DRAFT FIRE HAZARD SEVERITY ZONES IN LRA

This map has been created by CAL FIRE's Fire and Resource Assessment Program (FRAP) using data and models from firebrands. The updated fire hazard severity zones will also be used by property owners to comply with natural hazards disclosure requirements at time of property sale and 100 foot defensible space clearance. It is likely that the fire hazard severity zones will be used for updates to the safety element of general plans.

The California Building Commission adopted the Wildland-Urban Interface codes in late 2005 to be effective in 2008. These new codes include provisions (including firebrands) to new construction. Details on the project and specific modeling methodology can be found at http://frap.cdf.ca.gov/projects/lrazones/methods.html.

Questions can be directed to:

Kathleen Schori (Northern Region) (530) 472-3121 kathleen.schori@fire.ca.gov.

Sass Barton (Southern Region) (559) 243-4130 sass.barton@fire.ca.gov.

Obtain FRAP maps, data, metadata and publications on the Internet at http://frap.cdf.ca.gov or warranties regarding the accuracy of data or maps. Neither the State nor the Department shall be responsible or liable for any loss or damage caused by the use of this information or these products.
