity
   - Water drop-out/Acid
   - Microbiological
   - Erosion
   - Other
   - If Other, Describe:

8. The cause(s) of corrosion selected in Question 7 is based on the following (select all that apply):
   - Field examination
   - Determined by metallurgical analysis
   - Other
   - If Other, Describe:

9. Location of corrosion (select all that apply):
   - Low point in pipe
   - Elbow
   - Drop-out
   - Other
   - If Other, Describe:

10. Was the gas/fluid treated with corrosion inhibitors or biocides?

11. Was the interior coated or lined with protective coating?

12. Were cleaning/dewatering pigs (or other operations) routinely utilized?

13. Were corrosion coupons routinely utilized?

**Complete the following if any Corrosion Failure sub-cause is selected AND the "Item Involved in Incident" (from PART C, Question 3) is Pipe or Weld.**

14. Has one or more internal inspection tool collected data at the point of the Incident?
   - If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:
     - Magnetic Flux Leakage Tool
       - Most recent year run:
     - Ultrasonic
       - Most recent year run:
     - Geometry
       - Most recent year run:
     - Caliper
       - Most recent year run:
     - Crack
       - Most recent year run:
     - Hard Spot
       - Most recent year run:
     - Combination Tool
       - Most recent year run:
     - Transverse Field/Triaxial
       - Most recent year run:
     - Other
       - Most recent year run:
       - If Other, Describe:

15. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?
16. Has one or more Direct Assessment been conducted on this segment?
   - If Yes, and an investigative dig was conducted at the point of the Incident:
     Most recent year conducted:
   - If Yes, but the point of the Incident was not identified as a dig site:
     Most recent year conducted:

17. Has one or more non-destructive examination been conducted at the point of the Incident since January 1, 2002?
   - If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:
     - Radiography
       Most recent year examined:
     - Guided Wave Ultrasonic
       Most recent year examined:
     - Handheld Ultrasonic Tool
       Most recent year examined:
     - Wet Magnetic Particle Test
       Most recent year examined:
     - Dry Magnetic Particle Test
       Most recent year examined:
     - Other
       Most recent year examined:
       If Other, Describe:

G2 - Natural Force Damage - only one sub-cause can be picked from shaded left-handed column

Natural Force Damage – Sub-Cause:
- If Earth Movement, NOT due to Heavy Rains/Floods:
  1. Specify:
     - If Other, Describe:
- If Heavy Rains/Floods:
  2. Specify:
     - If Other, Describe:
- If Lightning:
  3. Specify:
- If Temperature:
  4. Specify:
- If Other Natural Force Damage:
  5. Describe:

Complete the following if any Natural Force Damage sub-cause is selected.

6. Were the natural forces causing the Incident generated in conjunction with an extreme weather event?
   6a. If yes, specify: (select all that apply):
     - Hurricane
     - Tropical Storm
     - Tornado
     - Other
       - If Other, Describe:

G3 - Excavation Damage only one sub-cause can be picked from shaded left-hand column

Excavation Damage – Sub-Cause: Excavation Damage by Third Party

- If Previous Damage Due to Excavation Activity: Complete Questions 1-5 ONLY IF the "Item Involved in Incident" (From Part C, Question 3) is Pipe or Weld.

1. Has one or more internal inspection tool collected data at the point of the Incident?
   1a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:
      - Magnetic Flux Leakage
        Year:
      - Ultrasonic
        Year:
      - Geometry
        Year:
<table>
<thead>
<tr>
<th>- Caliper</th>
<th>Year:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Crack</td>
<td>Year:</td>
</tr>
<tr>
<td>- Hard Spot</td>
<td>Year:</td>
</tr>
<tr>
<td>- Combination Tool</td>
<td>Year:</td>

<td>Year:</td>
</tr>
<tr>
<td>- Other</td>
<td>Year:</td>
</tr>
<tr>
<td>Describe:</td>
<td></td>
</tr>
</tbody>
</table>

2. Do you have reason to believe that the internal inspection was completed BEFORE the damage was sustained?

3. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?
   - If Yes:
     | Most recent year tested: |
     | Test pressure (psig):   |

4. Has one or more Direct Assessment been conducted on the pipeline segment?
   - If Yes, and an investigative dig was conducted at the point of the Incident:
     | Most recent year conducted: |
   - If Yes, but the point of the Incident was not identified as a dig site:
     | Most recent year conducted: |

5. Has one or more non-destructive examination been conducted at the point of the Incident since January 1, 2002?
   5a. If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:
      - Radiography Year: 
      - Guided Wave Ultrasonic Year: 
      - Handheld Ultrasonic Tool Year: 
      - Wet Magnetic Particle Test Year: 
      - Dry Magnetic Particle Test Year: 
      - Other Year: 
      | Describe: |

Complete the following if Excavation Damage by Third Party is selected as the sub-cause.

6. Did the operator get prior notification of the excavation activity? Yes
   6a. If Yes, Notification received from (select all that apply):
      - One-Call System Yes
      - Excavator 
      - Contractor 
      - Landowner 

Complete the following mandatory CGA-DIRT Program questions if any Excavation Damage sub-cause is selected.

7. Do you want PHMSA to upload the following information to CGA-DIRT (www.cga-dirt.com)? Yes
8. Right-of-Way where event occurred (select all that apply):
   - Public - If Public, Specify: Private Landowner 
   - Private - If Private, Specify: Private Landowner 
   - Pipeline Property/Easement 
   - Power/Transmission Line 
   - Railroad 
   - Dedicated Public Utility Easement 
   - Federal Land 
   - Data not collected 
   - Unknown/Other 
9. Type of excavator: Farmer 
10. Type of excavation equipment: Farm Equipment 
11. Type of work performed: Agriculture
12. Was the One-Call Center notified? - Yes - No Yes
   12a. If Yes, specify ticket number: 441996
   12b. If this is a State where more than a single One-Call Center exists, list the name of the One-Call Center notified: USAN

13. Type of Locator: Unknown/Other

14. Were facility locate marks visible in the area of excavation? Unknown/Other

15. Were facilities marked correctly? Unknown/Other

16. Did the damage cause an interruption in service? Yes
   16a. If Yes, specify duration of the interruption: (hours) 47

17. Description of the CGA-DIRT Root Cause (select only the one predominant first level CGA-DIRT Root Cause and then, where available as a choice, then one predominant second level CGA-DIRT Root Cause as well):
   - Predominant first level CGA-DIRT Root Cause: Other
     - If One-Call Notification Practices Not Sufficient, Specify:
     - If Locating Practices Not Sufficient, Specify:
     - If Excavation Practices Not Sufficient, Specify:
     - If Other/None of the Above, Explain: The third party started excavation (USA ticket 441996) before the site was marked by PG&E.

G4 - Other Outside Force Damage - only one sub-cause can be selected from the shaded left-hand column

Other Outside Force Damage – Sub-Cause:

- If Damage by Car, Truck, or Other Motorized Vehicle/Equipment NOT Engaged in Excavation:
  1. Vehicle/Equipment operated by:

- If Damage by Boats, Barges, Drilling Rigs, or Other Maritime Equipment or Vessels Set Adrift or Which Have Otherwise Lost Their Mooring:
  2. Select one or more of the following IF an extreme weather event was a factor:
     - Hurricane
     - Tropical Storm
     - Tornado
     - Heavy Rains/Flood
     - Other
     - If Other, Describe:

- If Previous Mechanical Damage NOT Related to Excavation: Complete Questions 3-7 ONLY IF the "Item Involved in Incident" (from PART C, Question 3) is Pipe or Weld.

3. Has one or more internal inspection tool collected data at the point of the Incident?
   3a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:
      - Magnetic Flux Leakage
        Most recent year run:
      - Ultrasonic
        Most recent year run:
      - Geometry
        Most recent year run:
      - Caliper
        Most recent year run:
      - Crack
        Most recent year run:
      - Hard Spot
        Most recent year run:
      - Combination Tool
        Most recent year run:
      - Transverse Field/Triaxial
        Most recent year run:
      - Other:
        Most recent year run:
        Describe:

4. Do you have reason to believe that the internal inspection was completed BEFORE the damage was sustained?

5. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?
   - If Yes:
     Most recent year tested:
     Test pressure (psig):

6. Has one or more Direct Assessment been conducted on the pipeline

Reproduction of this form is permitted
7. Has one or more non-destructive examination been conducted at the point of the Incident since January 1, 2002?
   7a. If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:
   - Radiography
   - Guided Wave Ultrasonic
   - Handheld Ultrasonic Tool
   - Wet Magnetic Particle Test
   - Dry Magnetic Particle Test
   - Other

- If Intentional Damage:
  8. Specify: - If Other, Describe:

- If Other Outside Force Damage:
  9. Describe:

G5 - Pipe, Weld, or Joint Failure

Use this section to report material failures ONLY IF the "Item Involved in Incident" (from PART C, Question 3) is "Pipe" or "Weld."

Only one sub-cause can be selected from the shaded left-hand column

Pipe, Weld or Joint Failure – Sub-Cause:
1. The sub-cause shown above is based on the following (select all that apply):
   - Field Examination
   - Determined by Metallurgical Analysis
   - Other Analysis
   - If "Other Analysis", Describe
   - Sub-cause is Tentative or Suspected; Still Under Investigation (Supplemental Report required)

- If Construction-, Installation- or Fabrication
2. List contributing factors: (select all that apply)
   - Fatigue or Vibration related: Specify: - If Other, Describe:
   - Mechanical Stress
   - Other

- If Environmental Cracking-related:
3. Specify: - If Other, Describe:

Complete the following if any Material Failure of Pipe or Weld sub-cause is selected.
4. Additional Factors (select all that apply):
   - Dent
   - Gouge
   - Pipe Bend
   - Arc Burn
   - Crack
   - Lack of Fusion
   - Lamination
   - Buckle
   - Wrinkle
   - Misalignment
   - Burnt Steel
   - Other
5. Has one or more internal inspection tool collected data at the point of the Incident?

5a. If Yes, for each tool used, select type of internal inspection tool and indicate most recent year run:
   - Magnetic Flux Leakage
     Most recent year run:
   - Ultrasonic
     Most recent year run:
   - Geometry
     Most recent year run:
   - Caliper
     Most recent year run:
   - Crack
     Most recent year run:
   - Hard Spot
     Most recent year run:
   - Combination Tool
     Most recent year run:
   - Transverse Field/Triaxial
     Most recent year run:
   - Other
     Most recent year run:
   Describe:

6. Has one or more hydrotest or other pressure test been conducted since original construction at the point of the Incident?
   - If Yes:
     Most recent year tested:
     Test pressure (psig):

7. Has one or more Direct Assessment been conducted on the pipeline segment?
   - If Yes, and an investigative dig was conducted at the point of the Incident:
     Most recent year conducted:
   - If Yes, but the point of the Incident was not identified as a dig site:
     Most recent year conducted:

8. Has one or more non-destructive examination(s) been conducted at the point of the Incident since January 1, 2002?
   - If Yes, for each examination conducted since January 1, 2002, select type of non-destructive examination and indicate most recent year the examination was conducted:
     - Radiography
       Most recent year conducted:
     - Guided Wave Ultrasonic
       Most recent year conducted:
     - Handheld Ultrasonic Tool
       Most recent year conducted:
     - Wet Magnetic Particle Test
       Most recent year conducted:
     - Dry Magnetic Particle Test
       Most recent year conducted:
     - Other
       Most recent year conducted:
     Describe:

G6 - Equipment Failure - only one sub-cause can be selected from the shaded left-hand column

Equipment Failure – Sub-Cause:

- If Malfunction of Control/Relief Equipment:
  1. Specify:
     - Control Valve
     - Instrumentation
     - SCADA
     - Communications
     - Block Valve
     - Check Valve
| - Relief Valve                  |                                                                 |
| - Power Failure                |                                                                 |
| - Stopple/Control Fitting      |                                                                 |
| - Pressure Regulator           |                                                                 |
| - ESD System Failure           |                                                                 |
| - Other                        | - If Other, Describe:                                          |
| - If Compressor or Compressor-related Equipment: |
| 2. Specify:                   | - If Other, Describe:                                          |
| - If Threaded Connection/Coupling Failure: |
| 3. Specify:                   | - If Other, Describe:                                          |
| - If Non-threaded Connection Failure: |
| 4. Specify:                   | - If Other, Describe:                                          |
| - If Other Equipment Failure:  |
| 5. Describe:                  |                                                                 |

Complete the following if any Equipment Failure sub-cause is selected.

6. Additional factors that contributed to the equipment failure *(select all that apply)*
   - Excessive vibration
   - Overpressurization
   - No support or loss of support
   - Manufacturing defect
   - Loss of electricity
   - Improper installation
   - Mismatched items (different manufacturer for tubing and tubing fittings)
   - Dissimilar metals
   - Breakdown of soft goods due to compatibility issues with transported gas/fluid
   - Valve vault or valve can contributed to the release
   - Alarm/status failure
   - Misalignment
   - Thermal stress
   - Other
   - If Other, Describe:                                          

G7 – Incorrect Operation - only one sub-cause can be selected from the shaded left-hand column

Incorrect Operation – Sub-Cause:

- If Underground Gas Storage, Pressure Vessel, or Cavern Allowed or Caused to Overpressure:
  1. Specify:                   | - If Other, Describe:                                          |
- If Other Incorrect Operation:
  2. Describe:                 |                                                                 |

Complete the following if any Incorrect Operation sub-cause is selected.

3. Was this Incident related to: *(select all that apply)*
   - Inadequate procedure
   - No procedure established
   - Failure to follow procedure
   - Other:
   - If Other, Describe:                                          |

4. What category type was the activity that caused the Incident:

5. Was the task(s) that led to the Incident identified as a covered task in your Operator Qualification Program?
   5a. If Yes, were the individuals performing the task(s) qualified for the task(s)?

G8 - Other Incident Cause - only one sub-cause can be selected from the shaded left-hand column

Other Incident Cause – Sub-Cause:

- If Miscellaneous:
1. Describe:

- If Unknown:

2. Specify:

PART - H NARRATIVE DESCRIPTION OF THE INCIDENT

At 0732 hours on Oct. 24, 2014, PG&E was informed of a third-party dig near Wible Road and Houghton Road in Bakersfield. A third party furrowing a field struck transmission line L-300A causing an unintentional release of natural gas. L-300A is a 34-inch line located downstream of Mile Point 270.85. During the incident, valves at MP 270.85 and MP278.70 were closed and the blowoff valves (at both locations) were opened to expedite depressurizing of approximately 8 miles of the pipe. The flow of gas stopped at 1151 hours. The Fire Department established an 8 square-mile exclusion zone around the dig-in area and evacuated two elementary schools. No injuries, no fatalities, and no ignition occurred during the incident. Kern County Fire lifted the exclusion zone at about 1230 hours. Environmental health and hazardous materials personnel monitored the air quality for approximately 30 minutes after the gas was shut in and deemed it was safe to lift the order. Traffic control was conducted by the California Highway Patrol and Kern County Sheriff's office. Transmission Line L-312, which is tapped off of this section of L-300A and serves roughly 100 customers, was also isolated but due to line pack the customers were not affected. Three commercial customers lost service during the incident: Texaco, Vulcan Materials, and Industrial Oil and Asphalt. By 0900 hours on Oct. 26, Vulcan and Ridgeline Oil and Asphalt were returned to service. Line 312 and Texaco were returned to service at approximately 1100 hours on Oct. 26. Repairs were made by replacing the damaged portion of pipeline with pre-tested pipe, successful radiographic examinations of the welds were made, and the approximate 8 miles of L-300A was purged and re-pressurized with natural gas prior to 0145 hours on Oct. 26, 2014. The third party started excavation (USA ticket 441996) before the site was marked by PG&E. The incident was reported to the CPUC and DOT because damages exceed $50,000.
