This CTS guide utilizes the following NFPA standards to provide the qualifications for State Fire Training’s Fire Fighter 1 (2019) certification:

- NFPA 1051: Standard for Wildland Firefighting Personnel Professional Qualifications (2016)

State Fire Training coordinated the development of this CTS guide. Before its publication, the Statewide Training and Education Advisory Committee (STEAC) and the State Board of Fire Services (SBFS) recommended this CTS guide for adoption by the Office of the State Fire Marshal (OSFM).

Acknowledgements

State Fire Training appreciates the hard work and accomplishments of those who build the solid foundation on which this program continues to grow. State Fire Training gratefully acknowledges the following individuals and organizations for their diligent efforts and contributions that made the development and publication of this document possible.

CAL FIRE

- Thom Porter, Director
- Mike Richwine, Acting State Fire Marshal
- Andrew Henning, Chief of State Fire Training
- Ron Coleman, Chair, Statewide Training and Education Advisory Committee (STEAC)

Cadre – 2019 Development Cadre

Leadership

- Jim Eastman, Cadre Lead, Training Specialist III (RA), CAL FIRE; Deputy Chief (ret.), Sacramento Metro Fire Department
- Allison L. Shaw, Editor, California State University, Sacramento

Members

- Greg Belk, Division Chief, CAL FIRE San Diego
- Paul Gonzalez, Fire Engineer, San Jose Fire Department; Coordinator, South Bay Regional Fire Academy
- Garrett Huff, Battalion Chief, Santa Barbara County Fire Department; Secretary, South Division, CalChiefs Training Officers
- Donavan Lacy, Battalion Chief, Anderson Fire Protection District; Director of Fire Technology/EMS, Shasta Community College; Area 2 Director, CalChiefs Training Officers
- Andrew Murtagh, Lieutenant, San Francisco Fire Department; Adjunct Faculty, Fire Technology Program, College of San Mateo
- Michael Massone, Fire Captain, San Diego Federal Fire; Vice President, California Professional Fire Fighters; Representative, California Joint Apprenticeship Committee
- German Sierra, Fire Fighter/Paramedic (ret.), Oakland Fire Department; Faculty – Program Coordinator, Las Positas College; Representative, California Fire Technology Directors’ Association (CFTDA)
- Shawn Tukua, Captain, Los Angeles Fire Department; State Fire Training Coordinator; Area 15 Director, CalChiefs Training Officers
- Rob Wheatley, Division Chief, Director of Fire Training, CAL FIRE Training Center
How to Read a CTS Guide

Overview

A certification training standard (CTS) guide lists the requisite knowledge, skills, and job performance requirements an individual must complete in order to become certified in a specific job function.

It also documents and justifies the OSFM-approved revisions to the certification’s NFPA standard, and identifies where each certification training standard is taught (course plan), tested (skill sheets), and validated (task book).

Individuals aspiring to meet State Fire Training’s certification training standards must do so in accordance with the codes, standards, regulations, policies, and standard operating procedures applicable within their own agency or jurisdiction.

Format

Each certification training standard is comprised of eight sections.

Section Heading
Training standards are grouped by section headings that describe a general category. For example, the Fire Fighter 1 CTS guide includes the following section headings: NFPA Requirements, Fire Department Communications, Fireground Operations, and Preparedness and Maintenance.

Training Standard Title
The training standard title provides a general description of the performance requirement contained within the individual standard.

Authority
The CTS guide references each individual standard with one or more paragraphs of the corresponding National Fire Protection Association (NFPA) Professional Qualifications. This ensures that each fire service function within California’s certification system meets or exceeds NFPA standards.

When California requirements exceed the NFPA standard, the CTS guide cites the Office of the State Fire Marshal as the authority and prints the corresponding information in italics.

Job Performance Requirements
This segment includes a written statement that describes a specific job-related task, the items an individual needs to complete the task, and measurable or observable outcomes.
How to Read a CTS Guide

Requisite Knowledge
This segment lists the knowledge that an individual must acquire in order to accomplish the job performance requirement.

Requisite Skills
This segment lists the skills that an individual must acquire in order to accomplish the job performance requirement.

Content Modification
This table documents and justifies any revisions to the NFPA standard that the development or validation cadres make during the development of a CTS guide.

Cross Reference
This table documents where each training standard is taught (course plan), tested (skill sheets), and validated (task book).
Fire Fighter 1 - Structure

Section 1: Structure Fire Fighter Duties

1-1: Role of the Fire Fighter 1

Authority
   • Paragraph 4.1.1, 4.1.2

Job Performance Requirement
There is no job performance requirement identified for this training standard.

Requisite Knowledge
1. Describe the organization of the fire department
2. Describe the role of the Fire Fighter 1 in the organization
3. Describe the mission of fire service
4. Describe the fire department’s standard operating procedures (SOPs) and rules and regulations as they apply to the Fire Fighter 1
5. Describe the value of fire and life safety initiatives in support of the fire department mission and to reduce fire fighter line-of-duty injuries and fatalities
6. Identify the role of other agencies as they relate to the fire department
7. Identify the signs and symptoms of behavioral and emotional distress
8. Identify aspects of the fire departments’ member assistance program
9. Describe the importance of physical fitness and a healthy lifestyle to the performance of the duties of a fire fighter
10. Define the critical aspects of NFPA 1500

Requisite Skills
1. Don personal protective clothing, doff personal protective clothing, perform field reduction of contaminants, and prepare for reuse
2. Hoist tools and equipment using ropes and the correct knot
3. Locate information in departmental documents and standards or code materials

1-2: Inspecting and Maintaining Personal Protective Equipment

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
*Inspect and maintain structural personal protective equipment (PPE), given PPE, so that PPE is inspected, maintained, and returned to a ready state.*

Requisite Knowledge
1. Identify the components of structural PPE
2. Explain the importance of standards for structural PPE
3. Describe how improper usage or maintenance can compromise PPE effectiveness
4. Describe proper method for inspecting, cleaning, and maintaining structural PPE
5. Identify when to remove PPE from service
6. Describe how to remove PPE from service

Requisite Skills
1. Inspect structural PPE
2. Clean structural PPE
3. Maintain structural PPE

1-4: Donning Structural Personal Protective Equipment

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Don structural personal protective equipment (PPE), given PPE, so the PPE is donned in 60 seconds or less and all elements of the PPE ensemble are worn in accordance with manufacturer guidelines.

Requisite Knowledge
1. Describe the protection provided by structural PPE
2. Describe the limitations of structural PPE
3. Identify manufacturer guidelines for correct PPE use

Requisite Skills
1. Don PPE

1-5: Donning Self-Contained Breathing Apparatus

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Don self-contained breathing apparatus (SCBA), given SCBA, so that the SCBA is donned in 60 seconds or less and all elements of the SCBA are worn and operated in accordance with manufacturer guidelines.

Requisite Knowledge
1. Identify conditions that require respiratory protection
2. Describe the protection provided by SCBA
3. Describe the uses and limitations of SCBA
4. Describe potential long-term consequences of exposure to products of combustion
5. Identify manufacturer guidelines for correct SCBA use
6. Describe operational inspection procedures for SCBA

Requisite Skills
7. Don SCBA
8. Perform operational inspection of SCBA

1-6: Doffing Self-Contained Breathing Apparatus

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Doff self-contained breathing apparatus (SCBA), given SCBA, so that SCBA is removed in accordance with manufacturer guidelines and returned to a ready state.

Requisite Knowledge
1. Identify when it is safe to doff respiratory protection
2. Identify manufacturer guidelines for doffing SCBA
3. Identify AHJ policies and procedures for doffing SCBA

Requisite Skills
1. Doff SCBA
2. Return SCBA to a ready state

1-8: Doffing Self-Contained Breathing Apparatus and Personal Protective Equipment for Gross Decontamination

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Doff self-contained breathing apparatus (SCBA) and structural personal protective equipment (PPE), given SCBA and PPE, so that SCBA and PPE are removed to reduce contaminant exposure; SCBA and PPE undergo gross decontamination and are tagged and transported; and fire fighter conducts physical decontamination as soon as possible, in order to reduce exposure to field contaminates.

Requisite Knowledge
1. Identify the purpose and benefits of gross decontamination
2. Identify parts of the body most susceptible to contaminate exposure
3. Identify common routes of exposure
4. Describe how to conduct onsite gross decontamination
5. Describe how to doff SCBA and PPE to reduce exposure to field contaminants
6. Describe how to tag and transport contaminated SCBA and PPE
7. Identify personal decontamination processes

Requisite Skills
1. Don and doff SCBA and PPE

1-9: Identifying Confined Spaces

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Identify a permit-required and non-permit-required confined space, given an incident and a confined space, so that hazards associated with confined spaces are identified, equipment is secured, and incident management operations and communications are followed, in accordance with state regulations and industry standards.

Requisite Knowledge
1. Identify regulations and standards applicable to confined space incidents
2. Describe the history and dangers of confined space incidents
3. Describe how to identify a confined space
4. Describe how to identify a permit-required confined space
5. Describe how to recognize hazards
6. Describe how to isolate hazards and minimize risks
7. Describe how to recognize the need for and manage support resources
8. Describe how to ensure that resource application fits the operational requirements
9. Describe how to recognize the need for technical rescue resources
10. Describe how to search areas immediately adjacent to the space
11. Describe how to establish victim communication
12. Describe how to determine a victim survivability profile
13. Describe how to evaluate a non-entry rescue
14. Describe how to perform a non-entry rescue
15. Describe the positions and components of a permit-required confined space entry
16. Describe Cal/OSHA confined space operational positions and responsibilities

Requisite Skills
1. None required

The training for this standard can be met through the completion of State Fire Training’s Confined Space Rescue Awareness course.
1-10: Operating within the Incident Command System

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Operate within the Incident Command System (ICS), given an incident and an incident action plan, so that organizational elements are recognized, positions and responsibilities are identified, facility needs are met, and the incident is managed, in accordance with state and federal regulations.

Requisite Knowledge
1. Explain the principles and basic structure of the Incident Command System (ICS)
2. Describe the NIMS management characteristics that are the foundation of the ICS
3. Describe the ICS functional areas and the roles of the Incident Commander and Command Staff
4. Describe the General Staff roles within ICS
5. Identify how NIMS management characteristics apply to ICS for a variety of roles and discipline areas

The training for this standard can be met through the completion of FEMA’s IS-100: Introduction to the Incident Command System and IS-700: An Introduction to the National Incident Management System.
1-11: Fire Fighter Physical Health and Safety

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Identify common fire fighter health and safety issues, given an assignment, in order to avoid or mitigate common accidents and injuries, maintain a healthy and physically fit lifestyle, and conduct life safety initiatives in the line of duty.

Requisite Knowledge
1. List common types of accidents and injuries and identify their causes
2. Describe how physical fitness and a healthy lifestyle correspond to fire fighter performance
3. Define critical aspects of NFPA 1500: Standard on Fire Department Occupational Safety and Health Program (current edition)
4. Describe how fire and life safety initiatives support a fire department’s mission to reduce fire fighter line-of-duty injuries and deaths

Requisite Skills
1. None required

Authority
   • Paragraph 4.2.1
2. Office of the State Fire Marshal

Job Performance Requirement
Initiate the response to a reported emergency, given the report of an emergency, fire department SOPs, and communications equipment, so that all necessary information is obtained, communications equipment is operated correctly, and the information is relayed promptly and accurately to the dispatch center.

Requisite Knowledge
1. Explain the procedures for reporting an emergency
2. Identify departmental SOPs for taking and receiving alarms, radio codes, or procedures
3. List information needs of dispatch center
4. Identify different types of fire department communications equipment

Requisite Skills
1. Operate fire department communications equipment
2. Relay information
3. Record information

Section 3: Fire Ground Operations

3-1: Using Self-contained Breathing Apparatus During Emergency Operations

Authority
   • Paragraph 4.3.1
5. Office of the State Fire Marshal

Job Performance Requirement
Use self-contained breathing apparatus (SCBA) during emergency operations, given SCBA and other PPE, so that the SCBA is correctly donned, the SCBA is correctly worn, controlled breathing techniques are used, emergency procedures are enacted if the SCBA fails, all low-air warnings are recognized, respiratory protection is not intentionally compromised, and hazardous areas are exited prior to air depletion.

Requisite Knowledge
1. Identify conditions that require respiratory protection
2. Describe the uses and limitations of SCBA
3. Identify the components of SCBA
4. Describe different donning procedures
5. Describe different breathing techniques
6. Describe how to monitor and manage air consumption
7. Describe indications for and emergency procedures used with SCBA
8. Identify physical requirements of the SCBA wearer

Requisite Skills
1. Demonstrate different controlled breathing techniques
2. Replace SCBA air cylinders
3. Use SCBA to exit through restricted passages
4. Monitor and manage air consumption
5. Initiate and complete emergency procedures in the event of SCBA failure or air depletion
6. Complete donning procedures

3-2: Responding on an Apparatus to an Emergency Scene

Authority
   • Paragraph 4.3.2

Job Performance Requirement
Respond on apparatus to an emergency scene, given an apparatus, personal protective clothing and other necessary PPE, so that the apparatus is correctly mounted and dismounted, seat belts are used while the vehicle is in motion, and other personal protective equipment is correctly used.

Requisite Knowledge
1. Describe mounting and dismounting procedures for riding fire apparatus
2. Identify hazards and ways to avoid hazards associated with riding apparatus
3. Describe prohibited practices
4. Identify different types of department PPE and their means for usage

Requisite Skills
1. Use each piece of provided safety equipment

Authority
   • Paragraph 4.3.3

Job Performance Requirement
Establish and operate in work areas at emergency scenes, given an apparatus, personal protective equipment, traffic and scene control devices, structure fire and roadway emergency scenes, traffic hazards and downed electrical wires, photovoltaic power systems, battery storage systems, an assignment, and SOPs, so that procedures are followed, protective equipment is worn, protected work areas are established as directed using traffic and scene control devices, and the fire fighter performs assigned tasks only in established, protected work areas.

Requisite Knowledge
1. Identify potential hazards involved in operating on emergency scenes including vehicle traffic, utilities, and environmental conditions
2. Describe proper procedures for mounting and dismounting apparatus in traffic
3. Describe procedures for safe operation at emergency scenes
4. Identify the protective equipment available for members’ safety on emergency scenes and work zone designations

Requisite Skills
1. Use personal protective clothing
2. Deploy traffic and scene control devices
3. Dismount apparatus
4. Operate in the protected work areas as directed

3-4: Forcing Entry into a Structure

Authority
   - Paragraph 4.3.4

Job Performance Requirement
Force entry into a structure, given PPE, tools, a prop or structure with doors, walls, and windows, and an assignment, so that the tools are used as designed, the barrier is removed, and the opening is in a safe condition and ready for entry.

Requisite Knowledge
1. Describe basic construction of typical doors, windows, and walls within the department’s community or service area
2. Describe types and uses of hand and power tools used for forcible entry
3. Describe the operation of doors, windows, and locks
4. Identify the dangers associated with forcing entry through doors, windows, and walls

Requisite Skills
1. Transport and operate hand and power tools
2. Force entry through doors, windows, and walls using assorted methods and tools

3-5: Exiting a Hazardous Area

Authority
   • Paragraph 4.3.5

Job Performance Requirement
Exit a hazardous area as a team, given vision-obscured conditions and PPE, so that a safe haven is found before exhausting the air supply, others are not endangered, and the team integrity is maintained.

Requisite Knowledge
1. Describe personnel accountability systems
2. Describe communication procedures
3. Describe emergency evacuation methods
4. Define what constitutes a safe haven
5. Identify elements that create or indicate a hazard
6. Identify emergency procedures for loss of air supply

Requisite Skills
1. Operate as a team member in vision-obscured conditions
2. Locate and follow a guide line
3. Conserve air supply
4. Evaluate areas for hazards
5. Identify a safe haven

3-6: Setting Up, Mounting, Ascending, Dismounting, and Descending Ground Ladders

Authority
   • Paragraph 4.3.6
2. Office of the State Fire Marshal

Job Performance Requirement
Set up, mount, ascend, dismount, and descend ground ladders, given single and extension ladders, an assignment, PPE, and team members if needed, so that hazards are assessed, the ladder is stable, the angle is correct for climbing, extension ladders are extended to the necessary height with the fly locked, the top is placed against a reliable structural component, and the assignment is accomplished.

Requisite Knowledge
1. Identify the uses of ground ladders
2. Identify the types, parts, and construction features of a ground ladder
3. Identify types of lifts, carries, and raises
4. Describe how to secure ground ladders
5. Describe how to operate from ground ladders
6. Describe hazards associated with setting up ladders
7. Define what constitutes a stable foundation for ladder placement
8. Identify different angles for various tasks
9. Describe climbing techniques
10. Describe safety limits to the degree of angulation
11. Describe what constitutes a reliable structural component for top placement

Requisite Skills
1. Lift and carry ladders
2. Raise and move ladders
3. Extend ladders
4. Lock flies
5. Secure ground ladders
6. Determine that a wall and roof will support the ladder
7. Judge extension ladder height requirements
8. Place the ladder to avoid obvious hazards
9. Mount, ascend, dismount, and descend the ladder
10. Demonstrate proper climbing techniques
11. Operate from ground ladders

3-7: Attacking a Passenger Vehicle Fire

Authority
   - Paragraph 4.3.7
2. Office of the State Fire Marshal

Job Performance Requirement
Attack a passenger vehicle fire operating as a member of a team, given personal protective equipment (PPE), self-contained breathing apparatus (SCBA), an attack line (1½ inch or larger), hand tools, and a passenger vehicle or prop, so that hazards are avoided, leaking flammable liquids are identified and controlled, protection from flash fires is maintained, all vehicle compartments are overhauled, and the fire is extinguished.

Requisite Knowledge
1. Describe principles of fire streams as they relate to fighting automobile fires
2. Identify precautions to be followed when advancing hose lines toward an automobile
3. List observable results that a fire stream has been properly applied
4. Identifying alternative fuels and the hazards associated with them
5. Describe dangerous conditions created during an automobile fire
6. Describe common types of accidents or injuries related to fighting automobile fires and how to avoid them
7. Describe how to access locked passenger, trunk, and engine compartments
8. Identify methods for overhauling an automobile

Requisite Skills
1. Identify automobile fuel types
2. Assess and control fuel leaks
3. Open, close, and adjust the flow and pattern on nozzles
4. Apply water for maximum effectiveness while maintaining flash fire protection
5. Advance 1½ in. (38 mm) or larger diameter attack lines
6. Expose hidden fires by opening all automobile compartments

3-8: Extinguishing Fires in Exterior Class A Materials

Authority
   • Paragraph 4.3.8
2. Office of the State Fire Marshal

Job Performance Requirement
Extinguish fires in exterior Class A materials, given fires in stacked or piled materials, small unattached structures, or storage containers that can be fought from the exterior, attack lines, hand tools and master stream devices, PPE, and an assignment, so that exposures are protected, the spread of fire is stopped, collapse hazards are avoided, water application is effective, the fire is extinguished, and signs of the origin area(s) and arson are preserved.

Requisite Knowledge
1. Describe types of attack lines and water streams appropriate for attacking stacked, piled materials, and outdoor fires
2. Identify dangers — such as collapse — associated with stacked and piled materials
3. Describe various extinguishing agents and their effect on different material configurations
4. Identify tools and methods to use in breaking up various types of materials
5. Describe difficulties related to complete extinguishment of stacked and piled materials
6. Identify water application methods for exposure protection and fire extinguishment
7. Describe dangers such as exposure to toxic or hazardous materials associated with storage building and container fires
8. Identify obvious signs of origin and cause
7. List techniques for the preservation of fire cause evidence

Requisite Skills
1. Recognize inherent hazards related to the material’s configuration
2. Operate handlines or master streams
3. Break up material using hand tools and water streams
4. Operate hoselines and other water application devices
5. Evaluate and modify water application for maximum penetration
6. Search for and expose hidden fires
7. Assess patterns for origin determination
8. Evaluate for complete extinguishment

3-9: Conducting a Search and Rescue in a Structure

Authority
   - Paragraph 4.3.9
2. Office of the State Fire Marshal

Job Performance Requirement
Conduct a search and rescue in a structure operating as a member of a team, given an assignment, obscured vision conditions, personal protective equipment (PPE), self-contained breathing apparatus (SCBA), a flashlight, forcible entry tools, hose lines or guide lines, a thermal imaging device, and ladders when necessary, so that ladders are correctly placed when used, all assigned areas are searched, all victims are located and removed, team integrity is maintained, and team members’ safety — including respiratory protection — is not compromised.

Requisite Knowledge
1. Describe how to use forcible entry tools during rescue operations
2. Describe how to use thermal imaging devices and other search tools
3. Describe how to use ladder operations for rescue
4. Identify the psychological effects of operating in obscured conditions and ways to manage them
5. Describe methods to determine if an area is tenable
6. Describe primary and secondary search techniques
7. Identify team members’ roles and goals
8. Describe methods and indicators used to locate victims
9. Describe victim removal methods (including various carries)
10. Identify considerations related to respiratory protection

Requisite Skills
1. Use SCBA to exit through restricted passages
2. Set up and use different types of ladders for various types of rescue operations
3. Rescue a fire fighter with functioning respiratory protection
4. Rescue a fire fighter whose respiratory protection is not functioning
5. Rescue a person who has no respiratory protection
6. Assess areas to determine tenability

Published Month Year
3-10: Attacking an Interior Structure Fire

Authority
   • Paragraph 4.3.10
2. Office of the State Fire Marshal

Job Performance Requirement
Attack an interior structure fire operating as a member of a team, given an attack line (1½ inch or larger), pumping apparatus, established water supply, ladders when needed, personal protective equipment, self-contained breathing apparatus (SCBA), tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control.

Requisite Knowledge
1. Identify types, designs, and uses of fire hoses
2. Identify fittings, tools, and appliances
3. Describe common building materials and construction types
4. Identify the principles of fire streams
5. Describe types, design, operation, nozzle pressure effects, and flow capabilities of nozzles
6. Identify precautions to be followed when advancing hoselines to a fire
7. Describe observable results that a fire stream has been properly applied
8. Identify dangerous building conditions created by fire
9. Identify principles of exposure protection
10. Describe potential long-term consequences of exposure to products of combustion
11. List physical states of matter in which fuels are found
12. List common types of accidents or injuries and their causes
13. Describe how to apply each size and type of attack line
14. Define the role of the backup team in fire attack situations
15. Describe attack and control techniques for grade level and above and below grade level fires
16. Identify methods for locating and exposing hidden fires

Requisite Skills
1. Prevent water hammers when shutting down nozzles
2. Open, close, and adjust nozzle flow and patterns
3. Apply water using direct, indirect, and combination attacks
4. Advance charged and uncharged 1½ in. (38 mm) diameter or larger hose lines up ladders and up and down interior and exterior stairways
5. Extend hose lines
6. Replace burst hose sections
7. Operate charged hose lines of 1½ in. (38 mm) diameter or larger while secured to a ground ladder
8. Couple and uncouple various hose line connections
9. Carry hose
10. Attack fires at grade level and above and below grade levels
11. Locate and suppress interior wall and subfloor fires

  • RK 4, 6, 7 and RS 1, 2, 5, 6, 8, 9 | | |
| Fire Fighter 1A, Topic 5-12: Attacking an Interior Structure Fire | | |
The training for this standard can be met through the completion of State Fire Training’s Fire Control 3: Structural Fire Fighting (2018) course.
3-11: Performing Horizontal Ventilation on a Structure

Authority
   • Paragraph 4.3.11

Job Performance Requirement
Perform horizontal ventilation on a structure operating as part of a team, given an assignment, PPE, ventilation tools, equipment, and ladders, so that the ventilation openings are free of obstructions, tools are used as designed, ladders are correctly placed, ventilation devices are correctly placed, and the structure is cleared of smoke.

Requisite Knowledge
1. Describe the principles, advantages, limitations, and effects of horizontal, mechanical, and hydraulic ventilation
2. Describe safety considerations when venting a structure
3. Describe fire behavior in a structure
4. List the products of combustion found in a structure fire
5. Identify the signs, causes, effects, and prevention of backdrafts
6. Describe the relationship of oxygen concentration to life safety and fire growth

Requisite Skills
1. Transport and operate ventilation tools and equipment and ladders
2. Use safe procedures for breaking window and door glass and removing obstructions

| (CTS 3-11) |
3-12: Performing Vertical Ventilation on a Structure

Authority
   - Paragraph 4.3.12
2. Office of the State Fire Marshal

Job Performance Requirement
Perform vertical ventilation on a structure as part of a team, given an assignment, PPE, ground and roof ladders, and tools, so that ladders are positioned for ventilation, a specified opening is created, all ventilation barriers are removed, structural integrity is not compromised, products of combustion are released from the structure, and the team retreats from the area when ventilation is accomplished.

Requisite Knowledge
1. Describe vertical (top-side) ventilation
2. Describe methods of heat transfer
3. Describe the principles of thermal layering within a structure on fire
4. List the techniques and safety precautions for venting flat roofs, pitched roofs, and basements
5. Describe basic indicators of potential collapse or roof failure
6. Identify the effects of construction type and elapsed time under fire conditions on structural integrity
7. Describe the advantages and disadvantages of vertical and trench/strip ventilation

Requisite Skills
1. Transport and operate ventilation tools and equipment
2. Hoist ventilation tools to a roof
3. Cut roofing and flooring materials to vent flat roofs, pitched roofs, and basements
4. Sound a roof for integrity
5. Clear an opening with hand tools
6. Select, carry, deploy, and secure ground ladders for ventilation activities
7. Deploy roof ladders on pitched roofs while secured to a ground ladder
8. Carry ventilation-related tools and equipment while ascending and descending ladders

Fire Fighter 1 - Structure
Section 3: Fire Ground Operations

3-13: Overhauling a Fire Scene

Authority
   - Paragraph 4.3.13
2. Office of the State Fire Marshal

Job Performance Requirement
Overhaul a fire scene, given PPE, an attack line, hand tools, a flashlight, and an assignment, so that structural integrity is not compromised, all hidden fires are discovered, fire cause evidence is preserved, and the fire is extinguished.

Requisite Knowledge
1. Describe the purpose of and methods for overhaul
2. Describe types of fire attack lines and water application devices most effective for overhaul
3. Describe water application methods for extinguishment that limit water damage
4. Identify types of tools and methods used to expose hidden fire
5. Describe dangers associated with overhaul
6. Describe obvious signs of area of origin or signs of arson
7. Identify reasons for protection of fire scene

Requisite Skills
1. Deploy and operate an attack line for overhaul
2. Remove flooring, ceiling, and wall components to expose void spaces without compromising structural integrity
3. Apply water for maximum effectiveness
4. Expose and extinguish hidden fires in walls, ceilings, and subfloor spaces
5. Recognize and preserve obvious signs of area of origin and arson
6. Separate, remove, and relocate charred material to a safe location while protecting the area of origin for cause determination
7. Evaluate for complete extinguishment

3-14: Conserving Property

Authority
   - Paragraph 4.3.14
2. Office of the State Fire Marshal

Job Performance Requirement
Conserve property as a member of a team, given salvage tools and equipment, PPE, and an assignment, so that the building and its contents are protected from further damage.

Requisite Knowledge
1. Describe the purpose of property conservation and its value to the public
2. Describe methods used to protect property
3. List types of and uses for salvage covers
4. Describe operations at properties protected with automatic sprinklers
5. Describe how to stop the flow of water from an automatic sprinkler head
6. Identify the main control valve on an automatic sprinkler system
7. Describe forcible entry issues related to salvage
8. Describe procedures for protecting possible areas of origin and potential evidence

Requisite Skills
1. Cluster furniture
2. Deploy covering materials
3. Roll and fold salvage covers for reuse
4. Construct water chutes and catch-alls
5. Remove water
6. Cover building openings, including doors, windows, floor openings, and roof openings
7. Stop the flow of water from a sprinkler with sprinkler wedges or stoppers
8. Operate a main control valve on an automatic sprinkler system

3-15: Connecting a Fire Department Pumper to a Water Supply

Authority
   • Paragraph 4.3.15
2. Office of the State Fire Marshal

Job Performance Requirement
Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, a fire hydrant or static water source, an apparatus, and PPE, so that connections are tight and water flow is unobstructed.

Requisite Knowledge
1. Describe types and components of municipal and rural water systems
2. Describe loading and off-loading procedures for mobile water supply apparatus
3. Describe fire hydrant operation
4. Identify suitable static water supply sources
5. Describe procedures and protocol for connecting to various water sources

Requisite Skills
1. Hand lay a supply hose
2. Connect and place hard suction hose for drafting operations
3. Deploy portable water tanks as well as the equipment necessary to transfer water between and draft from them
4. Make hydrant-to-pumper hose connections for forward and reverse lays
5. Connect supply hose to a hydrant
6. Fully open and close the hydrant

3-16: Extinguishing Incipient Class A, Class B, and Class C Fires

Authority
   • Paragraph 4.3.16
2. Office of the State Fire Marshal

Job Performance Requirement
Extinguish incipient Class A, Class B, and Class C fires, given a selection of portable fire extinguishers and PPE, so that the correct extinguisher is chosen, the fire is completely extinguished, and correct extinguisher-handling techniques are followed.

Requisite Knowledge
1. Describe the classifications of fire
2. Identify the types of, rating systems for, and risks associated with each class of fire
3. Describe operating methods and limitations of portable extinguishers

Requisite Skills
1. Operate portable fire extinguishers
2. Approach fire with portable fire extinguishers
3. Select an appropriate extinguisher based on the size and type of fire
4. Safely carry portable fire extinguishers

3-22: Operating an Air-Monitoring Instrument

Authority
   - Paragraph 4.3.21

Job Performance Requirement
Operate an air-monitoring instrument, given an air monitor and an assignment or task, so that
the device is operated and the fire fighter recognizes the high- or low-level alarms of the air
monitor and takes action to mitigate the hazard.

Requisite Knowledge
1. Identify the various uses for an air monitor
2. Describe basic operation of an air monitor
3. Describe air monitoring procedures
4. Identify how to recognize high- or low-level alarms of the air monitor
4. Describe emergency actions to be taken upon the activation of the high- or low-level alarms
   of the air monitor

Requisite Skills
1. Operate the air monitor

Section 4: Preparedness and Maintenance

4-1: Cleaning and Checking Ladders, Ventilation Equipment, SCBA, Ropes, Salvage Equipment, and Hand Tools

Authority
   • Paragraph 4.5.1
2. Office of the State Fire Marshal

Job Performance Requirement
Clean and check ladders, ventilation equipment, SCBA, ropes, salvage equipment, and hand tools, given cleaning tools, cleaning supplies, and an assignment, so that equipment is clean and maintained according to manufacturer’s or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise.

Requisite Knowledge
1. Describe types of cleaning methods for various tools and equipment
2. Describe the correct use of cleaning solvents
3. Identify manufacturer or departmental guidelines for cleaning equipment and tools
4. Identify manufacturer or departmental guidelines for removing tools and equipment from service

Requisite Skills
1. Select correct tools to maintain various parts and pieces of equipment
2. Follow guidelines
3. Complete recording and reporting procedures

5-2: Recognizing and Identifying Hazardous Materials/WMD and Associated Hazards

Authority
   • Paragraph 4.2.1

Job Performance Requirement
Recognize and identify the hazardous materials/WMD and hazards involved in a hazardous materials/WMD incident, given a hazardous materials/WMD incident and approved reference sources, so that the presence of hazardous materials/WMD is recognized and the materials and their hazards are identified.

Requisite Knowledge
1. Describe how to recognize hazardous materials and WMD
2. List basic hazards associated with classes and divisions
3. Identify indicators to the presence of hazardous materials including container shapes, NFPA 704 markings, globally harmonized system (GHS) markings, placards, labels, pipeline markings, other transportation markings, shipping papers with emergency response information, and other indicators
4. Describe how to access information from the Emergency Response Guidebook (ERG) (current edition) using name of the material, UN/NA identification number, placard applied, or container identification charts
5. List types of hazard information available from the ERG, safety data sheets (SDS), shipping papers with emergency response information, and other approved reference sources

Requisite Skills
1. Recognize indicators to the presence of hazardous materials/WMD
2. Identify hazardous materials/WMD by name, UN/NA identification number, placard applied, or container identification charts
3. Use the ERG, SDS, shipping papers with emergency response information, and other approved reference sources to identify hazardous materials/WMD and their potential fire, explosion, and health hazards

| Fire Fighter 1B, Topic 2-2: Recognizing and Identifying Hazardous Materials/WMD and Associated Hazards | 5-2a: Recognize, Identify, and Isolate Hazardous Materials/WMD  
5-2b: Identify Markings | (CTS 5-2) |
5-3: Isolating the Hazard Area and Denying Entry

Authority
   - Paragraph 4.3.1
2. Office of the State Fire Marshal

Job Performance Requirement
Isolate the hazard area and deny entry at a hazardous materials/WMD incident, given a hazardous materials/WMD incident, policies and procedures, and approved reference sources, so that the hazard area is isolated and secured, personal safety procedures are followed, hazards are avoided or minimized, and additional people are not exposed to further harm.

Requisite Knowledge
1. Describe how to use the ERG, SDS, shipping papers with emergency response information, and other approved reference sources to identify precautions to be taken to protect responders and the public
2. Describe policies and procedures for isolating the hazard area and denying entry
3. Identify the purpose of and methods for isolating the hazard area and denying entry

Requisite Skills
1. Recognize precautions for protecting responders and the public
2. Identifying isolation areas
3. Denying entry
4. Avoiding or minimizing hazards

5-4: Initiating Required Notifications

Authority
   • Paragraph 4.4.1

Job Performance Requirement
Initiate required notifications at a hazardous materials/WMD incident, given a hazardous materials/WMD incident, policies and procedures, and approved communications equipment, so that the notification process is initiated and the necessary information is communicated.

Requisite Knowledge
1. Identify policies and procedures for notification, reporting, and communications
2. List types of approved communications equipment
3. Describe how to operate equipment

Requisite Skills
1. Operate approved communications equipment
2. Communicate in accordance with policies and procedures

6-2: Identifying the Scope of a Hazardous Materials/WMD Incident

Authority
   - Paragraph 5.2.1

Job Performance Requirement
Identify the scope of the problem at a hazardous materials/WMD incident, given a hazardous materials/WMD incident, an assignment, policies and procedures, and approved reference sources, so that container types, materials, location of any release, and surrounding conditions are identified, hazard information is collected, the potential behavior of a material and its container is identified, and the potential hazards, harm, and outcomes associated with that behavior are identified.

Requisite Knowledge
1. Define hazard classes and divisions
2. Identify types of containers
3. Identify container identification markings, including piping and pipeline markings and contacting information
4. Identify types of information to be collected during the hazardous materials/WMD incident survey
5. Identify the availability and location of shipping papers in transportation and of safety data sheets (SDS) at facilities
6. Describe types of hazard information available from and how to contact CHEMTREC, CANUTEC, and SETIQ, governmental authorities, and manufacturers, shippers, and carriers
7. Describe how to communicate with carrier representatives to reduce impact of a release
8. Identify basic physical and chemical properties, including boiling point, chemical reactivity, corrosivity (pH), flammable (explosive) range [LFL (LEL) and UFL (UEL)], flash point, ignition (autoignition) temperature, particle size, persistence, physical state (solid, liquid, gas), radiation (ionizing and nonionizing), specific gravity, toxic products of combustion, vapor density, vapor pressure, and water solubility
9. Identify the behavior of a material and its container based on the material’s physical and chemical properties and the hazards associated with the identified behavior
10. List examples of potential criminal and terrorist targets
11. Identify indicators of possible criminal or terrorist activity for each of the following: chemical agents, biological agents, radiological agents, illicit laboratories (i.e., clandestine laboratories, weapons labs, ricin labs), and explosives
12. Describe additional hazards associated with terrorist or criminal activities, such as secondary devices
13. Determine the likely harm and outcomes associated with the identified behavior and the surrounding conditions
Requisite Skills
1. Identify container types, materials, location of release, and surrounding conditions at a hazardous materials/WMD incident
2. Collect hazard information
3. Communicate with pipeline operators or carrier representatives
4. Describe the likely behavior of the hazardous materials or WMD and its container
5. Describe the potential hazards, harm, and outcomes associated with that behavior and the surrounding conditions

6-3: Identifying Action Options for a Hazardous Materials/WMD Incident

Authority
   • Paragraph 5.3.1

Job Performance Requirement
Identify the action options for a hazardous materials/WMD incident, given a hazardous materials/WMD incident, an assignment, policies and procedures, approved reference sources, and the scope of the problem, so that response objectives, action options, safety precautions, suitability of approved personal protective equipment (PPE) available, and emergency decontamination needs are identified.

Requisite Knowledge
1. Identify policies and procedures for hazardous materials/WMD incident operations
2. List the basic components of an incident action plan (IAP)
3. Describe modes of operation (offensive, defensive, and nonintervention)
4. Describe types of response objectives
5. Describe types of action options
6. Identify types of response information available from the Emergency Response Guidebook (ERG), safety data sheets (SDS), shipping papers with emergency response information, and other resources
7. Identify types of information available from and how to contact CHEMTREC, CANUTEC, and SETIQ, governmental authorities, and manufacturers, shippers, and carriers (highway, rail, water, air, pipeline)
8. Describe safety procedures
9. Describe risk analysis concepts
10. Identify the purpose, advantages, limitations, and uses of approved PPE to determine if PPE is suitable for the incident conditions
11. Explain the difference between exposure and contamination
12. Identify contamination types, including sources and hazards of carcinogens at incident scenes
13. List routes of exposure
14. Describe types of decontamination (emergency, mass, and technical)
15. Describe the purpose, advantages, and limitations of emergency decontamination
16. Describe procedures, tools, and equipment for performing emergency decontamination

Requisite Skills
1. Identify response objectives and action options based on the scope of the problem and available resources
2. Identify whether approved PPE is suitable for the incident conditions
3. Identify emergency decontamination needs based on the scope of the problem

6-4: Performing Assigned Tasks at a Hazardous Materials/WMD Incident

Authority
   - Paragraph 5.4.1
2. Office of the State Fire Marshal

Job Performance Requirement
Perform assigned tasks at a hazardous materials/WMD incident; an assignment with limited potential of contact with hazardous materials/WMD, policies and procedures, the scope of the problem, approved tools, equipment, and PPE, so that protective actions and scene control are established and maintained, on-scene incident command is described, evidence is preserved, approved PPE is selected and used in the proper manner; exposures and personnel are protected; safety procedures are followed; hazards are avoided or minimized; assignments are completed; and gross decontamination of personnel, tools, equipment, and PPE is conducted in the field.

Requisite Knowledge
1. Describe scene control procedures
2. Describe procedures for protective actions, including evacuation and sheltering-in-place
3. Describe procedures for ensuring coordinated communications between responders and to the public
4. List evidence recognition and preservation procedures
5. Identify hazardous materials/WMD incident command roles and responsibilities within the incident command system (ICS)
6. Identify the purpose, importance, benefits, and organization of incident command at hazardous materials/WMD incidents
7. Describe policies and procedures for implementing incident command at hazardous materials/WMD incidents
8. Describe the capabilities, limitations, inspection, donning, working in, going through decontamination while wearing, doffing approved PPE
9. Describe how to recognize signs and symptoms of thermal stress
10. Identify safety precautions when working at hazardous materials/WMD incidents
11. Describe purpose, advantages, and limitations of gross decontamination
12. Identify the need for gross decontamination in the field based on the task(s) performed and contamination received, including sources and hazards of carcinogens at incident scenes
13. Describe gross decontamination procedures for personnel, tools, equipment, and PPE
14. Describe how to clean, disinfect, and inspect tools, equipment, and PPE

Requisite Skills
1. Establish and maintaining scene control
2. Recognize and preserve evidence
Fire Fighter 1 – Hazardous Materials/WMD
Section 6: Operations

3. Inspect, don, work in, go through decontamination while wearing, and doff approved PPE
4. Isolate contaminated tools, equipment, and PPE
5. Conduct gross decontamination of contaminated personnel, tools, equipment, and PPE in the field
6. Clean, disinfect, and inspect approved tools, equipment, and PPE

6-5: Performing Emergency Decontamination at a Hazardous Materials/ WMD Incident

Authority
   • Paragraph 5.5.1

Job Performance Requirement
Perform emergency decontamination at a hazardous materials/WMD incident, given a hazardous materials/WMD incident that requires emergency decontamination; an assignment; scope of the problem; policies and procedures; and approved tools, equipment, and PPE for emergency decontamination, so that emergency decontamination needs are identified, approved PPE is selected and used, exposures and personnel are protected, safety procedures are followed, hazards are avoided or minimized, emergency decontamination is set up and implemented, and victims and responders are decontaminated.

Requisite Knowledge
1. Define contamination, cross contamination, and exposure
2. Describe contamination types
3. List routes of exposure
4. Identify types of decontamination (emergency, mass, and technical)
5. Describe the purpose, advantages, and limitations of emergency decontamination
6. Describe policies and procedures for performing emergency decontamination
7. Identify approved tools and equipment for emergency decontamination
8. Describe hazard avoidance for emergency decontamination

Requisite Skills
1. Select an emergency decontamination method
2. Set up emergency decontamination in a safe area
3. Use PPE in the proper manner
4. Implement emergency decontamination
5. Prevent spread of contamination
6. Avoid hazards during emergency decontamination

6-6: Evaluating and Reporting Progress for a Hazardous Materials/WMD Incident

Authority
   - Paragraph 5.6.1

Job Performance Requirement
Evaluate and report the progress of the assigned tasks for a hazardous materials/WMD incident, given a hazardous materials/WMD incident, an assignment, policies and procedures, status of assigned tasks, and approved communication tools and equipment, so that the effectiveness of the assigned tasks is evaluated and communicated to the supervisor, who can adjust the IAP as needed.

Requisite Knowledge
1. List components of progress reports
2. Describe policies and procedures for evaluating and reporting progress
3. Describe how to use approved communication tools and equipment
4. Identify signs indicating improving, static, or deteriorating conditions based on the objectives of the action plan
5. Describe how to recognize circumstances under which it would be prudent to withdraw from a hazardous materials/ WMD incident

Requisite Skills
1. Determine incident status
2. Determining whether the response objectives are being accomplished
3. Use approved communications tools and equipment
4. Communicate the status of assigned tasks

Section 7: Operations – Mission Specific

7-1: Selecting, Donning, Working In, and Doffing Approved PPE at a Hazardous Materials/WMD Incident

Authority
   • Paragraph 6.2.1

Job Performance Requirement
Select, don, work in, and doff approved PPE at a hazardous materials/WMD incident, given a hazardous materials/WMD incident; a mission-specific assignment in an IAP that requires use of PPE; the scope of the problem; response objectives and options for the incident; access to a hazardous materials technician, an allied professional, an emergency response plan, or standard operating procedures; approved PPE; and policies and procedures, so that under the guidance of a hazardous materials technician, an allied professional, an emergency response plan, or standard operating procedures, approved PPE is selected, inspected, donned, worked in, decontaminated, and doffed; exposures and personnel are protected; safety procedures are followed; hazards are avoided or minimized; and all reports and documentation pertaining to PPE use are completed.

Requisite Knowledge
1. Describe policies and procedures for PPE selection and use
2. Describe the importance of working under the guidance of a hazardous materials technician, an allied professional, an emergency response plan, or standard operating procedures when selecting and using PPE
3. Identify the capabilities and limitations of and specialized donning, doffing, and usage procedures for approved PPE
4. List components of an incident action plan (IAP)
5. Describe procedures for decontamination, inspection, maintenance, and storage of approved PPE
6. Describe the process for being decontaminated while wearing PPE
7. Describe procedures for reporting and documenting the use of PPE

Requisite Skills
1. Select PPE for the assignment
2. Inspect, maintain, store, don, work in, and doff PPE
3. Go through decontamination (emergency and technical) while wearing the PPE
4. Report and document the use of PPE

7-2: Performing Product Control Techniques at a Hazardous Materials/WMD Incident

Authority
   • Paragraph 6.6.1
2. Office of the State Fire Marshal

Job Performance Requirement
Perform product control techniques with a limited risk of personal exposure at a hazardous materials/WMD incident, given a hazardous materials/WMD incident with release of product; an assignment in an IAP; scope of the problem; policies and procedures; approved tools, equipment, control agents, and PPE; and access to a hazardous materials technician, an allied professional, an emergency response plan, or standard operating procedures, so that under the guidance of a hazardous materials technician, an allied professional, an emergency response plan, or standard operating procedures, approved PPE is selected and used; exposures and personnel are protected; safety procedures are followed; hazards are avoided or minimized; a product control technique is selected and implemented; the product is controlled; victims, personnel, tools, and equipment are decontaminated; and product control operations are reported and documented.

Requisite Knowledge
1. Describe types of PPE and the hazards for which they are used
2. Describe the importance of working under the guidance of a hazardous materials technician, an allied professional, an emergency response plan, or standard operating procedures
3. Define of control, confinement, containment, and extinguishment
4. Describe policies and procedures for product control
5. Identify product control methods for controlling a release with limited risk of personal exposure
6. Describe safety precautions associated with each product control method
7. Identify the location and describe how to operation of remote/emergency shutoff devices in cargo tanks and intermodal tanks in transportation and containers at facilities, that contain flammable liquids and flammable gases
8. List characteristics and applicability of approved product control agents
9. Describe how to use approved tools and equipment
10. Identify requirements for reporting and documenting product control operations

Requisite Skills
1. Select and use PPE
2. Select and perform product control techniques to confine/contain the release with limited risk of personal exposure
Fire Fighter 1 – Hazardous Materials/WMD
Section 7: Operations – Mission Specific

3. Use approved control agents and equipment on a release involving hazardous materials/WMD
4. Use remote control valves and emergency shutoff devices on cargo tanks and intermodal tanks in transportation and containers at fixed facilities
5. Perform product control techniques

8-4: Doffing Wildland Personal Protective Equipment

Authority
1. Office of the State Fire Marshal

Job Performance Requirement
Doff wildland personal protective equipment (PPE), given PPE, so that PPE is removed in accordance with manufacturer guidelines and returned to a ready state.

Requisite Knowledge
1. Identify when it is safe to doff PPE
2. Identify AHJ policies and procedures for doffing PPE

Requisite Skills
1. Doff PPE
2. Return PPE to a ready state

Section 9: Preparedness

9-1: Maintaining Assigned Personal Protective Equipment

Authority
   • Paragraph 4.3.2

Job Performance Requirement
Maintain assigned personal protective equipment, given the standard equipment issue, so that the equipment is serviceable and available for use on the fireline and defects are recognized and reported to the supervisor.

Requisite Knowledge
1. Describe how to maintain personal protective equipment, including inspection, the recognition of unserviceable items, and proper cleaning procedures

Requisite Skills
1. None specified

</table>
9-2: Maintaining Assigned Suppression Hand Tools and Equipment

Authority
   • Paragraph 4.3.3

Job Performance Requirement
Maintain assigned suppression hand tools and equipment, given tools and equipment and
agency maintenance specifications, so that assigned equipment is maintained and serviceable
and defects are recognized and reported to the supervisor.

Requisite Knowledge
1. *Describe how to* inspect tools and assigned suppression equipment
2. *Describe how to* recognize unserviceable items
3. *Describe* required maintenance techniques

Requisite Skills
1. Sharpen assigned suppression equipment
2. Maintenance techniques for assigned suppression equipment
3. Use required maintenance equipment

Section 10: Suppression

10-1: Assembling and Preparing for Response

Authority
   • Paragraph 4.5.2
2. Office of the State Fire Marshal

Job Performance Requirement
Assemble and prepare for response, given an assembly location, an assignment, incident location, mode of transportation, and time requirements, so that arrival at the incident with the required personnel and equipment meets agency guidelines.

Requisite Knowledge
1. Identify equipment required for response
2. Describe agency time standards and special transportation considerations
3. Describe agency safety response guidelines
4. Describe operational procedures for various response modes

Requisite Skills
1. None specified

Content Modification

<table>
<thead>
<tr>
<th>Block</th>
<th>Modification</th>
<th>Justification</th>
</tr>
</thead>
<tbody>
<tr>
<td>RK 1</td>
<td>Changed “requirements” to “required for response”.</td>
<td>Clarification. The student isn’t identifying the requirements of the equipment, they are identifying what equipment is required based on what the incident requires.</td>
</tr>
<tr>
<td>RK 2</td>
<td>Removed “(weight considerations)”.</td>
<td>Weight is not the only special transportation consideration.</td>
</tr>
<tr>
<td>RK 3</td>
<td>Added “response guidelines”.</td>
<td>Narrowing the scope of “agency safety” to pertain to the JPR.</td>
</tr>
<tr>
<td>RK 4</td>
<td>Changed “transportation” to “response”.</td>
<td>Transportation implies the type of vehicle in which the responders are traveling to the incident, not the response level. Revised for clarification.</td>
</tr>
</tbody>
</table>

</table>
10-2: Recognizing Hazards and Unsafe Situations

Authority
   • Paragraph 4.5.3
2. Office of the State Fire Marshal

Job Performance Requirement
Recognize hazards and unsafe situations, given a wildland or wildland/urban interface fire or simulated scenario and the standard safety policies and procedures of the agency, so that the hazard(s) and unsafe condition(s) are communicated to the supervisor and appropriate action is taken.

Requisite Knowledge
1. Describe basic wildland fire safety
2. Describe basic wildland fire behavior
3. Identify basic wildland suppression methods
4. Describe the Standard Fire Fighting Orders
5. Describe the Situations that Shout “Watch Out”
6. Describe the principles of LCES (Lookouts, Communications, Escape Routes, Safety Zones)
7. Describe downhill checklist guideline
8. Describe Common Denominators of Fire Behavior on Tragedy Fires
9. Describe human factors that impact wildland fire suppression

Requisite Skills
1. Demonstrate knowledge of the Standard Fire Orders, the Situations that Shout “Watch Out”, and LCES

**10-3: Constructing a Fireline**

**Authority**
   - Paragraph 4.5.4
2. Office of the State Fire Marshal

**Job Performance Requirement**
Construct a fireline, given a wildland fire or simulated scenario, agency line construction standards, suppression tools, water or other suppression agents, and equipment, so that the fireline conforms to the construction standard.

**Requisite Knowledge**
1. *Describe basic wildland suppression strategy*
2. *Identify basic wildland suppression tactics*
3. *Describe fireline construction principles, techniques, and standards*
4. *Describe safety considerations related to fireline construction*
5. *Describe how to construct a handline*
6. *Describe how to perform mobile attack*
7. *Describe how to perform a simple hose lay*
8. *Describe how to perform a progressive hose lay*
9. *Describe how to retrieve hose*

**Requisite Skills**
1. Use hand tools correctly
2. Apply fire streams
3. Apply *extinguishing* agents

</table>
10-4: Securing the Fireline

Authority
   - Paragraph 4.5.5
2. Office of the State Fire Marshal

Job Performance Requirement
Secure the fireline, given a wildland fire or simulated scenario, suppression tools, water or other suppression agents, and equipment, so that fireline burning materials and unburned fuels are physically separated.

Requisite Knowledge
1. Describe line improvement techniques
2. Identify safety considerations
3. Describe how to use basic ignition devices

Requisite Skills
1. Use of basic ignition devices only under direct supervision

Content Modification

10-5: Reducing the Threat of Fire Exposure to Improved Properties

Authority
   • Paragraph 4.5.6
2. Office of the State Fire Marshal

Job Performance Requirement
Describe the methods to reduce the threat of fire exposure to improved properties, given a wildland/urban interface fire or simulated scenario, suppression tools, and equipment, so that improvements are protected.

Requisite Knowledge
1. Describe wildland fire behavior within the wildland/urban interface
2. Describe wildland fuel removal for structure defense preparation
3. Describe structure defense methods
4. Identify equipment and personnel capabilities within the wildland/urban interface
5. Identify the difference between a safety zone and a temporary refuge area (TRA)

Requisite Skills
1. Apply requisite knowledge to defend structures
