The State of California and the California Department of Forestry and Fire Protection make no representations or warranties regarding the accuracy of data or maps. Public Resources Code 4201-4204 directs the California Department of Forestry and Fire Protection to map fire hazard within State Responsibility Areas (SRA) based on fuel loading, slope, fire weather, and other relevant factors present, including areas where wildland-urban interfaces and other factors present, including areas where wildland-urban interfaces and other relevant factors present, including areas where wildland-urban interfaces and other relevant factors present, including areas where wildland-urban interfaces and other relevant factors present, including areas where wildland-urban interfaces and other relevant factors present, including areas where wildfire spread. These zones, referred to as Fire Hazard Severity Zones (FHSZ), classify a wildland-urban interface as Moderate, High, or Very High fire hazard based on the average hazard across the area included in the zone.
