For more information, contact CAL FIRE-FRAP, PO Box 944246, Sacramento, CA 94244-2460, (916) 327-3939.

The State of California and the Department of Forestry and Fire Protection make no representations or warranties regarding the accuracy of data or maps. Neither the State nor the Department shall be liable under any circumstances for any direct, special, incidental, or consequential damages with respect to any claim by any user or third party on account of, or arising from, the use of data or maps.

This map has been created by CAL FIRE's Fire and Resource Assessment Program (FRAP) using data and models from firebrands. The updated fire hazard severity zones will be used by building officials to determine sale and 100 foot defensible space clearance. It is likely that the fire hazard severity zones will be used for updates in 2008. These new codes include provisions to improve the ignition resistance of buildings, especially in areas of very high fire hazard within Local Responsibility Areas (LRA). Mapping of the areas referred to as Very High Fire Hazard Severity Zones (VHFHSZ), is based on relevant factors such as fuels, terrain, and expected burn probabilities to quantify the likelihood and nature of vegetation fire exposure.

An interactive system for viewing map data is hosted by the UC Center for Fire at http://firecenter.berkeley.edu/fhsz/. Details on the project and specific modeling methodology can be found at http://frap.cdf.ca.gov/projects/hazard/methods.html.

A printed version of this map is available from CAL FIRE Incorporated Cities (Incorp07 _2) and CAL FIRE State Responsibility Areas (SRA05_ 4) at 45" X 30" at a scale of 1:100,000. For more information, contact Mike Chrisman, Secretary for Resources, 51175-89, Sacramento, CA 95814-1999, (530) 472-3121, or Ruben Grijalva, Director, Department of Forestry and Fire Protection, 51175-88, Sacramento, CA 95814-1999, (916) 327-3939.
